Racing Trains Transport Railway:

The Great Train Race Allan Mitchell, 2006-03-01 From their origins railways produced an intense competition between the two major continental systems in France and Germany Fitting a new technology into existing political institutions and social habits these two nations became inexorably involved in industrial and commercial rivalry that eventually escalated into the armed conflict of 1914 Based on many years of research in French and German archives this study examines the adaptation of railroads and steam engines from Britain to the continent of Europe after the Napoleonic age A fascinating example of how the same technology borrowed at the same time from the same source was assimilated differently by the two continental powers this book offers a groundbreaking analysis of the crossroads of technology and politics during the first Industrial Revolution

Racing Trains David Wilson, 1995 This book through the use of press coverage company records and national archives recreates the fervour of the Railway Races to the North The author includes coverage of the race itself and assesses the performance of the trains and crews

Dirt Track Auto Racing, 1919-1941 Don Radbruch, 2015-03-07 Prior to World War I auto racing featured expensive machines and teams financed by auto factories The teams toured the country and most of the races were held in large cities so the vast majority of Americans never saw a race All this changed after World War I though and in the 1920s and 1930s there were approximately 1 000 dirt tracks in the United States and Canada The dirt tracks offered small time racing little prize money and minimal publicity but people loved it This pictorial history documents dirt track racing with what are today called sprint cars around the United States from 1919 to 1941 Information on dirt track racing in Canada during this time is also provided Regionally divided chapters detail the drivers tracks and specific races of each area of the country Some of the drivers went on to win fame and fortune while others faded into obscurity Tracks included well known facilities as well as out of the way sites few people had ever heard of The cars ranged from state of the art machines to the more common home built specials based on Model T or Model A Ford parts Taken together the drivers tracks and races of this era were instrumental in making auto racing the popular sport it is today

ceaseless traffic of Clapham Junction from the mysteries of Brunel's atmospheric railway to the lost routines of the great marshalling yards Simon Bradley explores the world of Britain's railways the evolution of the trains and the changing experiences of passengers and workers The Victorians' private compartments railway rugs and footwarmers have made way for air conditioned carriages with airline type seating but the railways remain a giant and diverse anthology of structures from every period and parts of the system are the oldest in the world Using fresh research keen observation and a wealth of cultural references Bradley weaves from this network a remarkable story of technological achievement of architecture and engineering of shifting social classes and gender relations of safety and crime of tourism and the changing world of work The Railways shows us that to travel through Britain by train is to journey through time as well as space **The Parliamentary Debates (official Report)**.
