NATO's strategic thinking on deterrence and escalation. He discusses the relation between arms control considerations and the strategic defense initiative focusing on NATO fears that SDI would lead to the abrogation of the 1972 ABM Treaty and with it the end of the arms control process. Turning to antitactical missile defense, Soifer argues that despite political opposition there exists a substantial strategic rationale for missile defenses deployed in Western Europe. Offering clarification and new perspectives on many complex defense issues, *Missile Defenses and Western European Security* will be an important contribution to the current debate on how new weapons initiatives will affect prospects for world peace. This timely book is for specialists, students and academics in the fields of strategic studies, peace studies, arms control, diplomacy and international relations.

*Soviet Ballistic Missile Defense and the Western Alliance* David Scott Yost, 1988. Yost suggests that the challenges for Western policy posed by Soviet ballistic missile defense (BMD) programs stem partly from Soviet military programs, Soviet arms control policies and Soviet public diplomacy campaigns and partly from the West's own intra-alliance disagreements and lack of consensus about Western security requirements.

***Sdi And European Security*** Regina Cowen, Peter Rajcsanyi, Vladimir Bilandzic, F. Stephen Larrabee, 2019-09-16. Originally published in 1987, European concerns about strategic defense and its impact on the stability of the East-West strategic balance have been the subject of frequent and lively discussion at the Institute for East-West Security Studies in the more than four years since President Reagan announced his Strategic Defense Initiative (SDI) in March.

***NATO and European Security*** Alexander Moens, Lenard J. Cohen, Allen G. Sens, 2003-03-30. From the end of the Cold War to the terrorist attacks on the United States in September 2001, the NATO Alliance has changed profoundly. This book explores the multifaceted consequences of NATO's adjustment to new international and domestic political and security realities. Internal Alliance politics and matters of relative power within the membership have strongly influenced recent NATO developments. Several major issues challenging the Alliance are examined, including how the impact of efforts to develop an enhanced common European security and defense policy have affected NATO, whether missile defense is driving the United States and its European allies closer or further apart, how the experience of NATO in the Balkans and elsewhere brought alliance members together or made NATO cohesion more difficult to maintain, and in what way the changing role of NATO has influenced American and Canadian participation in the Alliance. An important guidepost to pivotal changes and likely NATO developments, scholars and policymakers of Atlantic and international politics will find these meditations indispensable. A number of authors also speculate on the likely changes for the alliance that will ensue in the wake of the September 11 terrorist attacks and the possibility that NATO will soon modify its mission and responsibilities in reaction to the threat of international terrorism. Indeed, many of the same strategies and strains that affected NATO cohesion over the past decade are likely to complicate efforts to maintain Alliance unity as part of the anti-terrorist coalition.

European Union EU as an international security actor In the two decades since the end of the Cold War the EU has gradually emerged as an autonomous actor in the field of security aiming to safeguard European security by improving global security However the EU s development as a security actor has certainly not remained uncontested either by academics or by policy makers some of whom see the rise of the EU as a threat to their national and or transatlantic policy outlook While the focus of this volume is on the politico military dimension security will also be put into the context of the holistic approach advocated by the EU The book is organised into four key sections Part I The EU as an International Security Actor Part II Institutions Instruments and Means Part III Policies Part IV Partners This Handbook will be essential reading for all students of European Security the EU European Politics security studies and IR in general *Energy Abstracts for Policy Analysis*, 1987

*Shaping South East Europe's Security Community for the Twenty-First Century* S. Cross, S. Kentera, R. Vukadinovic, R.

Nation,2013-05-07 In this book leading academics and policy practitioners develop approaches for managing critical contemporary and emerging security challenges for South East Europe They attempt to conceptualize and realize security as a cooperative endeavour for collective good in contrast to security narratives driven by power and national egotism **The Dynamics of European Security Cooperation, 1945-91** Gülnur Aybet,2016-01-12 This is the first integrated analysis of all aspects of security cooperation in western Europe from 1945 to 1991 It provides an accessible yet sophisticated survey of the wider dynamics of security cooperation in each decade throughout this period It covers all aspects of security cooperation which range from the political such as a European voice in arms control to military such as a European input into NATO strategy and economic involving collaboration in defence technology and production **Air University Library Index to Military Periodicals** ,1998 **European Security in the 1990s** W. Laqueur,L. Sloss,2013-11-11 Rarely if ever have the political economic and military foundations of the Western Alliance been in such a state of flux Walter Laqueur and Leon Sloss therefore deserve credit not just for the quality of the analysis in this superb book but also for the timeliness of its appearance As Laqueur says in his chapter Touring the Western European Defense Horizon if the likely development of European defense policies is not particularly reassuring at least it gives no grounds for despair The list of problems we face is a daunting one First there is the spiralling cost of defense expenditures particularly in the absence of significant NATO or inter European cooperation This is particularly serious in light of the reluctance to increase or even maintain current expenditures in the midst of Mikhail Gorbachev's peace offensive and the extraordinary changes in Eastern Europe both of which have had a dramatic impact on Western public opinion There is also a problem in the perceived relative economic decline of the United States vis a vis Western Europe and Japan which only exacerbates calls to reduce the number of American troops in Europe Other dangers to the political cohesion and military credibility of the alliance include demographic trends that threaten current manpower levels transatlantic acrimony over the burden sharing issue and political pressures particularly in West Germany toward denuclearization and even neutralism **North Atlantic Treaty Organization** Phil Williams,2024-11-01 This volume consists of major books written in the English language on NATO as well as an extensive listing of journal articles that deal with various aspects of the Alliance All the major debates that have taken place over the last forty years are discussed *Strategic Thinking, Deterrence and the US Ballistic Missile Defense Project* Reuben Steff,2016-04-01 A systematic critical survey of American strategic thinking and the strategic culture in which it is formed In particular this book seeks to interrogate the theory and strategy of nuclear deterrence and its relationship to the concept of missile defence Drawing widely on the theoretical literature in international relations and strategic studies it identifies the key groups that have competed over America's nuclear policy post 1945 and examines how the concept of missile defence went through a process of gestation and intellectual contestation leading to its eventual legitimization in the late 1990s Steff sheds light on the individuals groups institutions and processes that led to the decision by the Bush administration to deploy

a national missile defence shield Additionally Steff systematically examines the impact deployment had on the calculations of Russia and China In the process he explains that their reactions under the Bush administration have continued into the Obama era revealing that a new great power security dilemma has broken out This Steff shows has led to a decline in great power relations as a consequence The Common European Security and Defense Policy (ESDP) Edward G. Gunning, 2001 As the United States continues to adjust to its role in the post Cold War world the transatlantic partnership remains fundamental to US security concerns Commander Gunning alpha s paper is a wake up call suggesting that Europe is concerned about US intransigence when it comes the security partnership with Europe While the United States has often encouraged the Europeans to improve capabilities and take on a greater share of the defensive burden their recent efforts to do so have often been viewed as paradoxical to US concerns Policymakers on this side of the Atlantic worry that Europe in some ways is moving towards going it alone with the development of the European Security and Defense Policy ESDP Still US desires for increased burdensharing need to be reconciled with ESDP Commander Gunning highlights these differences and spells out how in his opinion it is possible for the United States to remain engaged in Europe and to allow the European Union to develop its own defense identity The differences of opinion between the two sides are more speed bumps than road blocks and some disagreement and frustration is to be expected The conclusion here is that security interests on both sides of the Atlantic will be served in the long run by encouraging the development of a more autonomous European defense capability and through American patience as that process unfolds Forward
