Technology Transfer Ajay Babu Pazhayattil, Sanjay Sharma, Joe Paul Philip, Michelle Gischewski-Silva, Marzena Ingram, 2023-06-16

Currently there are no textbooks on drug product manufacturing technology transfer that incorporate the latest regulatory expectations Recent guidance from regulatory bodies such as the US FDA EMEA WHO and PIC S has adopted the ICH Lifecycle approach harmonizing concepts across regulatory guidance This allows organizations to align their technology transfer activities for all regulated markets However there is a need for consensus and direction in approaching technology transfer particularly in understanding how to manage the scale up effects to ensure regulatory compliance This textbook offers technology transfer solutions and guidance to the pharmaceutical industry The chapters provide a systematic understanding of applying the technology transfer concepts in pharmaceutical manufacturing promoting standardization within the industry Since Stage 1b is not specified in detail within the regulations pharmaceutical organizations are left to determine the requirements of the stage The need to justify the methodologies and utilization of sound science makes it more demanding The textbook s authors provide innovative solutions

for technology transfer challenges making it a comprehensive reference document The approaches can be applied to both small molecule and large molecule drug product manufacturing segments addressing the unmet needs of the industry
