Race over Empire Eric T. L. Love, 2005-10-12 Generations of historians have maintained that in the last decade of the nineteenth century white supremacist racial ideologies such as Anglo Saxonism social Darwinism benevolent assimilation and the concept of the white man's burden drove American imperialist ventures in the nonwhite world In *Race over Empire* Eric T. L. Love contests this view and argues that racism had nearly the opposite effect From President Grant's attempt to acquire the Dominican Republic in 1870 to the annexations of Hawaii and the Philippines in 1898 Love demonstrates that the imperialists' relationship with the racist ideologies of the era was antagonistic not harmonious In a period marked by Jim Crow lynching Chinese exclusion and immigration restriction Love argues no pragmatic politician wanted to place nonwhites at the center of an already controversial project by invoking the concept of the white man's burden Furthermore convictions that defined whiteness raised great obstacles to imperialist ambitions particularly when expansionists entered the tropical zone In lands thought to be too hot for white blood white Americans could never be the main beneficiaries of empire What emerges from Love's analysis is a critical reinterpretation of the complex interactions between politics race labor immigration and foreign relations at the dawn of the American century **Race Over Empire** Eric Tyrone Lowery

Love, 1997 From Quills to Tweets Andrea J. Dew, Marc A. Genest, S. C. M. Paine, 2019-12-02 While today's presidential tweets may seem a light year apart from the scratch of quill pens during the era of the American Revolution the importance of political communication is eternal This book explores the roles that political narratives media coverage and evolving communication technologies have played in precipitating shaping and concluding or prolonging wars and revolutions over the course of US history The case studies begin with the Sons of Liberty in the era of the American Revolution cover American wars in the nineteenth and twentieth centuries and conclude with a look at the conflict against ISIS in the Trump era Special chapters also examine how propagandists shaped American perceptions of two revolutions of international significance the Russian Revolution and the Chinese Revolution Each chapter analyzes its subject through the lens of the messengers' messages and communications technology media to reveal the effects on public opinion and the trajectory and conduct of the conflict The chapters collectively provide an overview of the history of American strategic communications on wars and revolutions that will interest scholars students and communications strategists *Afro-Latin@s in Movement* Petra R. Rivera-Rideau, Jennifer A. Jones, Tianna S. Paschel, 2016-06-29 Through a collection of theoretically engaging and empirically grounded texts this book examines African descended populations in Latin America and Afro Latin@s in the United States in order to explore questions of black identity and representation transnationalism and diaspora in the Americas

*Pacific Connections* Kornel Chang, 2012-06-12 *Pacific Connections* is a shrewd fascinating and cogent examination of a Pacific Northwest borderland often taken for granted as a peaceful but inconsequential meeting point between two friendly nations Chang shows instead how it has been a violent point of contention shaped by empire and Anglo American aspirations

to hegemony migration and ubiquitous racism the creation of boundaries through state formation and the transgression of those boundaries by the mechanisms of capital Sharply written and deeply researched this book brings the Pacific Northwest into both the history of the Pacific World and the literature on borderlands that has until now focused largely on the U S and Mexico Pacific Connections is a brilliant achievement Bruce Cumings author of Dominion From Sea to Sea Pacific Ascendancy and American Power This wonderful book combines impressive archival research with a strong grounding in migration studies political economy cultural studies and critical race studies Chang examines weighty questions through compelling human dramas set in far flung places across the Pacific Rim This is transnational history at its best David Roediger coauthor of The Production of Difference Kornel Chang grapples with big ideas and big questions Tracing the global movements behind racial and national borders and unraveling the messy contradictions of empire at the dawn of the twentieth century Pacific Connections explores a history that continues to haunt us with particular resonance in our current moment Moon Ho Jung author of Coolies and Cane Race Labor and Sugar in the Age of Emancipation Pacific Connections is a capacious study that recasts the U S Canadian borderlands as a crucial site of migration trade and exclusion within the formation of Pacific empire Chang shows how Chinese merchants Japanese and European migrants indigenous traders Anglo labor activists and both South Asian and white radicals played important roles in the negotiations of sovereignty Lisa Lowe Professor of Comparative Literature University of California San Diego

**The Picky Eagle** Richard W. Maass, 2020-05-15 The Picky Eagle explains why the United States stopped annexing territory by focusing on annexation s domestic consequences both political and normative It describes how the US rejection of further annexations despite its rising power set the stage for twentieth century efforts to outlaw conquest In contrast to conventional accounts of a nineteenth century shift from territorial expansion to commercial expansion Richard W Maass argues that US ambitions were selective from the start By presenting twenty three case studies Maass examines the decision making of US leaders facing opportunities to pursue annexation between 1775 and 1898 US presidents secretaries and congressmen consistently worried about how absorbing new territories would affect their domestic political influence

and their goals for their country These leaders were particularly sensitive to annexation s domestic costs where xenophobia interacted with their commitment to democracy rather than grant political representation to a large alien population or subject it to a long term imperial regime they regularly avoided both of these perceived bad options by rejecting annexation As a result US leaders often declined even profitable opportunities for territorial expansion and they renounced the practice entirely once no desirable targets remained In addition to offering an updated history of the foundations of US territorial expansion *The Picky Eagle* adds important nuance to previous theories of great power expansion with implications for our understanding of US foreign policy and international relations      **Professional Journal of the United States Army** ,2009

