Racism Modernity And Identity On The Western Front:

Racism, Modernity and Identity Ali Rattansi, Sallie Westwood, 1994 The West has a unique civilization a powerful front of modernity liberty democracy and affluence This volume offers critical perspectives from both inside and outside the cultural and intellectual frontiers of the Western project The primary focus is on analyzing racism and changing ethnicities in Europe and the US in the context of new forms of global dislocation economic recession the resurgence of neo Fascism and a widespread sense of the crisis of Western modernity The chapters assess the value of Marxist perspectives and newer approaches that take modernity and postmodernity as frameworks for analysis They also explore how European identities have been continually reconstructed by a cultural repression of the non Western whether through colonial discourses the denial of Asian Islamic Judaic and African influences or the effects of Eurocentric conceptions of subjectivity in the psychiatric disciplining of ethnic minorities

Constructing Europe's Identity Lars-Erik Cederman, 2001 The authors assess not only the benefits but also the costs of attempts to assert a European identity Referring to debates about the respective merits of deepening and widening they address the equally important associated tradeoffs between exclusion and dilution they point to the risks on the one hand of a Europe that excludes foreign goods immigrants and entire countries and on the other of an unfocused definition of Europe that may dilute the very values that a European identity is intended to protect

Bauman and contemporary sociology Ali Rattansi, 2017-08-01 This is the first single authored critical engagement with the major works of Zygmunt Bauman Where previous books on Bauman have been exegetical here an unwavering light is shone on key themes in the sociologist's work exposing serious weaknesses in Bauman's interpretations of the Holocaust Western modernity consumerism globalisation and the nature of sociology The book shows how Eurocentrism the neglect of issues of gender and a lack of awareness of the racism faced by Europe's non white ethnic minorities seriously limit Bauman's analyses of Western societies At the same time it points to Bauman's repeated insistence on the need for sociologists to take a moral stance in favour of the world's poor and downtrodden as being his most valuable legacy The book will be of great interest to sociologists Its readability will be valued by undergraduates and postgraduates and it will attract a readership well beyond the discipline

Racism, Gender Identities and Young Children Paul Connolly, 2002-01-04 This book offers a

fascinating yet disturbing account of the significance of racism in the lives of five and six year old children drawing upon data from an in depth study of an inner city multi ethnic primary school and its surrounding community It represents one of the only detailed studies to give primacy to the voices of the young children themselves giving them the space to articulate their own experiences and concerns Together with detailed observation of the children in the school and local community it provides an important account of how and why they draw upon discourses on race in the development of their gender identities The book graphically highlights the understanding that these children have of issues of race gender and sexuality and the active role they play in using and reworking this knowledge to make sense of their experiences **Global Feminist**

Politics Suki Ali, Kelly Coate, Wangüi wa Goro, 2000 Featuring an international panel of cutting edge feminist thinkers Global Feminist Politics examines the changing context for feminist political action its meaning and forms **Sociology After**

Postmodernism David Owen, 1997-03-25 Postmodernism is frequently described as dealing a death blow to sociology This book however argues that it is a mistake to conceive postmodernism in terms of a fatal attack upon what sociologists do The contributors locate the identity of sociology after postmodernism as a contested site which opens up the possibility of re imagining the enterprise of sociology They show how this re imagination might be conducted and trace some of the key potential consequences **Ethnonational Identities**

S. Fenton, S. May, 2002-10-01 The prominence of ethnonational identities and movements is of increasing interest and concern in today's world But the nature and importance of these identities remain ill understood Ethnonational Identities breaks significant new ground by exploring the complex dimensions of ethnonational identity claims their political mobilisation and a wide variety of comparative contexts in which they are found Including case studies from the Qu b cois to the M ori and from Kashmiri nationalism to interethnic competition in the Caribbean it should be read by all those with an interest or involvement in the fields of ethnicity nationalism and identity politics **Citizenship and Collective Identity in Europe**

Ireneusz Pawel Karolewski, 2009-12-04 This book is the first monograph to systematically explore the relationship between citizenship and collective identity in the European Union integrating two fields of research citizenship and collective identity Karolewski argues that various types of citizenship correlate with differing collective identities and demonstrates the link between citizenship and collective identity He constructs three generic models of citizenship including the republican the liberal and the caesarean citizenship to which he ascribes types of collective identity Using a multidisciplinary approach the book integrates concepts theories and empirical findings from sociology in the field of citizenship research social psychology in the field of collective identity legal studies in the chapter on the European Charter of Fundamental Rights security studies in the chapter on the politics of insecurity and philosophy in the chapter on pathologies of deliberation to examine the current trends of European citizenship and European identity politics This book will be of interest to students and scholars of European politics political theory political philosophy sociology and social psychology Political Languages of Race and the Politics of Exclusion Andy R. Brown, 2018-08-16 First

