## **Mobility Climate Developing Environmen:**

### **Organizational Perspectives on Environmental Migration** Kerstin Rosenow-Williams,François Gemenne,2015-10-16

Over the past decade international organizations IOs and non governmental organizations NGOs have increasingly focused their efforts on the plight of environmental migrants in both industrialized and developing countries However to date very few studies have analysed the influence and rhetoric of advocacy groups in the debates on environmental migration

Organizational Perspectives on Environmental Migration fills this lacuna by drawing together and examining the related themes of climate change and environmental degradation migration and organizational studies to provide a fresh perspective on their increasing relevance In order to assess the role of IOs and NGOs in the environmental migration discourse and to understand their interaction and their ways of addressing the topic the book contains a wide range of contributions covering the perspectives of organizational sociologists political scientists anthropologists geographers lawyers and practitioners The chapters are organized thematically around the perspectives of key actors in the area of environmental migration including IOs courts and advocacy groups The geographically diverse and interdisciplinary range of contributions makes this volume an essential foundational text for organizational responses to environmental migration This volume will be of great interest to students and scholars of migration studies international relations organizational sociology refugee law and policy and development studies

### **Routledge Handbook of Environmental Displacement and Migration** Robert

McLeman,François Gemenne,2018-03-09 The last twenty years have seen a rapid increase in scholarly activity and publications dedicated to environmental migration and displacement and the field has now reached a point in terms of profile complexity and sheer volume of reporting that a general review and assessment of existing knowledge and future research priorities is warranted So far such a product does not exist The Routledge Handbook of Environmental Displacement and Migration provides a state of the science review of research on how environmental variability and change influence current and future global migration patterns and in some instances trigger large scale population displacements Drawing together contributions from leading researchers in the field this compendium will become a go to guide for established and newly interested scholars for government and policymaking entities and for students and their instructors It explains theoretical conceptual and empirical developments that have been made in recent years describes their origins and connections to broader topics including migration research development studies and international public policy and law and highlights emerging areas where new and or additional research and reflection are warranted The structure and the nature of the book allow the reader to quickly find a concise review relevant to conducting research or developing policy on particular topics and to obtain a broad reliable survey of what is presently known about the subject

### **Driving Quality Management and Sustainability in VUCA Environments** João Reis,Tiago Pinho,Vitor Barbosa,Luís Barreto,Sandrina B. Moreira,Pedro

Pardal,João Nabais,Carlos Mata,Ana Mendes,2024-05-27 This proceedings volume provides in depth research in the fields of

quality innovation sustainability and operations management It features contributions from the 4th International Conference on Quality Innovation and Sustainability ICQIS that explore how research in quality and innovation boost sustainability and includes solutions to complex industrial problems presented by researchers professionals and managers in the field It also examines the drivers of quality management and sustainability in VUCA environments with a special focus on supply chain management and innovation Featuring real business cases on quality and sustainability this book is useful for researchers scholars students and academics interested in quality management supply chain management circular economy and sustainability **The Atlas of Environmental Migration** Dina Ionesco,Daria Mokhnacheva,François Gemenne,2016-11-25

As climate change and extreme weather events increasingly threaten traditional landscapes and livelihoods of entire communities the need to study its impact on human migration and population displacement has never been greater The Atlas of Environmental Migration is the first illustrated publication mapping this complex phenomenon It clarifies terminology and concepts draws a typology of migration related to environment and climate change describes the multiple factors at play explains the challenges and highlights the opportunities related to this phenomenon Through elaborate maps diagrams illustrations case studies from all over the world based on the most updated international research findings the Atlas guides the reader from the roots of environmental migration through to governance In addition to the primary audience of students and scholars of environment studies climate change geography and migration it will also be of interest to researchers and students in politics economics and international relations departments Intermediary Cities and Climate Change An Opportunity for Sustainable Development OECD,United Nations Human Settlements Programme,2022-11-16

