Racism And Inequality The Policy Alternatives:

Eliminating Racism Phyllis A. Katz, Dalmas A. Taylor, 2013-06-29 The chapters presented here provide the reader with an awareness of the divergent views of what constitutes racism and frameworks for reducing it This book points out that the dialogue and research on this subject since the mid 1970s have yielded increased controversy over the theories foundation and continued existence of racism Ironically what we viewed in the 1954 Brown decision and the Civil Rights Act of 1964 as the beginning of the end of racism turned out to be the beginning of confusion over the course of action to ensure societal acceptance of political mandates Hence the title of this book captures the essence of the emotional core of any forum for examining racism past and present One of the most controversial forums has been that of education beginning with the U S Supreme Court's 1954 ruling in Brown v Board of Education Behind every event that has spawned controversy is a profile in courage It was not a simple decision for the players in the scenario of the Brown v Board of Education case to step forward and present themselves as evidence of discrimination Black parents supported by black organizations viewed this legal action as a chance for equal opportunity Yet the 1950s were a time when black communities were pained by the thought that bigotry and institutional racism would forever stand in the way of their achieving equality **Racism** Albert J. Wheeler, 2005 Of all mankind's vices racism is one of the most pervasive and stubborn Success in overcoming racism has been achieved from time to time but victories have been limited thus far because mankind has focused on personal economic gain or power grabs ignoring generosity of the soul This bibliography brings together the literature **Understanding the Nature of Poverty in Urban America** James Jennings, 1994-08-23 This book is designed to help readers navigate through the vast and rapidly growing literature on poverty in urban America The major themes topics debates and issues are examined through an analysis of eight basic questions about the nature and problem of urban poverty What is poverty and how is it measured What kinds of national policies have been utilized to manage poverty What are the major characteristics and trends associated with poverty in America and how are race and ethnicity reflected in these trends What are the major explanations for persistent poverty in the United States What are the major characteristics and themes reflected in the American welfare system and anti poverty policies How is the underclass defined and explained How have the poor utilized political mobilization to fight poverty in the United States How does social welfare policy directed at poverty in America compare to social welfare systems in other countries After analyzing these issues Jennings concludes with a brief overview of how public discussions related to poverty in the 1990s are similar to such debates in earlier periods Essential reading for urban policy makers social scientists and students of contemporary American urban concerns **Racism in the United States** Meyer Weinberg, 1990-05-21 This volume represents the most comprehensive book length bibliography on the subject of racism available in the United States Compiler Meyer Weinberg has surveyed a wide ranging group of material and classified it under 87 subject headings drawing on articles books congressional hearings and reports theses and dissertations research

reports and investigative journalism Historical references cover the long history of racism while the heightened awareness and activity of the recent past is also addressed in detail In addition to works that fit the narrow definition of racism as a mode of oppression or group denial of rights based on color Weinberg includes references dealing with sexism antisemitism economic exploitation and similar forms of dehumanization References are grouped under a series of subject headings that include Civil Rights Desegregation Housing Socialism and Racism Unemployment and Violence against Minorities Items which do not have self explanatory titles are annotated and virtually every section is thoroughly cross referenced Also included is one section of carefully selected references on racism in countries other than the United States Unlike the remainder of the book this section is not comprehensive but rather provides an opportunity to view racism comparatively The volume concludes with an author index This work will be a significant addition to both academic and public libraries as well as an important resource for courses in racism sociology and black history *Public Policy Evaluation* Stuart S.

