Kate Fitch, Judy Motion, 2020-10-29 Popular Culture and Social Change The Hidden Work of Public Relations argues the complicated and contradictory relationship between public relations popular culture and social change is a neglected theoretical project Its diverse chapters identify ways in which public relations influences the production of popular culture and how alternative often community driven conceptualisations of public relations work can be harnessed for social change and in pursuit of social justice This book opens up critical scholarship on public relations in that it moves beyond corporate understandings and perspectives to explore alternative and eclectic communicative cultures in part to consider a more optimistic conceptualisation of public relations as a resource for progressive social change Fitch and Motion began with an interest in identifying the ways in which public relations both draws on and influences the production of popular culture by creating promoting and amplifying particular narratives and images The chapters in this book consider how public relations creates popular cultures that are deeply compromised and commercialised but at the same time can be harnessed to advocate for social change in supporting reproducing challenging or resisting the status quo Drawing on critical and sociocultural perspectives this book is an important resource for researchers educators and students exploring public

relations theory strategic communication and promotional culture It investigates the entanglement of public relations popular culture and social change in different social cultural and political contexts from fashion and fortune telling to race activism and aesthetic labour in order to better understand the often subterranean societal influence of public relations activity

*Revolutionary Change and Democratic Religion* Celucien L. Joseph, 2020-04-15 In *Revolutionary Change and Democratic Religion* Celucien Joseph provides a fresh and careful reexamination of Haiti s intellectual history by focusing on the ideas and writings of five prominent thinkers and public intellectuals Toussaint Louverture Joseph Antenor Firmin Jacques Roumain Dantes Bellegarde and Jean Price Mars The book articulates a twofold argument First of all Haiti has produced a strong intellectual tradition from the revolutionary era to the postcolonial present and that Haitian thought is not homogeneous and monolithic Joseph puts forth the idea that the general interweaving themes of rhetoric the race concept race vindication universal emancipation religious pluralism secular humanism the particular and the universal and cosmopolitanism are representative of Haiti s intellectual tradition Secondly the book also contends that Haitian intellectuals have produced a religious discourse in the twentieth century that could be phrased religious metissage The religious ideas of these thinkers have been shaped by various forces ideologies religious traditions and philosophical schools In the same way the religious experience of the Haitian people should be understood in terms of conflicting heterodox and pluralistic manifestations of religious piety as the people in Haiti reacted to the crisis of slavery Western colonialism and imperialism and the arrogance of race in modernity in their striving to reposition themselves within the framework of universal and human metanarratives The book departs from the dominant contemporary Vodou scholarship that is often characteristic of North American and Western studies on the religious life of the Haitian people and Haitian thinkers

**Institutional Racism in Psychiatry and Clinical Psychology** Suman Fernando, 2017-09-08 This book examines the deep roots of racism in the mental health system Suman Fernando weaves the histories of racial discourse and clinical practice into a narrative of power knowledge and black suffering in an ostensibly progressive and scientifically grounded system Drawing on a lifetime of experience as a practicing psychiatrist he examines how the system has shifted in response to new forms of racism which have emerged since the 1960s highlighting the widespread pathologization of black people the impact of Islamophobia on clinical practice after 9 11 and various struggles to reform Engaging and accessible this book makes a compelling case for the entrenchment of racism across all aspects of psychiatry and clinical psychology

and calls for a paradigm shift in both theory and practice      *Migration, Racism and Labor Exploitation in the World-System* Denis O'Hearn, Paul Ciccantell, 2021-07-29 This book offers a historically sweeping yet detailed view of world systemic migration as a racialized process Since the early expansion of the world system the movement of people has been its central process Not only have managers of capital moved to direct profitable expansion they have also forced cajoled or encouraged workers to move in order to extract grow refine manufacture and transport materials and commodities The book offers historical cases that show that migration introduces and deepens racial dominance in all zones of the world system This often forces indigenous and imported slaves or bonded labor to extract process and move raw materials Yet it also often creates a contradiction between capital's need to direct labor to where it enables profitability and the desires of large sections of dominant populations to keep subordinate people of color marginalized and separate Case studies reveal how core states are concurrently users and blockers of migrant labor Key examples are Mexican migrants in the United States both historically and in contemporary society The United States even promotes of an image of a society that welcomes the immigrant while policy realities often quite different Nonetheless the volume ends with a vision of a future whereby communities from below both activists and people simply following their communal interests can come together to create a society that overcomes racism Its final chapter is a hopeful call by Immanuel Wallerstein for people to make small changes that together can bring real about real revolutionary change      *Experiences of Islamophobia* James Carr, 2015-09-07 Since 9 11 interest in

