Mixtec Transnational Identity:

Mixtec Transnational Identity M. Laura Velasco Ortiz, 2005-11 Laura Velasco Ortiz investigates groups located on both sides of the border that have maintained strong links with towns and villages in the Mixteca region of Oaxaca in order to understand how this transformation came about Through a combination of survey ethnography and biography she examines the formation of ethnic identity under the conditions of international migration giving special attention to the emergence of organizations and their leaders as collective and individual ethnic agents of change **BOOK JACKET** *Mixtec Transnational Identity* Laura Velasco Ortiz, 2022-09-13 As Mexican migrants have found new lives in the United States the appearance of migrant organizations reflects the revitalization of ancestral community life One example the Binational Oaxacan Indigenous Front includes participants from cities along the border and represents diverse organizations of indigenous migrants from Oaxaca Its creation reflects the vast changes that have taken place in migrants lives in less than thirty years *Mixtec Transnational Identity* is the first book to describe in detail the emergence of a wide range of transnational indigenous organizations and communities in the greater Mexico U S border region It documents and analyzes the construction of novel identities formed within transnational contexts that may not conform to identities in either the sending or receiving societies Laura Velasco Ortiz investigates groups located on both sides of the border that have maintained strong links with towns and villages in the Mixteca region of Oaxaca in order to understand how this transformation came about Through a combination of survey ethnography and biography she examines the formation of ethnic identity under the conditions of international migration giving special attention to the emergence of organizations and their leaders as collective and individual ethnic agents of change Velasco Ortiz reconstructs the Mixtec experience through three lines of analysis the formation of organizations beyond the confines of home communities the emergence of indigenous migrant leaders and the shaping of ethnic consciousness that assimilates the experiences of a community straddling the border Her research brings to light the way in which the dispersion of members of different communities is offset by the formation of migrant networks with family and community ties while the politicization of these networks enables the formation of both hometown associations and transnational pan ethnic organizations An important focus of her analysis is gender differentiation within the ethnic community There has been little research into the relationship between the process of collective agency and the reconstitution of the migrants ethnic identity *Mixtec Transnational Identity* should stimulate further study of Latino migration to the U S border region and its consequences on ethnic identity *Border Identities* Thomas M. Wilson, Hastings Donnan, 1998-01-22 This book offers fresh insights into the complex and various ways in which international frontiers influence cultural identities Ten anthropological case studies describe specific international borders in Europe Asia Africa and North America and bring out the importance of boundary politics and the diverse forms that it may take As a contribution to the wider theoretical debates about nationalism transnationalism and globalization it will interest to students

and scholars in anthropology political science international studies and modern history *The Practice of Research on Migration and Mobilities* Liliana Rivera-Sánchez, Fernando Lozano-Ascencio, 2014-01-03 The migration process is interpreted in a different way when researchers live in so called societies of origin than when it is interpreted from societies of destination even when research work is multi situated The localization of researchers in this field involves numerous factors that influence the modalities for conducting research Research agendas are clearly mediated by these localizations and this book on the contemporary social sciences points out those mediations breaking with the dichotomous readings that are implicit in this migration process origin destination north south and cause effect to mention just a few In the individual chapters priority is given to presenting the modalities through which research is conducted in multidisciplinary or interdisciplinary teams on the American Continent In summary the focus of this book is on the narrative of methodological experience of the Practice of Research on Migration and Mobilities **The Duplex Nature of Indigeneity** Frans J.

Schryer, 2025-02-03 The Duplex Nature of Indigeneity is a detailed ethnography centered on Ahuehuetpan a Mexican town in the Alto Balsas region of the state of Guerrero where an exodus of more than half the population to the United States and other parts of Mexico has altered both livelihoods and social identities Frans Schryer traces the people including families and descendants who locate their identity in the Alto Balsas a place some of them may never have seen Using a variety of sources perspectives and methods Schryer takes a duplexity approach which allows understanding the complexity of social reality and its complementary nature it identifies fields clusters and layers as interconnected components of social life The innovative methods consist of the combination of ethnographic description and an ethnohistorical census that provides information on every person going back to approximately 1850 That census is further examined with the use of inferential and non inferential statistical techniques archival research in locations not normally accessible to scholars Facebook phone interviews conducted over several years and help from Nahuatl speaking people whose perspectives on the findings generate additional information and insights Unique in this presentation which dips into the lives of generations of people to draw insight on those who lay claim to transnational Indigeneity Schryer s work contributes to research and theoretical discussion in the field of migration and globalization studies through a close examination of one Indigenous community over the course of many years utilizing a mix of qualitative and quantitative research methods in anthropology *Definiteness across languages* Ana Aguilar-Guevara , Julia Pozas Loyo , Violeta Vázquez-Rojas Maldonado , 2019 Definiteness has been a central topic in theoretical semantics since its modern foundation However despite its significance there has been surprisingly scarce research on its cross linguistic expression With the purpose of contributing to filling this gap the present volume gathers thirteen studies exploiting insights from formal semantics and syntax typological and language specific studies and crucially semantic fieldwork and cross linguistic semantics in order to address the expression and interpretation of definiteness in a diverse group of languages most of them understudied The papers presented in this volume aim to establish

a dialogue between theory and data in order to answer the following questions What formal strategies do natural languages employ to encode definiteness What are the possible meanings associated to this notion across languages Are there different types of definite reference Which other functions besides marking definite reference are associated with definite descriptions Each of the papers contained in this volume addresses at least one of these questions and in doing so they aim to enrich our understanding of definiteness

Divided by Borders Joanna Dreby, 2010 Just a phone call away but what anguish As employers of migrants who care for our children clean our houses work in fast food restaurants or on the shop floor we are so often blind to the sacrifices made by parents who see no other choice but to leave their children back home in Mexico and come to the U S for work With passion and insight Divided by Borders explores the agony that unfolds between husbands and wives across generation and the consequences on children left behind and those who cross the border Carol B Stack author of All Our Kin and Call To Home In this compelling intimate and heartbreaking look into the lives of Mexican migrants who leave children Dreby brings an impressive blend of ethnography interviews and surveys with parents children and caregivers collected over four years on both sides of the border to bear This is a story of migration where parental sacrifice is monumental yet dreams for intergenerational mobility are ultimately dashed The work is rich with both sociological insight and policy importance This is the rare academic work that readers will find hard to put down Kathy Edin author of Promises I Can Keep Why Poor Women Choose Motherhood Before Marriage Joanna Dreby's excellent book illuminates dimensions of migration and transnational life that have remained too often in the dark Her focus on what happens inside the black box of the migrant family shows how migrants and their children live their lives in difficult circumstances She deepens our understanding of many important issues and does so via intimate ethnographic research For example her work sheds light on the gendered practices and

ideologies surrounding parental leave taking and sheds light on the incompatibility of migrant time and developmental time. Her work on the power children wield in the intra family negotiations on whether and when to reunite and the long term human cost of migration is pathbreaking. Watching Joanna Dreby's work develop into this book over the years has been a great joy and reading it is even more so. Robert Courtney Smith, Professor of Sociology, Immigration Studies and Public Affairs, Baruch College School of Public Affairs and Sociology Department Graduate Center CUNY. Family separation brought about by labor migration is not new but hostile immigration policies have made for prolonged separations for parents and children. How do families cope? In this gripping and acutely observed study of Mexican migrant families, Joanna Dreby reveals the multifaceted challenges facing the parents, their children and teens who often harbor resentment against parents and the grandmothers who serve as caregivers back home. This engagingly written book is ideal for classroom adoption and it will become a classic contribution to the scholarship on families and contemporary immigration.
