## **Love Canal Science Politics And People:**

**Love Canal** Adeline Levine,1982      *Love Canal* Richard S. Newman,2016-04-12 A history of the Love Canal region from the nation's founding and the utopian city planned for the Niagara area to the building of the region's chemistry industry to the environmental disaster at Love Canal and its aftermath      Hazardous Waste Management Michalann Harthill,2020-02-26 First published in 1994 as part of the AAAS Selected Symposia Series National strategies to minimize pollution including that from hazardous waste are evolving in both the United States and Canada Recent federal hazardous waste regulations in the United States promulgated under the authority of the Resource Conservation and Recovery Act of 1976 RCRA encourage the states to develop their own waste management programs patterned after federal specifications some states have developed progressive options Canadian hazardous waste management programs originate in the provinces However the federal government is increasingly involved in developing new treatment technologies guidelines for consistent management and control of waste across political boundaries The authors of this volume find that disposal is still the most common practice for handling hazardous waste in both countries despite the potential for alternative methods such as industrial process redesign for waste reduction waste detoxification recycling or incineration Nonetheless some waste will remain Sound disposal site selection criteria are prerequisite for industry and government credibility in site selection Only after accountability is established and recognized will the public lose symptoms of the NIMBY not in my backyard syndrome Even so public involvement in site selection in these countries should be expected for a site to be accepted All the while the three parties industry government and the public must balance the risk of potential waste hazards with the cost of avoiding adverse effects      **Histories of the Dustheap** Stephanie Foote,Elizabeth Mazzolini,2012-10-05 An examination of how garbage reveals the relationships between the global and the local the economic and the ecological and the historical and the contemporary Garbage considered both materially and culturally elicits mixed responses Our responsibility toward the objects we love and then discard is entangled with our responsibility toward the systems that make those objects Histories of the Dustheap uses garbage waste and refuse to investigate the relationships between various systems the local and the global the economic and the ecological the historical and the contemporary and shows how this most democratic reality produces identities social relations and policies The contributors first consider garbage in subjective terms examining toxic autobiography by residents of Love Canal the intersection of public health and women's rights and enviroblogging They explore the importance of place with studies of post Katrina soil contamination in New Orleans e waste disposal in Bloomington Indiana and garbage on Mount Everest And finally they look at cultural contradictions as objects hover between waste and desirability examining Milwaukee's efforts to sell its sludge as fertilizer the plastics industry's attempt to wrap plastic bottles and bags in the mantle of freedom of choice and the idea of obsolescence in the animated film The Brave Little Toaster Histories of the Dustheap offers a range of perspectives on a variety of incarnations of garbage inviting the reader to

consider garbage in a way that goes beyond the common buy green discourse that empowers individuals while limiting environmental activism to consumerist practices      Embodiment of a Nation Cecelia Tichi, Cecelia Tichi, 2009-06-30 From Harriet Beecher Stowe's image of the Mississippi's bosom to Henry David Thoreau's Cape Cod as the bared and bended arm of Massachusetts the American environment has been represented in terms of the human body Exploring such instances of embodiment Cecelia Tichi exposes the historically varied and often contrary geomorphic expression of a national paradigm

**This Borrowed Earth** Robert Emmet Hernan, 2010-02-02 Over the last century mankind has irrevocably damaged the environment through the unscrupulous greed of big business and our own willful ignorance Here are the strikingly poignant accounts of disasters whose names live in infamy Chernobyl Bhopal Exxon Valdez Three Mile Island Love Canal Minamata and others And with these the extraordinary and inspirational stories of the countless men and women who fought bravely to protect the communities and environments at risk      The Social and Cultural Construction of Risk B.B. Johnson, V.T.