Islamophobia has steadily increased as has the number of academic publications discussing the phenomenon However theoretical expositions have dominated the field Lived experiences of Islamophobia by contrast have received little attention In recognition of the importance of addressing this imbalance this book provides theoretically informed analyses alongside everyday testimonies of anti Muslim racism set comparatively in an international context Carr argues that the failure of the neoliberal state to collect data on anti Muslim racism highlights the perpetuation of race blindness within governance Not only does this mean that the salience of racism is denied in the lives of those who experience it but this also enables the state to absolve itself from challenging the issue and providing the necessary supports to Muslim communities Offering original empirical research and theoretical engagement with the concept of race blind neoliberal governance this book will appeal to students and scholars across the social sciences in addition to policymakers and activists working in this topical area

policies Systemic Racism in America Sociological Theory Education Inequality and Social Change situates our contemporary moment within a historical framework and works to identify forms occurrences and consequences of racism as well as argue for concrete solutions to address it This volume assembles renowned and thought provoking social scientists to address the destructive impacts of structural racism and the recent incendiary incidents that have driven racial injustice and racial inequality to the fore of public discussion and debate The book is organized into three parts to explore and explain the ways in which racism persists permeates and operates within our society The first part presents theoretical perspectives to analyze the roots and manifestation of contemporary racism the second concentrates on educational inequality and structural issues within our institutions of learning that have led to stark racial disparities and the third and final section focuses on solutions to our current state and how people regardless of their race can advocate for racial equity Urgent and needed Systemic Racism in America is valuable reading for students and scholars in the social sciences as well as informed readers with an interest in racism and racial inequality and a passion to end it

### **Racism and social change in the Republic of Ireland**

**Social Work and the Grand Challenge to Eliminate Racism** Martell L. Teasley,Michael S. Spencer,Melissa Bartholomew,2023 In the current era the ongoing challenge of race and ethnic relations and growing white supremacy reminds us that the centrality of racism needs considerable attention and has us profoundly questioning the structure and functioning of institutional practices In Social Work and the Grand Challenge of Ending Racism the authors argue that racism has been somewhat short shifted as an avenue of inquiry to help explain social problems and social welfare outcomes within the social work profession and within the greater society This book promotes innovative ways of preventing or interrupting racism and to stress the development and proliferation of antiracism practices as a method of reducing racialized outcomes in society

**Climate Change isn't Everything** Mike Hulme,2023-06-13 The changing climate poses serious dangers to human and non human life alike though perhaps the most urgent danger is one we hear very little about the rise of climatism Too many social political and ecological problems facing the world today from the Russian invasion of Ukraine to the management of wildfires quickly become climatized explained with reference to a change in the climate When complex political and ethical challenges are so narrowly

framed arresting climate change is sold as the supreme political challenge of our time and everything else becomes subservient to this one goal In this far sighted analysis Mike Hulme reveals how climatism has taken hold in recent years becoming so pervasive and embedded in public life that it is increasingly hard to resist it without being written off as a climate denier He confronts this dangerously myopic view that reduces the condition of the world to the fate of global temperature or the atmospheric concentration of carbon dioxide to the detriment of tackling serious issues as varied as poverty liberty biodiversity loss inequality and international diplomacy We must not live as though climate alone determines our present and our future

