Mixed Blessings Intensive Care For Newborns:

Mixed Blessings Jeanne Guillemin, Lynda Lytle Holmstrom, 1986 The main idea behind the first efforts to treat newborn patients was to create a womb like environment that would allow sick infants suffering from the complications of premature birth to grow The recent development of newborn intensive care presents a challenging case for analyzing the reinvention of acute care medicine for this new population of infant patients New Approaches To Human Reproduction Linda M. Whiteford, 2019-03-06 This book bridges the gap between cultural values and medical technology focusing in the areas of conception birth and neonatality It brings together research data and analysis particularly relevant for social scientists as well as nurses public health professionals and physicians **For the Sake of the Children** Carol A. Heimer, Lisa R. Staffen, 1998-07-20 For the Sake of the Children examines the social organization of responsibility by asking who takes responsibility for critically ill newborns Drawing on medical records and interviews with parents and medical staff the authors take us into two neonatal intensive care units showing us the traumas of extreme medical measures and the sufferings of infants The accounts are by turns heroic and disturbing as we see people trying to take charge of these infants care thinking about long term plans redefining their roles as adults and parents and coping with sometimes awful contingencies Rather than treating responsibility as an ethical issue the authors focus on how responsibility is socially produced and sustained The authors ask How do staff members encourage parents to take responsibility but keep them from interfering in medical matters and how do parents encourage staff vigilance when they are novices attempting to supervise the experts The authors conclude that it is not sufficient simply to be responsible individuals Instead we must learn how to be responsible in an organizational world and organizations must learn how to support responsible individuals The New Blackwell Companion to Medical Sociology William C. Cockerham, 2016-09-26 An authoritative topical and comprehensive reference to the key concepts and most important traditional and contemporary issues in medical sociology Contains 35 chapters by recognized experts in the field both established and rising young scholars Covers standard topics in the field as well as new and engaging issues such as bioterrorism bioethics and infectious disease Chapters are thematically arranged to cover the major issues of the sub discipline Global range of contributors and an international perspective Health and Health Care as Social Problems Peter Conrad, Valerie Leiter, 2003 This engaging and accessible reader takes a social problems approach to health and medicine providing a broad and critical lens on contemporary health problems Designed for courses on social problems and on medical sociology the volume embraces two fundamental principles that health and illness are at least partly socially produced and that health care is not an unfettered good and often brings with it serious social problems The volume is organized into six sections addressing the medicalization of human problems the social construction of health problems social movements gender race and class and the provision of health care and medical accountability Taken together the essays demonstrate the depth and richness of a social problems approach to health and medicine and the

Black Stork Martin S. Pernick, 1996-04-18 In the late 1910s Dr Harry J Haiselden a prominent Chicago surgeon electrified the nation by allowing the deaths of at least six infants he diagnosed as defectives He displayed the dying infants to journalists wrote about them for the Hearst newspapers and starred in a feature film about his crusade Prominent Americans from Clarence Darrow to Helen Keller rallied to his support Martin Pernick tells this captivating story uncovering forgotten sources and long lost motion pictures in order to show how efforts to improve human heredity eugenics became linked with mercy killing as well as with race class gender and ethnicity It documents the impact of cultural values on science along with the way scientific claims of objectivity shape modern culture While focused on early 20th century America The Black Stork traces these issues from antiquity to the rise of Nazism and to the Baby Doe assisted suicide and human genome initiative debates of today **Lying-in** Richard W. Wertz, Dorothy C. Wertz, 1989-01-01 This lively history of childbirth begins with colonial days when childbirth was a social event and moves on to the gradual medicalization of childbirth in America as doctors forced midwives out of business and to the home birth movement of the 1980 s Widely praised when it was first published in 1977 the book has now been expanded to bring the story up to date In a new chapter and epilogue Richard and Dorothy Wertz discuss the recent focus on delivering perfect babies with its emphasis on technology prenatal testing and

Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), **Anthropology of Pregnancy Loss** Rosanne Cecil, 2020-08-26 How much influence does culture have on a mother s reactions to pregnancy loss At what stage is a fetus attributed with human status How does this affect the mother s reactions to the loss of a baby Contemporary historical and oral history accounts from regions as diverse as rural North India urban America South Africa and Northern Ireland provide a fascinating insight into the experience and management of miscarriage across a number of different cultures The authors explore how the social technological and medical context in which miscarriages occur can affect the ways in which women experience such an event In the West advances in medical technology a low infant mortality rate and a low birth rate have raised expectations as to the successful outcome of each pregnancy In addition the early confirmation of pregnancy makes consequent pregnancy loss which might have gone unnoticed or unconfirmed in the past all the more difficult for mothers in the West Yet mourning rituals and behaviour at a pregnancy loss which may be elaborate in some societies are generally considered to be inappropriate in many Western societies Differing social beliefs regarding the causes of miscarriage preventative measures and curative treatments are also examined Medical anthropologists sociologists and health professionals will all find this book fascinating reading Where Medicine Fails Carolyn L. Wiener, Anselm L. Srauss, 2018-04-17 This fifth edition of Where Medicine Fails like previous editions argues for a broader definition of society s responsibilities to the ill than is commonly perceived to be the case The authors examine the moral and economic implications of medical technology especially in regard to fetal tissue transplant cancer survival childbirth and dying and provide a thoughtful assessment of the issues and challenges facing American hospitals Seventeen chapters are new to this edition The aim of this volume is to

encourage serious examination of the current structure of health services and of the complicated facets of health care reform

Qualitative Methods and Health Policy Research Elizabeth Murphy, 2017-07-05 Qualitative researchers have traditionally been cautious about claiming that their work was scientific The right on schools have exaggerated this caution into an outright rejection of science as a model for their work Science is for them outmoded an archaic form of consciousness surviving for a while yet in a degraded form Tyler 1986 200 Scientists assertions that they are in pursuit of truth simply camouflage their own lust for power There is no essential difference between truth and propaganda The authors acknowledge that the boundary between science and propaganda has often been breached and some distrust of scientific claims may be healthy They also question the claim that science creates disinterested and objective knowledge of an observer independent world without concluding that science is impossible The skeptics reservations about qualitative research are based on the deep rooted assumption among natural scientists and some social scientists that there is a world out there prior to and independent of their observations This world can be known objectively in the sense that all observers will if identically placed see it in exactly the same way If a suitable language were available they would also all produce identical descriptions From these observations they can work out the laws governing the world s operations The authors try to resolve these contrary claims by asserting that science is a procedural commitment It consists of openness to refutation a conscientious and systematic search for contradictory evidence and a readiness to

subject one's preconceptions to critical examination The devotion to truth as a regulative ideal is an essential difference between science and propaganda This work is a unique and innovative defense of scientific method