Nagel,2018-08-13 First published in 1998 this volume examines how super optimum decisions involve finding alternatives to controversies whereby Conservatives Liberals or other major groups can all come out ahead of their best initial expectations simultaneously This book is organised in terms of concepts methods causes process substance and the policy studies profession Concepts clarify that policy evaluation traditionally involves 1 Goals to be achieved 2 Alternatives available for achieving them 3 Relations between goals and alternatives 4 Drawing a conclusion as to the best alternative in light of the goals alternatives and relations and 5 Analysing how the conclusion would change if there were changes in the goals alternatives or relations Super optimizing also involves five related steps but with the following improvements 1 Goals are designed as conservative liberal or neutral 2 Alternatives get the same designations 3 Relations are simplified to indicate which alternatives are relatively high or low on each goal 4 The conclusion involves arriving at an alternative that does better on Goal A than Alternative A and simultaneously better on Goal B than Alternative B and 5 The fifth step involves analysing the super optimum or win win alternative in terms of its feasibility as to the economic technological psychological political administrative and legal matters *Race, Sex, and Policy Problems* Marian Lief Palley,Michael B. Preston,1979 *Racism in Contemporary America* Meyer Weinberg,1996-05-23 Racism in Contemporary America is the largest and most up to date bibliography available on current research on the topic It has been compiled by award winning researcher Meyer Weinberg who has spent many years writing and researching contemporary and historical aspects of racism Almost 15 000 entries to books articles dissertations and other materials are organized under 87 subject headings In addition there are author and ethnic racial indexes Several aids help the researcher access the materials included In addition to the subject organization of the bibliography entries are annotated whenever the title is not self explanatory An author index is followed by an ethnic racial index which makes it convenient to follow a single group through any or all the subject headings This is a source book for the serious study of America s most enduring problem as such it will be of value to students and researchers at all levels

Affirmative Action And Equal Opportunity Nijole V. Benokraitis,2019-04-10 The affirmative action program has engendered a hostile reaction in many quarters Originating in presidential executive orders and civil rights legislation the program is intended to combat institutional race and sex discrimination by encouraging public and private organizations to go beyond the mere cessation of formal discriminatory practices to enact their own programs to end unfair practices In contrast to the passive nondiscrimination of equal opportunity affirmative action means that employers must act positively affirmatively and aggressively to remove all barriers however informal or subtle that prevent minorities and women from having equal access to all levels of the nation s educational industrial and government institutions Is affirmative action in fact geared to equal opportunity Or has it resulted in greater inequality for white males The authors of this book empirically examine employment in government industry and higher education and enrollment in colleges and universities to determine the current status of women and minorities as employees and students They also describe the machinery of affirmative action its budget and staff problems the compliance and enforcement processes and the results of the program Their final chapter includes a theoretical explanation for the very apparent resistance to affirmative action and expresses their pessimism about the program s ability to accomplish its goals especially in light of recent efforts to weaken its already limited power They close with a discussion of the future of affirmative action and the likelihood of achieving equal opportunity in employment

Solidarity Economics Chris Benner, Manuel Pastor, 2021-09-03

Traditional economics is built on the assumption of self interested individuals seeking to maximize personal gain but that is far from the whole story Sharing caring and a desire to uphold the collective good are also powerful motives In a world wracked by inequality social divisions and ecological destruction can we build an alternative economics based on cooperation In this book Chris Benner and Manuel Pastor invite us to imagine a new sort of solidarity economics an approach grounded in our instincts for connection and community and in so doing actually build a more robust and sustainable economy They argue that our current economy is already deeply dependent on mutuality but that the inequality and fragmentation created by the status quo undermine this mutuality and with it our economic well being They outline the theoretical framing policy agenda and social movements that we need to revive solidarity and apply it to whole societies Solidarity Economics is an essential read for anyone who longs for a fairer economy that can generate prosperity and preserve the planet

Power and Resistance, 7th ed. Jessica

Antony, Wayne Antony, 2022-06-30T00:00:00Z Power and Resistance debunks the dominant neoliberal hyper individualist approach to society's problems that sees poverty as a result of laziness environmental crises as a result of market demands for products that pollute and Indigenous Peoples struggles as a result of not assimilating We argue that it is social inequality and oppression that are the underlying causes of social problems In a society like ours powerful groups make choices that benefit them and force those choices onto others creating life problems for others and society as a whole The powerful also

have influence over what is and is not called a social problem Solving social problems requires changing the structures of inequality and oppression For example industrial corporate agriculture has created huge profits for a few gigantic food corporations but left much of the world hungry But farmers and their allies are pushing back through agroecology an agriculture based on local small scale ecologically sustainable farming that brings eaters and growers closer to one another The seventh edition of Power and Resistance includes new chapters on anti Black racism in schools Indigenous people and mental health food security and sovereignty and work in the gig economy **Racism and Inequality.