**Racism without Racists** Eduardo Bonilla-Silva, 2021-12-09 Eduardo Bonilla Silva's acclaimed *Racism without Racists* examines in detail how Whites talk think and account for the existence of racial inequality and makes clear that color blind racism is as insidious now as ever The sixth edition of this provocative book includes new material on systemic racism and how color blind racism framed many issues during the COVID 19 pandemic A revised conclusion addresses what readers can do to confront racism both personally and on a larger structural level New to this edition New Chapter 2 What is Systemic Racism Coming to Terms with How Racism Shapes All Whites and Non Whites explains how all members of society participate in structural racism New Chapter 10 Color Blind Racism in Pandemic Times provides coverage of racial disparities in mortality the role of essential workers and hunger during the pandemic particularly how public discourse did not reflect how these problems are worse for communities of color Updated discussion of police surveillance and violence reflects the current salience of police brutality in the U S and enhances the conversation on suave racial discrimination Chapter 3 Addresses the question What is to be done and offers White people ideas on what they can do to change themselves Chapter 11

**Handbook of Psychology and Law** Dorothy K. Kagehiro, William S. Laufer, 2013-06-29 Shari Seidman Diamond Scholars interested in psychology and law are fond of claiming origins for psycholegal research that date back four score and three years ago to Hugo von Munsterberg's *On the Witness Stand* published in 1908 These early roots can mislead the casual observer about the history of psychology and law Vigorous and sustained research in the field is a recent phenomenon It is only 15 years since the first review of psychology and law appeared in the *Annual Review of Psychology* Tapp 1976 The following year saw the first issue of *Law and Human Behavior* the official publication of the American Psychology Law Society and now the journal of the American Psychological Association's Division of Psychology and Law Few psychology departments offered even a single course in psychology and law before 1973 while by 1982 14 of psychology graduate programs had at least one course and a number had begun to offer forensic minors and or joint J D Ph D programs Freeman Roesch see Chapter 28 Yet this short period of less than 20 years has seen a dramatic level of activity Its strengths and weaknesses excitements and disappointments are all captured in the collection of chapters published in this first *Handbook of Psychology and Law* In describing what we have learned about psychology and law the works included here also reveal the questions we have yet to answer and thus offer a blueprint for activities in the next 20 years

**Racists**

**Beware** George J. Sefa Dei, 2008-01-01 With admirable clarity and directness George Dei exposes the tendency towards the racial re feudalization of the contemporary public sphere in Canada and by association other post industrial societies He points to the enormous opportunity costs imposed on racial minorities in the new millennium as a consequence In **RACISTS BEWARE UNCOVERING RACIAL POLITICS IN THE POSTMODERN SOCIETY** Dei identifies and subjects to close scrutiny the new race bending logics of what he calls postmodern societies in which the dwellers of the suburbs and members of the itinerant white professional middle class the great beneficiaries of late capitalism and neoliberalization of the economy now have become the new social plaintiff turning the complaint of racial inequality and discrimination on the heads of those most oppressed If Gayatri Spivak asks Can the subaltern speak then Dei brilliantly poses the question When will Anglo dominant groups even critical ones ever listen This book is likely to provoke and influence discussion on racial antagonism for a long long time to come

**Our Racist Heart?** Geoffrey Beattie, 2013-05-07 Few people today would admit to being a racist or to making assumptions about individuals based on their skin colour or on their gender or social class In this book leading psychologist Geoffrey Beattie asks if prejudice more subtle than before is still a major part of our everyday lives Beattie suggests that implicit biases based around race are not just found in small sections of our society but that they also exist in the psyches of even the most liberal educated and fair minded of us More importantly the book outlines how these hidden attitudes and prejudices can be revealed and measured and how they in turn predict behaviours in a number of important social situations Our Racist Heart takes a fresh look at our racial attitudes using new technology and experimental approaches to show how unconscious biases influence our everyday actions and thinking These groundbreaking

results are brought to life using the author's own experiences of class and religious prejudice in Northern Ireland and are also discussed in relation to the history of race racism and social psychological theory
