Love Music The Glorious History Of:

History of Frederick the Great Thomas Carlyle,1898 **A Complete History of Music for Schools, Clubs, and Private Readings** Winton James Baltzell,2020-09-28 When we think of Music we have in mind an organization of musical sounds into something definite something by design not by chance the product of the working of the human mind with musical sounds and their effects upon the human sensibilities So long as man accepted the various phenomena of musical sounds as isolated facts there could be no art But when he began to use them to minister to his pleasure and to study them and their effects he began to form an art of music The story of music is the record of a series of attempts on the part of man to make artistic use of the material which the ear accepts as capable of affording pleasure and as useful in expressing the innermost feelings The raw material of music consists of the sounds considered musical the human voice various musical instruments and the use of this material in such ways as to affect the human sensibilities that is to make an impression upon the hearer which shall coincide with that of the original maker of the music who gives to his feelings expression in music We find in music as in other branches that man tries to reduce phenomena to order and to definite form The mass of musical material is vague incoherent disorganized Man seeks to devise ways to use it intelligibly and to promote esthetic pleasure If musical sounds are to be combined simultaneously or successively this combination should be in accordance with design not haphazard just as the builder of the house or the temple puts together his material according to a regular plan Those who have been leaders in the Art of Music have labored in two ways to extend the limits of expression in music and to find the means to contain that expression At one period stress is laid on making music expressive at another on the medium for conveying expression to others the latter being comprehended in the term Form In connection with this statement the student will do well to remember that every period of great intellectual activity social or political reacted upon music and the other arts to illustrate we need but refer to the formal even artificial character of the music of the period preceding the French Revolution and the freedom and vigor imparted by the spirit of Romanticism which followed in the wake of that great political movement a difference strikingly illustrated in the music of Haydn and Beethoven Clementi and Schumann There is also a constant action and reaction of the various racial streams of power such as the Aryan on the Semitic East upon the West Latin upon the Teuton Folk music upon the Scholastic **Dancing in the Dark: A Cultural History of the Great**

Depression Morris Dickstein,2010-09-06 From Agee to Astaire Steinbeck to Ellington the creative energies of the Depression against a backdrop of poverty and economic disaster In this timely and long awaited cultural history of the 1930s Morris Dickstein whom Norman Mailer called one of our best and most distinguished critics of American literature explores the anxiety and hope the despair and surprising optimism of distressed Americans at a time of dire economic dislocation Bringing together a staggering range of materials from epic Dust Bowl migrations and sharecropper photographs to zany screwball comedies wildly popular swing bands and streamlined Deco designs this eloquent work highlights the pivotal role

of culture and government intervention in hard times Exploding the myth that Depression culture was merely escapist it concentrates instead on the dynamic energy and insight the arts could provide and the enormous lift they gave to the nation's morale Dancing in the Dark shows how our worst economic crisis as it eroded American individualism and punctured the American dream produced some of the greatest writing photography and mass entertainment ever seen in this country A
