Mobile Home Parks:

The Unknown World of the Mobile Home John Fraser Hart, Michelle J Rhodes, John T Morgan, 2002-08-20 An in depth look at the history and culture of mobile homes in the United States In American popular imagination the mobile home evokes images of cramped interiors cheap materials and occupants too poor or unsavory to live anywhere else Since the 1940s and 50s however mobile home manufacturers have improved standards of construction and now present them as an affordable alternative to conventional site built homes Today one of every fourteen Americans lives in a mobile home In *The Unknown World of the Mobile Home* authors John Fraser Hart Michelle J Rhodes and John T Morgan illuminate the history and culture of these often misunderstood domiciles They describe early mobile homes which were trailers designed to be pulled behind automobiles and which were more often than not poorly constructed and unequal to the needs of those who used them During the 1970s however Congress enacted federal standards for the quality and safety of mobile homes which led to innovation in design and the production of much more attractive and durable models These models now comply with local building codes and many are designed to look like conventional houses As a result one out every five new single family housing units purchased in the United States is a mobile home sited everywhere from the conventional trailer park to custom designed estates aimed at young couples and retirees Despite all these changes in manufacture and design even the most immobile mobile homes are still sold financed regulated and taxed as vehicles With a wealth of detail and illustrations *The Unknown World of the Mobile Home* provides readers with an in depth look into this variation on the American dream A clear concise and innovative look at the history the economics and the politics of the mobile home The authors reveal the inner workings of mobile home living by drawing upon a wide variety of sources from industry data to interviews conducted at mobile home parks across the country Further they explore new types of mobile home communities those assembled for workers at meat processing centers in southwest Kansas for example that complicate the familiar image of the mobile home park as retirement village The ideas presented in this book provide a solid starting point for many detailed studies on this important topic Karl Raitz University of Kentucky author of *The National Road* **Mobile Homes Parks** United States. off for 93 days By summer 2018 Syringa had closed forcing residents to relocate or face homelessness Trailer Park America chronicles how residents dealt with regulatory agencies frequent boil order notices threats of closure and class based social stigma over this period Despite all this what was seen as a dysfunctional disorderly community by outsiders was instead a refuge where veterans women heads of households and people with disabilities or substance use disorders were supported and understood The embattled Syringa community also organized to defend the rights and dignity of residents and served as a site for negotiating with local government culminating in a class action lawsuit that reached the federal level The experiences Syringa residents faced in this conservative predominately white region of the United States are emblematic of the growing national and global crisis in affordable housing and home ownership with declining work conditions and incomes for the working class

Mobile Home Zoning in Wisconsin Jim Schneider,1982 Singlewide Sonya Salamon,Katherine MacTavish,2017-10-15 In Singlewide Sonya Salamon and Katherine MacTavish explore the role of the trailer park as a source of affordable housing America s trailer parks most in rural places shelter an estimated 12 million people and the authors show how these parks serve as a private solution to a pressing public need Singlewide considers the circumstances of families with school age children in trailer parks serving whites in Illinois Hispanics in New Mexico and African Americans in North Carolina By looking carefully at the daily lives of families who live side by side in rows of manufactured homes Salamon and MacTavish draw conclusions about the importance of housing community and location in the families dreams of opportunities and success as signified by eventually owning land and a conventional home Working poor rural families who engage with what Salamon and MacTavish call the mobile home industrial complex may become caught in an expensive trap starting with their purchase of a mobile home A family that must site its trailer in a land lease trailer park struggles to realize any of the anticipated benefits of homeownership Seeking to break down stereotypes Salamon and MacTavish reveal the important place that trailer parks hold within the United States national experience In so doing they attempt to integrate and normalize a way of life that many see as outside the mainstream suggesting that families who live in trailer parks rather than being trailer trash culturally resemble the parks neighbors who live in conventional homes
