Missions Psychoheresy:

Missions and Psychoheresy Martin Bobgan, Deidre Bobgan, 2000-05-01 Exposes the mental health professions false facade of expertise for screening missionary candidates and caring for missionaries It explodes the myths that surround the psychological testing used on these hapless men and women It further reveals the prolific practice of using mental health professionals to provide psychological care for missionaries suffering from problems of living Prophets of Psychoheresy: Critiquing Dr. James C. Dobson Martin Bobgan, Deidre Bobgan, 1989 *Spirit Cure* Joseph W. Williams, 2012-12-27 Joseph W Williams offers a compelling examination of the changing healing practices of pentecostals in the United States over the past hundred years from the early believers who rejected mainstream medicine and overtly spiritualized disease to the later generations of pentecostals and their charismatic successors who dramatically altered the healing paradigms they inherited Williams shows that over the course of the twentieth century pentecostal denunciations of the medical profession often gave way to natural healing methods associated with scientific medicine natural substances and even psychology By the early twenty first century figures such as the pentecostal preacher T D Jakes appeared on The Dr Phil Show other healers marketed their books at mainstream retailers such as Wal Mart and some developed lucrative nutritional products that sold online and in health food stores across the nation Exploring the interconnections resonances and continued points of tension between pentecostal adherents and some of their fiercest rivals Spirit Cure chronicles pentecostals embrace of competitors healing practices and illuminates their dramatic transition from a despised minority to major players in the world of American evangelicalism and mainstream American culture **In the Name of Purpose** Tamara Hartzell, 2007-01-23

Voice, 1994 Research in Psychotherapy Robin Fox, 2017-07-12 Research in Psychotherapy is a comprehensive synthesis and assessment of the psychotherapeutic research literature for the use of both researchers and those in clinical practice It is designed as a general reference work an instruction guide and a source of information about specific aspects and problems of research The book consists of three parts Part 1 discusses principles and methods of research as they are applied to psychotherapy It provides general background material and principles to help non researchers appreciate some of the important problems that are encountered In Part 2 existing research on the effects of psychotherapy and the determinants and correlates of outcome are clustered and reviewed Chapters 4 to 7 are concerned strictly with a review and appraisal of controlled studies that were designed to evaluate the effects of psychotherapy Chapters 8 to 13 deal with a large body of research on various factors associated with therapeutic outcome method style and technique variables patient therapist and time variables Part 3 is concerned with research on aspects of the therapeutic process and on the effect of many of these same variables on the therapeutic interchange as distinct from the outcome of therapy Also discussed is research on various therapeutic phenomena and conditions about which so much has been written and so little really known Research in Psychotherapy was written in the conviction that clinical practice should be influenced by research and that

rigorous research that meets acceptable experimental standards can be done on the field of psychotherapy **Self-Care**
