Beyond Missio Dei Sarosh Koshy, 2021-11-24 In this book Sarosh Koshy strives to go beyond the mission model of Christianity that emerged alongside and within the colonial enterprise and ethos since the sixteenth century Rather than denounce the inheritance of the mission movement that transformed both the church and world in innumerable ways it is a simultaneous expression of appreciation for this precious heritage and an attempt to do justice by it through a yearning quest for relevant paradigms of Christian engagement Indeed there is an intense tension within this book and in fact a twin tension at that The tension is between those seeking to keep the current mission paradigm alive out of habit or as a self serving device thus corrupting and withering away a bequeathal that essentially set free the voluntary independent spirit of Christian individuals and their intentional collectives from both the ecclesiastical and political authorities On the other side are those who enlist mission both as a subsequent activity and as a basis to pursue innocuous and at times apparently heroic options that would seemingly satisfy a supposed missional mandatory This work enlists postcolonial and poststructuralist resources pedagogically to teach of mission missiology World Christianity and intercultural theology

The great diversity Camilla Brautaset, Christopher M. Dent, 2023-09-04 This book brings together scholars from the universities of Bergen and Leeds who explore how we may understand different trajectories of development in Asia arguably the most dynamic and certainly the most diverse part of our world It asserts that there is no one singular truth on understanding development or universal model on prescribing future paths of development Evidence from Asia reminds us that the importance of locality in shaping development has not diminished despite deepening globalisation in the modern era Furthermore by accepting the prevalence of diversity we are able to learn certain lessons of development from each other both within and across scholarly disciplines The book explores how the concept of development is itself highly contested and there exist multiple narratives and discourses on the subject as demonstrated in this book This book does not seek to define development or prescribe a particular method of understanding it in an Asian context Rather it presents a number of works that in their own way touch on the subject of development and it lays bare the inherent diversity of development as an idea practice and experience It is up to the reader to reflect on how the evidence and arguments presented in each chapter resonates or not on their own understanding of development
