Race To Save The Planet 1997:

Race to Save the Planet 1997 Edward C. Wolf, 1996-01-01 **Saving the Bay** Ann E. Byrnes, 2001 For centuries before the arrival of European settlers the Chesapeake Bay's natural bounty and pristine beauty were self-sustaining. Today, after three centuries of human use and abuse, almost everyone agrees that the Bay is fragile and its future uncertain. As scientists work to understand the environmental threats and policy makers respond with new regulations, ordinary people are increasingly doing their part to ensure a healthier future for the Chesapeake. *Saving the Bay* gathers dozens of these stories and brings them forward as examples of how broadly the coalition to protect the Bay has grown and succeeded. Through engaging photographs by Richard A. K. Dorbin and moving first-person accounts compiled by Ann E. Dorbin, this book celebrates a new chapter in the history of the Bay, one in which people in Maryland, Virginia, Pennsylvania, Washington D.C., Delaware, West Virginia, and New York work hand in hand to shape the future of a beloved resource. From Americorps volunteer Julie Benintendi's work with shoreline restoration to Mike Ogburn's efforts to build a non-polluting electric car, from the mountainous outer reaches of the watershed to the mouth of the Bay, the people working for the Chesapeake are as diverse and dynamic as the resource itself. Here are teachers, engineers, writers, farmers, parents, and naturalists working with grit and imagination. *Saving the Bay* demonstrates how these unprecedented efforts throughout the Chesapeake Bay region are making a real difference toward creating a better future. By bringing these stories to the forefront, we hope to educate readers, show that individual actions are critical, and accentuate positive rather than negative human impacts on the environment. Just as the wonder of the Bay is not reserved for experts or old timers, neither is the work that lies ahead. Therein lies the premise of this project: that behind the reports and controversy over the human-induced decline of the Bay's health and the path of its future, are many people doing their part in different and necessary ways for the future of the watershed. From *Saving the Bay* *Problem-Solving Exercises in Green and Sustainable Chemistry* Albert S. Matlack, Andrew P. Dicks, 2015-11-05 When confronted with a problem in science, the way to proceed is not always obvious. The problem may seem intractable, or there may be many possible solutions, with some better than others. *Problem-Solving Exercises in Green and Sustainable Chemistry* teaches students how to analyze and solve real-world problems that occur in an environmental context. **Encompassing Gender** Mary M. Lay, Janice J. Monk, Deborah Rosenfelt, 2002 From Beijing to Seattle, women's movements within academe and in local/global communities are growing at an unprecedented rate, raising pointed questions about paradigms of Western feminism, development, global trade, and scholarship. Despite this growing visibility, the perspectives of far too many women, especially from the Global South, are still excluded from mainstream U.S. scholarship. Presented with the task of preparing students for life in this new and rapidly shrinking world, many scholars have found themselves overwhelmed by the need to cross disciplinary and geographic borders. But some faculty are leading the way, often in defiance of academic traditions and prejudices, to a curriculum that reflects consequences of globalization.

Encompassing Gender is the long awaited anthology of more than 40 essays by 60 scholars many of them working in curriculum transformation groups that cut across the humanities the sciences and the social sciences all of them committed to an interdisciplinary approach to internationalizing the curriculum

Introduction to Green Chemistry John

Andraos, Albert S. Matlack, 2022-03-09 Interest in green chemistry and clean processes has grown so much in recent years that topics such as fluorous biphasic catalysis metal organic frameworks and process intensification which were barely mentioned in the First Edition have become major areas of research In addition government funding has ramped up the development of fuel cells and biofuels This reflects the evolving focus from pollution remediation to pollution prevention Copiously illustrated with more than 800 figures the Third Edition provides an update from the frontiers of the field It features supplementary exercises at the end of each chapter relevant to the chemical examples introduced in each chapter Particular attention is paid to a new concluding chapter on the use of green metrics as an objective tool to demonstrate proof of synthesis plan efficiency and to identify where further improvements can be made through fully worked examples relevant to the chemical industry NEW AND EXPANDED RESEARCH TOPICS Metal organic frameworks Metrics Solid acids for alkylation of isobutene by butanes Carbon molecular sieves Mixed micro and mesoporous solids Organocatalysis Process intensification and gas phase enzymatic reactions Hydrogen storage for fuel cells Reactive distillation Catalysts in action on an atomic scale UPDATED AND EXPANDED CURRENT EVENTS TOPICS Industry resistance to inherently safer chemistry Nuclear power Removal of mercury from vaccines Removal of mercury and lead from primary explosives Biofuels Uses for surplus glycerol New hard materials to reduce wear Electronic waste Smart growth The book covers traditional green chemistry topics including catalysis benign solvents and alternative feedstocks It also discusses relevant but less frequently covered topics with chapters such as Chemistry of Long Wear and Population and the Environment This coverage highlights the importance of chemistry to everyday life and demonstrates the benefits the expanded exploitation of green chemistry can have for society

Geography and Ethics James D. Proctor, David M. Smith, 2002-09-11

This book represents a landmark exploration of the common terrain of geography and ethics Drawing together specially commissioned contributions from distinguished geographers across the UK North America and Australasia the place of geography in ethics and of ethics in geography is examined through wide ranging thematic chapters Geography and Ethics is divided into four sections for discussion and exploration of ideas Ethics and Space Ethics and Place Ethics and Nature and Ethics and knowledge all of which point to the rich interplay between geography and moral philosophy or ethics

Human Rights Standards and the Responsibility of Transnational Corporations Michael K. Addo, 1999-09-01 What is the nature and scope of corporate responsibility with regard to human rights Should companies themselves be responsible for human rights violations involving themselves or their subsidiaries What principles should guide business in countries known to violate human rights Is self regulation sufficient or are corporations best regulated by national or international codes and on what should these codes be based These are some of the many questions which this ground breaking collection of essays seeks to address as it assesses the value of applying human rights standards to transnational corporations The increasing involvement of corporations in the public domain and the steady reduction of governmental involvement in commercial and social undertakings has created a desperate need to rethink the nature and role of the private corporation and its regulation This volume which contains a balanced collection of analyses from all interested sources in the corporate responsibility debate is the result of a three day conference during which government officials corporate executives NGOs and representatives of inter governmental organisations as well as academic researchers came together for the first time to discuss the emerging issues The essays have been arranged under six broad themes policy issues regulation issues of application matters of doctrine globalisation and case studies In addition each section contains the opinion not simply a summary of proceedings of a nominated rapporteur who draws together the strands of each theme and where necessary broadens the analysis to cover important issues which may not have been addressed At the heart of this volume is the attempt to define an effective framework for transnational corporate responsibility through international human rights standards It will be of vital interest to corporate legal advisers human rights practitioners NGOs government law offices and academics as well as to all those concerned with human rights and their place in the modern world