The consequences of climate change in developing countries are worsening fast many ecosystems will shortly reach points of irreversible damage and socio economic costs will continue to rise To alleviate the future impacts on populations and economies policy makers are looking for the spaces where they can make the greatest difference This report argues that intermediary cities in developing countries are such spaces **Pastoralism and Development in Africa** Andy Catley,Ian Scoones,Jeremy Lind,2013 Once again the Horn of Africa has been in the headlines And once again the news has been bad drought famine conflict hunger suffering and death The finger of blame has been pointed in numerous directions to the changing climate to environmental degradation to overpopulation to geopolitics and conflict to aid agency failures and more But it is not all disaster and catastrophe Many successful development efforts at the margins often remain hidden informal sometimes illegal and rarely in line with standard development prescriptions If we shift our gaze from the capital cities to the regional centres and their hinterlands then a very different perspective emerges These are the places where pastoralists live They have for centuries struggled with drought conflict and famine They are resourceful entrepreneurial and innovative peoples Yet they have been ignored and marginalised by the states that control their territory and the development agencies who are supposed to help them This book argues that while we should not ignore the profound difficulties of creating secure

livelihoods in the Greater Horn of Africa there is much to be learned from development successes large and small This book will be of great interest to students and scholars with an interest in development studies and human geography with a particular emphasis on Africa It will also appeal to development policy makers and practitioners **Environment, Climate Change and Migration in South Asia** Amit Ranjan,Rajesh Kharat,Pallavi Deka,2023-03-31 Climate change has been fueling migration and according to some policy reports there could more than one billion climate migrants refugees across the world by 2050 In South Asia disasters environmental degradation and climate change are increasing the number of migrants every year In South Asia like other parts of the world migrants and displaced people mainly move within their respective countries but some cross the porous border At most places the migrants and displaced people face hostile situation as they are not welcome by their local host population The chapters in the book highlight the challenges and inadequacies of governments and communities in protecting the environment as well as the disproportionate effect that climate change has on the poor and marginalized groups The book also discusses the gendered experiences of climate related migrations and policy measures which need to be implemented to counter forced displacements and environment degradation along with the legal and institutional resources which could help mitigate climate change and protect climate refugees This book will be of interest to students and researchers of development studies ecology and environment migration sociology law and governance human ecology climate change and economics Climate Change Adaptation and International Development Ryo Fujikura,Masato Kawanishi,2012-07-26 Climate change impacts upon the world s poorest most heavily It is therefore essential that international development initiatives focus on improving the ability of developing countries to adapt to the effects of climate change This book a product of research by the JICA RI Research Institute of the Japan International Cooperation Agency examines climate change adaptation from the perspective of development cooperation in order to provide useful lessons for those engaged in research policy and practice in this vital area In this book the editors have brought together a wide range of case studies from across Africa and Asia covering urban and rural areas and different sectors including water agriculture and disaster management in order to examine the following o high resolution climate change projection in Asia and how this can be used in planning appropriate adaptation responses o in depth case studies of climate change projections social economic and environmental impact and vulnerability assessment and adaptation in rural Thailand and urban Philippines o cases across Africa for which climate data is less readily available and alternative approaches need to be adopted o the current situation amongst international donors o emerging issues caused by climate change In the introductory section the editors draw together the full implications from the case studies to discuss how international communities can support adaptation in developing countries and to give an assessment of bilateral projects They reflect on the lessons learned and offer recommendations for future research and international development cooperation *Handbook of Translocal Development and Global Mobilities* Annelies Zoomers,Maggi Leung,Kei Otsuki,Guus