*The Peace We Can't Reach* Meg Gorzycki,2023-09-28 Propelled by George Floyd s murder in her hometown of Minneapolis Meg Gorzycki addresses the question of why peace is difficult to cultivate and sustain and finds that America has always had a love hate relationship with peace *The Peace We Can t Reach* posits that peace is more than the absence of war and aggression and in its most profound sense is shalom the commitment to live for the well being of all so that compassion and justice might prevail Exploring shalom from the perspective of war police brutality mass shootings and economic injustice this book offers evidence that neither democracy nor Christianity as Americans have known them are capable of achieving peace It asserts that the keys to peace are personal and social narratives that give people a sense of identity and their highest purpose and concludes that gaining control over these narratives is vital to shalom      *America's Forgotten Middle East Initiative* Andrew Patrick,2015-06-25 Sent to the Middle East by Woodrow Wilson to ascertain the viability of self determination in the disintegrating Ottoman Empire the King Crane Commission of 1919 was America s first foray into the region The commission s controversial recommendations included the rejection of the idea of a Jewish state in Syria US intervention in the Middle East and the end of French colonial aspirations The Commission s recommendations proved inflammatory even though its counsel on the question of the Palestinian mandate was eventually disregarded by Lloyd George and Georges Clemenceau in favour of their own national interests In the ensuing years the Commission s dismissal of claims by Zionist representatives like David Ben Gurion on their right to Palestine proved particularly divisive with some historians labeling it prophetic and accurate and others arguing that Commission members were biased and ill informed Here in the first book length analysis of the King Crane report in nearly 50 years Andrew Patrick chronicles the history of early US involvement in the region and challenges extant interpretations of the turbulent relationship between the United States and the Middle East      **Between Freedom and Progress** David Prior,2019-11-04 Between Freedom and Progress recovers and analyzes the global imaginings of Reconstruction s partisans those who struggled over and with Reconstruction as they vied with one another to define the nature of their country after the Civil War The remarkable technological and commercial transformations of the mid nineteenth century in particular steam engines telegraphs and an expanded commercial printing capacity created a constant stream of news description and storytelling from across and beyond the

nation Reconstruction's partisans contended with each other to make sense of this information motivated by intense political antagonism combined with a shared but contested set of ideas about freedom and progress. As writers, lecturers, editors, travelers, moral reformers, racists, abolitionists, politicians, suffragists, soldiers, and diplomats, Reconstruction's partisans made competing claims about their place in the world. Understanding how, why, and when they did so helps ground our understanding of Reconstruction itself, a mysterious transatlantic term in its own intellectual context. Three factors proved pivotal to the making of Reconstruction's world. First, from 1865 to the early 1870s, the interconnected issues of how to remake the Union and how to remake the South exerted a powerful hold on federal politics, defining the partisan landscape and inspiring rival arguments about what was possible and what was good. The daunting nature of these issues created a sense of crisis across the political spectrum, with political discourse ranging in tone from combative to euphoric to apocalyptic. Second, though domestic in nature, these issues were refracted through two broadly held beliefs: that the causes of freedom and progress defined history, and that distinctive peoples with their own characters composed the world's population. These beliefs produced a disposition to think of developments from across and beyond the United States as essentially relatable to each other, encouraging an intellectual style that favored wide-ranging comparisons. Third, far from being confined to the elite, this mode of thinking and arguing about the world lived and breathed in public texts that were produced and consumed on a weekly and daily basis. This commercialized and politicized world of mass publishing was highly unequal in structure and content, but it was also impressively vibrant and popular. Together, these three factors made the world of Reconstruction a global landscape of information, argumentation, and imagination that derived much of its vigor from domestic political battles.

*Missing Links* Jeremy Rich, 2012-01-01

Jeremy Rich uses the eccentric life of R. L. Garner (1848-1920) to examine the commercial networks that brought the first apes to America during the Progressive Era, a critical time in the development of ideas about African wildlife, race, and evolution. Garner was a self-taught zoologist and atheist from southwest Virginia. Starting in 1892, he lived on and off in the French colony of Gabon, studying primates and trying to engage U.S. academics with his theories. Most prominently, Garner claimed that he could teach apes to speak human languages and that he could speak the languages of primates. Garner brought some of the first live primates to America, launching a traveling demonstration in which he claimed to communicate with a chimpanzee named Susie. He was often mocked by the increasingly professionalized scientific community, who were wary of his colorful escapades, such as his ill-fated plan to make a New York City socialite the queen of southern Gabon and his efforts to convince Thomas Edison to finance him in Africa. Yet Garner did influence evolutionary debates, and as with many of his era, race dominated his thinking. Garner's arguments, for example, that chimpanzees were more loving than Africans or that colonialism constituted a threat to the separation of the races, offer a fascinating perspective on the thinking and attitudes of his times. *Missing Links* explores the impact of colonialism on Africans, the complicated politics of buying and selling primates, and the popularization of biological racism.
