M I Carbine:

The M1 Carbine Leroy Thompson,2011-11-20 In 1938 the US Chief of Infantry requested that the Ordnance Department develop a carbine to be used by service and support troops artillerymen machine gun crews tankers mortar crews and other troops not needing the power of the M1 Garand rifle The development of this new weapon was given an added impetus by Germany s successful use of airborne and glider troops early on in World War II This caused a fear amongst US officers that troops normally considered behind the lines personnel might have to fight elite German troops and would therefore require a more effective weapon than their standard pistols The resulting M1 Carbine was a not a shortened version of the standard service rifle but instead a brand new design chambering a new cartridge Eventually numerous manufacturers would combine to produce over six million M1 Carbines before the end of the war This book charts the complete story of the weapon from its design to its operational history and its impact upon warfare

The M1 Carbine Roger Out,2021-07-28 The M1 carbine is a 30 caliber semiautomatic rifle that first appeared in 1942 as a standard firearm for the US military during World War II It was later used by US forces in the Korean and Vietnam Wars and continues to see worldwide use to this day Produced in several variants by many manufacturers it was and is still widely used not only by military forces but by paramilitary and police units worldwide Its design construction and variants including the M1A1 M2 and M3 are shown in superb period photography and clear up close color images Accessories such as magazines ammunition belts pouches and cleaning kits are featured throughout the book as well as rarely seen World War II related uniform and equipment items