Van Westen,2021-06-25 This timely Handbook demonstrates that global linkages flows and circulations merit a more central place in theorization about development Calling for a mobilities turn it challenges the sedentarist assumptions which still underlie much policy making and planning for the future      **OECD Regional Development Studies Reaching Climate Neutrality for the Hamburg Economy by 2040** OECD,2024-01-26 This report shows what reaching climate neutrality by 2040 means for Hamburg businesses and identifies key actions they need to undertake      Climate, Environmental Hazards and Migration in Bangladesh Max Martin,2017-07-20 The apocalyptic visions of climate change that are projected in the media often involve extreme weather events disasters and mass migration of poor people This book takes a critical look at this notion drawing on research in Bangladesh a country located at the heart of debates on climate change and migration This book argues that rather than leading to dramatic events climatic and environmental impacts often cause incremental changes in people s habitats and livelihoods making them migrate in search of better places and income With or without climate change climatic and environmental factors can impoverish people and drive displacement and migration especially in the global South These influences including disasters need not necessarily make people move but instead sometimes trap the poorest and the most vulnerable people in their places exposed to hazards or make them migrate to even riskier places such as crowded and flood prone urban slums This book argues that restrictions placed on people s mobility options could increase their vulnerability and favours proactive migration policies This timely contribution explains the climate hazard migration nexus in an accessible engaging language for students of geography development studies politics and environmental studies as well as humanitarian and development practitioners and policymakers      **Environmental Science and Technology: Sustainable Development** Zeng Yang,2023-06-16 This book features a collection of high quality and peer reviewed papers from 2022 13th International Conference on Environmental Science and Technology which was held in Shandong China during October 21 23 2022 ICEST is held annually as a platform for presentation of new advances and research results in the fields of Environmental Science and Technology This year we focus on the theme Environmental Protection and Sustainable Development With the continuous development of human society environmental problems are becoming more and more serious How to realize the rational use of resources realize the sustainable development of ecological environment and protect the environment on which human beings live has become an urgent problem to be solved Based on the conference theme this year the presentations include the topical areas of environmental sustainability environmental restoration waste minimization solid waste management water pollution control water treatment and reclamation air pollution control carbon capture and storage and environmental monitoring etc      **Poverty and Development** Michal Apollo,Pahlaj Moolio,2021-10-13 This book brings together interdisciplinary perspectives with the aim of broadening understandings of poverty It contains both empirical and conceptual chapters including those by local researchers on a range of topics highlighting the relationship between poverty and sustainability It cover themes such as changes in the environment that

pose an existential risk to humans new concepts in tourism development that consider it as one of the key contributors in the prosperity and well being of all stakeholders natural social and economic aspects of human behaviour and environmental sustainability the impact of global warming on human well being immigration and integration policies and analyses of public discourse on migrants and overconsumption and its impact on sustainable development It will be a helpful resource for students and researchers of environmental management tourism global justice and sustainable development *Climate Action in Southern Africa* Philani Moyo, 2023-10-27 Using climate justice as an analytical tool this volume examines the role of local mitigation and adaptation actions in Southern Africa in furthering climate resilient development *Climate Action in Southern Africa* examines the intrinsic connection between local climate actions climate resilient development and strides towards a just transition The theoretical grounding in climate justice allows the authors to analyse whether current climate actions in Africa are truly effective for the poor and marginalised whose lives and livelihoods are impacted by a climate crisis largely not of their making The authors also question the extent to which pathways to net zero carbon emissions by 2050 are achievable in Africa and ask whether this can be attained without undermining livelihoods and human development Overall this book argues that for any transition to be a just transition it has to be aligned with the pursuit of sustainable development and climate justice for current and future generations on the African continent Drawing out key factors including politics gender and migration this volume will be of great interest to students and scholars of climate change climate justice and African development *Climate Change and Displacement* Jane McAdam, 2010-09-06 Environmental migration is not new Nevertheless the events and processes accompanying global climate change threaten to increase human movement both within states and across international borders The Inter governmental Panel on Climate Change has predicted an increased frequency and severity of climate events such as storms cyclones and hurricanes as well as longer term sea level rise and desertification which will impact upon people's ability to survive in certain parts of the world This book brings together a variety of disciplinary perspectives on the phenomenon of climate induced displacement With chapters by leading scholars in their field it collects in one place a rigorous holistic analysis of the phenomenon which can better inform academic understanding and policy development alike Governments have not been prepared to take a leading role in developing responses to the issue in large part due to the absence of strong theoretical frameworks from which sound policy can be constructed The specialist expertise of the authors in this book means that each chapter identifies key issues that need to be considered in shaping domestic regional and international responses including the complex causes of movement the conceptualisation of migration responses to climate change the terminology that should be used to describe those who move and attitudes to migration that may affect decisions to stay or leave The book will help to facilitate the creation of principled research based responses and establish climate induced displacement as an important aspect of both the climate change and global migration debates *Research Handbook on Climate Change, Migration and the Law* Benoît Maye, François

