Races A Study Of The Problems Of Race Formation In Man:

Races Carleton Stevens Coon, Stanley M. Garn, Joseph B. Birdsell, 1950 **Man's Most Dangerous Myth** Ashley Montagu, 2001-04-19 Man's Most Dangerous Myth was first published in 1942 when Nazism flourished when African Americans sat at the back of the bus and when race was considered the determinant of people's character and intelligence. It presented a revolutionary theory for its time, breaking the link between genetics and culture; it argued that race is largely a social construction and not constitutive of significant biological differences between people. In the ensuing 55 years, as Ashley Montagu's radical hypothesis became accepted knowledge, succeeding editions of his book traced the changes in our conceptions of race and race relations over the 20th century. Now, over 50 years later, Man's Most Dangerous Myth is back in print, fully revised by the original author. Montagu is internationally renowned for his work on race, as well as for such influential books as *The Natural Superiority of Women*, *Touching and The Elephant*, and *Man*. This new edition contains Montagu's most complete explication of his theory and a thorough updating of previous editions. The Sixth Edition takes on the issues of the Bell Curve, IQ testing, ethnic cleansing, and other current race relations topics, as well as contemporary restatements of topics previously addressed. A bibliography of almost 3,000 published items on race, compiled over a lifetime of work, is of enormous research value. Also available is an abridged student edition containing the essence of Montagu's argument, its policy implications, and his thoughts on contemporary race issues for use in classrooms. Ahead of its time in 1942, Montagu's arguments still contribute essential and salient perspectives as we face the issue of race in the 1990s. Man's Most Dangerous Myth is the seminal work of one of the 20th century's leading intellectuals, essential reading for all scholars and students of race relations.

Race and Reality Guy P. Harrison, 2010-05 There are vast differences between notions of race and the scientific view of human diversity. Drawing on research from diverse sources and interviews with key scientists, an award-winning journalist surveys the current state of a volatile subject.

The Concept of Race in Natural and Social Science E. Nathaniel Gates, 2014-05-01 Explores the concept of race. The term race, which originally denoted genealogical or class identity, has in the comparatively brief span of 300 years taken on an entirely new meaning. In the wake of the Enlightenment, it came to be applied to social groups. This ideological transformation, coupled with a dogmatic insistence that the groups so designated were natural and not socially created, gave birth to the modern notion of races as genetically distinct entities. The results of this view were the encoding of race and racial hierarchies in law, literature, and culture. How racial categories facilitate social control. The articles in the series demonstrate that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method. They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the interests of dominant social groups. Finally, the collection surveys how laws based on race have been enacted around the world to deny power to minority groups. A multidisciplinary resource. This collection of outstanding articles brings

multiple perspectives to bear on race theory and draws on a wider range of periodicals than even the largest library usually holds. Even if all the articles were available on campus, chances are that a student would have to track them down in several libraries and microfilm collections. Providing of course that no journals were reserved for graduate students out for binding or simply missing. This convenient set saves students substantial time and effort by making available all the key articles in one reliable source. **Authoritative commentary** The series editor has put together a balanced selection of the most significant works accompanied by expert commentary. A general introduction gives important background information and outlines fundamental issues, current scholarship and scholarly controversies. Introductions to individual volumes put the articles in context and draw attention to germinal ideas and major shifts in the field. After reading the material, even a beginning student will have an excellent grasp of the basics of the subject.

The Genetics of African Populations in Health and Disease Muntaser E. Ibrahim, Charles N. Rotimi, 2019-12-19 A pioneering work that focuses on the unique diversity of African genetics offering insights into human biology and genetic approaches.

Race and Racism Carolyn Fluehr-Lobban, 2005-12-15 In her newest book, anthropologist Carolyn Fluehr-Lobban examines the foundations of race in American society. She demonstrates how race and racism are not openly confronted or challenged in American communities or educational settings. Many families still live in segregated communities, especially ethnic sub-communities and attend largely segregated public and private schools. The author offers a simple and accessible explanation of the biology of race and a cross-cultural perspective on the social context of race, color, coding, ethnicity and ethnocentrism. There are few places in the world where race is not a factor in society and politics, but the author finds abundant evidence that is a dynamic and pliable concept as seen in the overturning of the slave system in Haiti or the American civil rights movement. Fluehr-Lobban's book is a fascinating and thoughtful assessment of the nature of race and racism. Her book will be of value to readers and instructors in anthropology, sociology, education and ethnic studies.

Bio-anthropology of High Altitude People Rikshesh Malhotra, 1989 Special reference to Himalaya Mountains Region. *Race and Human Evolution* Milford H. Wolpoff, Rachel Caspari, 1997 *Race and Human Evolution* shows how the debate over the Eve theory reflects a long history of theories about human origins and race that has been fraught with social and political implications.

The Bantu-Speaking Peoples of Southern Africa W. D. Hammond-Tooke, 2024-02-29 First published in 1974, *The Bantu Speaking Peoples of Southern Africa* is a revised and rewritten version of I. Schapera's ethnographical survey of the Bantu-speaking tribes of South Africa. New South African contributors place on record all the known facts of the physical characteristics and traditional cultures of these peoples as well as documenting the important social, cultural and economic changes that have occurred since the coming of the white man. This book will be of interest to students of anthropology, sociology, African studies and history.