Covello, 2012-12-06 The Social and Cultural Construction of Risk Issues Methods and Case Studies Vincent T Covello and Branden B Johnson Risks to health safety and the environment abound in the world and people cope as best they can But before action can be taken to control reduce or eliminate these risks decisions must be made about which risks are important and which risks can safely be ignored The challenge for decision makers is that consensus on these matters is often lacking Risks believed by some individuals and groups to be tolerable or acceptable such as the risks of nuclear power or industrial pollutants are intolerable and unacceptable to others This book addresses this issue by exploring how particular technological risks come to be selected for societal attention and action Each section of the volume examines from a different perspective how individuals groups communities and societies decide what is risky how risky it is and what should be done The writing of this book was inspired by another book Risk and Culture An Essay on the Selection of Technological and Environmental Dangers Published in 1982 and written by two distinguished scholars Mary Douglas a British social anthropologist and Aaron Wildavsky an American political scientist the book received wide critical attention and offered several provocative ideas on the nature of risk selection perception and acceptance      *Toxic burn [electronic resource]*

Thomas C. Shevory, 2007      Acceptable Risk? Lee Clarke, 1989 Organizations and modern technology give us much of what we value but they have also given us Chernobyl Three Mile Island and Bhopal The question at the heart of this paradox is What is acceptable risk Based on his examination of the 1981 contamination of an office building in Binghamton New York Lee Clarke's compelling study argues that organizational processes are the key to understanding how some risks rather than others are defined as acceptable He finds a pattern of decision making based on relationships among organizations rather than the authority of individuals or single agencies      **Crazy for Democracy** Temma Kaplan, 2016-01-08 Crazy for

Democracy vividly shows through the lives of six women in the United States and South Africa just what can be and is being accomplished to change our lives At a time when we're depressed about democracy pessimistic about race relations and

anxious about feminism Crazy for Democracy vividly shows through the lives of six women in the United States and South Africa just what can be and is being accomplished to change our lives In building real social movements to achieve a safe environment win human rights and safeguard their homes these grassroots feminist leaders have been creating democratic institutions to achieve social justice for us all Government and Environmental Politics Michael J. Lacey,1989 Government and Environmental Politics details the emergence of the new social values that gave rise to the environmental movement and examines the federal government's response to the changing ideas and needs of the American people Chapters describe such topics as postwar environmental politics the environmental lobbies development of the publicly owned national park and recreation system federal protection of endangered species official promotion of nuclear energy and regulation of toxic substances The contributors are Malcolm Forbes Baldwin Thomas R Dunlap Frank Gregg Samuel P Hays Michael J Lacey Robert Cameron Mitchell Joseph L Sax Christopher Schroeder and Michael Smith Book jacket *Love Canal Revisited : Race, Class, and Gender in Environmental Activism* Elizabeth D. Uncertain Hazards Sylvia Noble Tesh, 2018-05-31 Ordinary citizens frequently organize around environmental issues on which little scientific evidence exists to back activists' claims Should we then dismiss such claims as spurious Or should we side with citizens against the polluters Uncertain Hazards takes neither path In exploring the all too common problem of scientific uncertainty about links between pollution and public health Sylvia Noble Tesh shows that much of the problem can be traced to the newness of the environmental movement The inability of scientists to find data corroborating citizens' claims stems partly from the pre-environmentalist assumptions still influencing the environmental health sciences Tesh says On the other hand the conviction of activists that industrial pollutants threaten their health results from the environmental

movement's success in promoting new ideas about nature Tesh points to ways that environmentalist ideas have begun to affect science thus making more likely the discovery of links between exposure to industrial pollutants and a community's health problems Those ways include the expansion of diseases construed as environmental in cause the study of society's most vulnerable citizens in determining safe levels of pollution and a new focus on the effects of exposure to chemical mixtures Using community activists' own words and experiences Tesh argues against the familiar charge that activists are naive about science It is inaccurate she says to characterize debates over the hazardous nature of pollution as debates between laypeople and experts Instead they are debates between two groups of experts It is also inaccurate however to see the conflict over environmental pollution only in scientific terms The conflict has culturally important moral dimensions and community activists draw heavily although often unconsciously on the lessons taught by environmentalism
