Eliminating the Achievement Gap William Jeynes,2019-10-04 The purpose of the Eliminating the Achievement Gapis to provide a resource for scholars and students into many of the most salient issues trends and factors that are most effective in reducing the achievement gap Eliminating the Achievement Gap is particularly unique because it will 1 utilize a meta analysis to determine what factors contribute the most to reducing the achievement gap and 2 examine potential achievement gap reducing variables from across disciplines These disciplines include education

sociology economics family science psychology public policy and educational psychology The second emphasis is largely based on the meta analysis because the results of the meta analysis indicate that the best way to completely eliminate the achievement gap is to initiate a multidisciplinary approach to the achievement gap It is the intention of this book to make scholars educators policymakers parents and the general public more aware of the factors that best bridge the achievement gap so that they can take major steps to implementing comprehensive and multidisciplinary efforts The more such efforts are inaugurated the more the achievement gap will be reduced The nine chapters of this book are therefore divided into four parts to reflect this extent of this comprehensive approach

The Conscience of Capitalism Terry L. Besser, 2002-11-30 The common wisdom that business contributions to the common good are counterproductive in the new competitive global marketplace does not hold up to empirical research In fact doing good is good for business and a majority of businesses do provide some form of community support which Besser discovered in her exhaustive survey of the Iowa business community Business owners and managers often act out of a sense of community spirit and a certain obligation to better the common good While the increasingly globalized economy has encouraged a number of large corporations to become freewheelers the vast majority of companies are firmly rooted in place and look at their locales with more than just a utilitarian eye Extensive interviews with Iowa business owners managers and business and community leaders are combined with findings from prior studies of corporate citizenship and the evidence clearly indicates that the majority of businesses provide some form of community support Most owners feel they should do more than just make a profit so they often seek ways to give back to their communities a move that is usually nurtured within the business community itself However corporate altruism carries risks Many business owners have unwittingly offended customers and clients by their acts of civic spirit Besser concludes her book by addressing the potential threats to business social responsibility posed by globalization and recommends steps to enhance socially responsible capitalism Anybody interested in the complex interaction of businesses and the communities they reside in will enjoy reading this positive revisitation of the mutually supportive relationship between trade and polity
