Race In Cyberspace:

Race in Cyberspace Beth Kolko, Lisa Nakamura, Gilbert Rodman, 2013-08-21 Groundbreaking and timely **Race in Cyberspace** brings to light the important yet vastly overlooked intersection of race and cyberspace **Cybertypes** Lisa Nakamura, 2013-09-13 First published in 2002 In **Cybertypes** Lisa Nakamura turns a sour assumption that the Net is color blind on its head Examining all facets of everyday web life she shows that racial and ethnic stereotypes or cybertypes are hardwired into our online interactions Identity tourists masquerade in chat rooms as Asian_Geisha or Alatiniolover Web directories sharply delimit racial categories Anonymous computer users are assumed to be white Lively provocative **Cybertypes** takes up computer relationship between race ethnicity and technology and offers a candid and nuanced understanding of identity in the information age Digital Diaspora Anna Everett, 2009-02-05 Traces the rise of black participation in cyberspace **Law and Society Approaches to Cyberspace** Paul Schiff Berman, 2017-11-28 During the past decade the rise of online communication has proven to be particularly fertile ground for academic exploration at the intersection of law and society Scholars have considered how best to apply existing law to new technological problems but they also have returned to first principles considering fundamental questions about what law is how it is formed and its relation to cultural and technological change This collection brings together many of these seminal works which variously seek to interrogate assumptions about the nature of communication knowledge invention information sovereignty identity and community From the use of metaphor in legal opinions about the internet to the challenges posed by globalization and deterritorialization to the potential utility of online governance models to debates about copyright free expression and privacy this collection offers an invaluable introduction to cutting edge ideas about law and society in an online era In addition the introductory essay both situates this work within the trajectory of law and society scholarship and summarizes the major fault lines in ongoing policy debates about the regulation of online activity Artificial Intelligence and International Conflict in Cyberspace Fabio Cristiano, Dennis Broeders, François Delerue, Frédéric Douzet, Aude Géry, 2023-05-11 This edited volume explores how artificial intelligence AI is transforming international conflict in cyberspace Over the past three decades cyberspace developed into a crucial frontier and issue of international conflict However scholarly work on the relationship between AI and conflict in cyberspace has been produced along somewhat rigid disciplinary boundaries and an even more rigid sociotechnical divide wherein technical and social scholarship are seldomly brought into a conversation This is the first volume to address these themes through a comprehensive and cross disciplinary approach With the intent of exploring the question what is at stake with the use of automation in international conflict in cyberspace through AI the chapters in the volume focus on three broad themes namely 1 technical and operational 2 strategic and geopolitical and 3 normative and legal These also constitute the three parts in which the chapters of this volume are organised although these thematic sections should not be considered as an analytical or a disciplinary

be useful to the policymakers and corporate professionals engaged with China's digital sphere Racing Cyberculture
 Christopher L. McGahan, 2013-10-31 Racing Cyberculture explores new media art that challenges the race blind myth of cyberspace. The particular cultural workers whose productions are addressed are the performance and installation artist Guillermo Gomez Pena and Roberto Sifuentes, the UK new media arts collective Mongrel, the conceptual artists and composer Keith Obadike and the multimedia artist Prema Murthy. The author looks at how works by these artists bring forward questions of racial and cultural identity as they intersect with information technology **Cyber Politics In Us-china Relations**
 Cuihong Cai, 2021-07-29 Cyber issues are of utmost importance and sensitivity for US China relations today. The combination of cyber and politics is also developing from low politics to high politics. This book discusses cyber politics in US China relations from four distinct aspects: first, the overall analysis of the role and manifestation of cyber politics in international relations from a theoretical perspective; second, the main issues regarding cyber politics in US China relations; third, the factors influencing cyber politics in US China relations; and fourth, the prospect and practice of cyber politics in US China relations. Based on an exploration of issues in cybersecurity, cyberspace governance, ideology, and the power tussle in cyberspace between the US and China, as well as an analysis of the factors influencing cyber politics in the bilateral relations from the perspectives of strategy, discourse, and trust, this book asserts that cyberspace is rapidly becoming a new arena for the geopolitical games between the US and China. A new form of cyber geopolitics is thus emerging The SAGE Handbook of Qualitative Research
 Norman K. Denzin, Yvonna S. Lincoln, 2011-04-27 Now in its fourth edition, this handbook is an essential resource for those interested in all aspects of qualitative research and has been extensively revised and updated to cover new topics including applied ethnography, queer theory, and auto ethnography **Cyber Arms**
 Stanislav Abaimov, Maurizio Martellini, 2020-07-02 This book will raise awareness on emerging challenges of AI-empowered cyber arms used in weapon systems and stockpiled in the global cyber arms race. Based on real life events, it provides a comprehensive analysis of cyber offensive and defensive landscapes, analyses the cyber arms evolution from prank malicious codes into lethal weapons of mass destruction, reveals the scale of cyber offensive conflicts, explores cyber warfare mutation, warns about cyber arms race escalation, and use of Artificial Intelligence (AI) for military purposes. It provides an expert insight into the current and future malicious and destructive use of the evolved cyber arms, AI, and robotics, with emphasis on cyber threats to CBRNe and critical infrastructure. The book highlights international efforts in regulating the cyber environment, reviews the best practices of the leading cyber powers, and their controversial approaches, recommends responsible state behaviour. It also proposes information security and cyber defence solutions and provides definitions for selected conflicting cyber terms. The disruptive potential of cyber tools merging with military weapons is examined from the technical point of view, as well as legal, ethical, and political perspectives Cyber Environment and International Politics
 Hasret Çomak, Burak Şakir Şeker, Yaprak Civelek, Çağla Arslan Bozkuş, 2022-11-27 Actors in the cyber sphere include countries, armed forces, intelligence

organizations legal authorities and natural and legal persons Cyber War is defined as the intrusion by one state to destroy or disrupt the computer systems or networks of another state It is defined as the sort of warfare in which computer systems are employed to damage or destroy adversary systems in the United Nations Glossary in the same way as information warfare Cyber warfare moves at a breakneck speed It s a global phenomenon that occurs before the traditional battleground In order to counter cyber crimes and related issues more studies needed to improve our understanding inform policies and develop and strengthen cooperation between individuals institutions and countries All states need to take constitutional legal technical and administrative measures on cybersecurity For this purpose national virtual environment security policies should be developed and constantly updated National information security should be given utmost importance A cyber security awareness culture should be established and supported by regional and global international institutions and organizations A common understanding on cyber security needs to be adopted at all levels