published in 1999 *Political Languages of Race and the Politics of Exclusion* examines the post race signification logic of languages used to promote and achieve the exclusion and stigmatisation of migrant groups within post war Britain Re-examining the time of Smethwick and Powellism as well as extensive Parliamentary debates this book develops an original thesis to show how Backbench racism became legitimated as Frontbench commonsense The book argues that the achievement of the success of post war Parliamentary racism has been made possible by the development of a ubiquitously anecdotal narrative of the travails of the Forgotten Englishman awoken to a multi cultural nightmare in Britain's decaying inner cities While the concept of race has remained under erasure the logic of post race signification discourse has allowed the re-making of racism in public Britain

More Than Black G. Reginald Daniel, 2010-06-25 In the United States anyone with even a trace of African American ancestry has been considered black Even as the twenty first century opens a racial hierarchy still prevents people of color including individuals of mixed race from enjoying the same privileges as Euro Americans In this book G Reginald Daniel argues that we are at a crossroads with members of a new multiracial movement pointing the way toward equality Tracing the centuries long evolution of Eurocentrism a concept geared to protecting white racial purity and social privilege Daniel shows how race has been constructed and regulated in the United States The so called one drop rule i.e. hypodescent obligated individuals to identify as black or white in effect erasing mixed race individuals from the social landscape For most of our history many mixed race individuals of African American descent have attempted to acquire the socioeconomic benefits of being white by forming separate enclaves or passing By the 1990s however interracial marriages became increasingly common and multiracial individuals became increasingly political demanding institutional changes that would recognize the reality of multiple racial backgrounds and challenging white racial privilege *More Than Black* regards the crumbling of the old racial order as an opportunity for substantially more than an improvement in U.S. race relations it offers no less than a radical transformation of the nation's racial consciousness and the practice of democracy

Israeli Identity, Thick Recognition and Conflict Transformation L. Strombom, 2013-11-05 The divisive and malleable nature of history is at its most palpable in situations of intractable conflict between nations or peoples This book explores the significance of history in informing the relationship between warring parties through the concept of thick recognition and by exploring its relevance specifically in relation to Israel **Understanding Social Divisions** Shaun Best, 2005-02-02 The study of social divisions has dominated research within the social sciences since the nineteenth century Early stratification categories of class race and gender have in more recent years been joined by issues such as sexuality and disability **Understanding Social Divisions** addresses the full range of social divisions in one volume while also considering the nature of social division in itself in a comprehensive and accessible overview Shaun Best outlines and evaluates theories and research from a long historical period looks at how social divisions influence the formation of identity and the other discusses the mechanisms that are drawn upon to maintain social divisions considers how solidarity is maintained given that most people in society may feel in some way divided from the rest of society and explores how individuals place themselves within the social divisions of class gender sex and sexuality race and ethnic diversity disability and mental illness The concluding chapter explores the role of the State in the processes of social division in areas such as asylum citizenship childhood old age disease and policing of terrorism This book is essential reading for students of social divisions from a wide variety of social science backgrounds **History After the Three Worlds** Arif Dirlik, Vinay Bahl, Peter Gran, 2000 History as a discipline faces a

crisis of identity as Eurocentrism fades in a world where globalized visions compete to explain historical processes Facing the challenge squarely this volume comprising specialists on Asia Africa and Latin America explores the state of historical analysis in various world regions and appraises current views on what defines and challenges historical knowledge It is widely accepted that Eurocentrism no longer seem acceptable in a world where others are reasserting their own notions of past and future The postDWorld War II spatialities that guided both historical analysis and the division of labor in historical work are in the process of disappearing into more globalized visions Constituencies left out of history in the past are making demands for the recognition of their historical presence History as epistemology is under attack as a marker of Eurocentric modernity from non historical ways of thinking as well as from ideologies of postmodernism that deny to history its claims to truth Indeed the current situation in the field has been described by one distinguished historian as a Ocacophonous confusion O The challenge historians face is how to imagine new ways of writing history that overcome this confusion without falling back upon ideological and methodological prejudices that reproduce the problems of the past in new guises The contributors discuss how these challenges are voiced and met in their different areas of specialization Unsurprising in a volume that addresses a variety of regions and issues that are not only technically historiographical but also deeply cultural and political the authors differ in their appraisal of the challenges presented by globalization postmodernism or postcolonialism Yet they are united in their recognition of the validity of historical ways of knowing and their reaffirmation of the importance of history in grasping contemporary cultural and political problems It is because history is entangled in a Eurocentric modernity that in a postmodern world it provides the medium for articulating alternatives to Eurocentrism and to history itself