Crépeau,2017-10-27 This comprehensive Research Handbook provides an overview of the debates on how the law does and could relate to migration exacerbated by climate change It contains conceptual chapters on the relationship between climate change migration and the law as well as doctrinal and prospective discussions regarding legal developments in different domestic contexts and in international governance *Climate Change 2022 - Impacts, Adaptation and Vulnerability* Intergovernmental Panel on Climate Change (IPCC),2023-06-22 The Working Group II contribution to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change IPCC provides a comprehensive assessment of the scientific literature relevant to climate change impacts adaptation and vulnerability The report recognizes the interactions of climate ecosystems and biodiversity and human societies and integrates across the natural ecological social and economic sciences It emphasizes how efforts in adaptation and in reducing greenhouse gas emissions can come together in a process called climate resilient development which enables a liveable future for biodiversity and humankind The IPCC is the leading body for assessing climate change science IPCC reports are produced in comprehensive objective and transparent ways ensuring they reflect the full range of views in the scientific literature Novel elements include focused topical assessments and an atlas presenting observed climate change impacts and future risks from global to regional scales Available as Open Access on Cambridge Core *Climate Crisis and Resilient Transportation Systems* Eftihia G. Nathanail,Nikolaos Gavanas,Evangelos Adamos,2025-03-10 This book reports on original research and practical findings fostering collaborative inclusive just safe and climate neutral transportation planning Being the second volume of the proceedings of the 7th Conference on Sustainable Mobility CSuM 2024 held on September 4 6 2024 at Plastira s Lake Greece it describes state of the art models techniques and applications that enable the transition of transportation systems to support sustainable societies All in all this book offers extensive information to academicians researchers practitioners and decision makers working on effective strategies to transform mobility in a sustainable and equitable way **Zero Carbon Industry, Eco-Innovation and Environmental Sustainability** Rubee Singh,Amit Joshi,Walter Leal Filho,Shahbaz Khan,2025-01-29 This book provides the latest research on zero carbon industry and its practical implications for eco innovation and environmental sustainability for businesses in current scenario In a zero carbon industry there would be profound sometimes disruptive changes in our economy compared to our current one As the world approaches zero carbon industry by 2050 economic output will shift progressively and permanently toward those goods and services that do not emit greenhouse gases Changes in these dynamics would ripple along entire value chains transforming industries Creating a zero carbon industry will require fundamental changes in both our economies and societies Taking eco innovation and environmental sustainability seriously will be crucial to businesses and companies are increasingly keen to signal this commitment This book aims to illustrate a detailed exploration of the complex and interconnected domains of zero carbon industry eco innovation and environmental sustainability In addition to combining the academic expertise of emerging and established scholars from different academic

fields this book provides an integrated understanding of the topic on zero carbon emissions eco innovation and environmental sustainability from a broader perspective by combining the work of established and emerging scholars There is a need to fundamentally transform the zero carbon industry eco innovation ecosystem in order to achieve sustainability through the implementation of Industry 4 0 technologies such as artificial intelligence Internet of things blockchain and cloud technologies The book sheds light on various advancements in zero carbon industry eco innovation and emerging technologies for the purpose of sustainability and it aims to address the urgency of responding to the UN Sustainable Development Goals UN SDGs as part of the global mandate
