*Robot Suicide* Liz W. Faber, 2023-05-01 In *Robot Suicide* Death Identity and AI in Science Fiction Liz W. Faber blends cultural studies philosophy sociology and medical sciences to show how fictional robots hold up a mirror to our cultural perceptions about suicide and can help us rethink real world policies regarding mental health For decades we've been asking whether we could make a robot live but a new question is whether a living robot could make itself die And if it could how might we humans react Suicide is a longstanding taboo in Western culture particularly in relationship to mental health marginalized identities and individual choice But science fiction offers us space to tackle the taboo by exploring whether and under what circumstances robots as metaphorical stand ins for humans might choose to die Faber looks at a broad range of science fiction from classics like *The Terminator* franchise to recent hits like C Robert Cargill's novel *Sea of Rust*

**Science Fiction in Print** Charles N. Brown, William Contento, 1986 *The Cross, the Plow and the Skyline* Ernest J. Yanarella, 2022-03-01 The apocalyptic pastoral and urban traditions have fundamentally shaped Western history and influenced American religion culture and politics This book argues that these traditions have not only been decisive in giving form and substance to classic and modern American literature but have been appropriated by contemporary science fiction As a loosely connected set of cultural narratives the *Cross the Plow and the Skyline* have through the medium of science fiction and fantasy provided a bold vista on the future grounded in an emergent ecological imagination In the expanded second edition of the original 2001 publication the author argues that a significant shift has taken place in contemporary Anglo American science fiction and fantasy SF F from twentieth century SF F critically analyzed in the first edition's critical inquiry Avantgarde works in twenty first century speculative fiction extensively examined in representative works in interludes separating the slightly revised original chapters have become darker in their visions of the possible future more focused on slowness over breakneck speed more amenable to gender racial and global diversity in authorship plot and subgenre creation less attached to anchor concepts like the city wilderness and the domesticated landscape in plot development more prone to dystopian and critical dystopian tropes simultaneously more open toward but critical of Young Adult fiction and more supportive of the breakdown of borders and antagonisms between science fiction and fantasy and SF F and literary fiction Ensnared in the cultural social and political zeitgeist of the New Millennium's first two decades these features of twenty first century science fiction and fantasy may yet settle into and inform emergent and pluralistic varieties of ecological politics spreading across the globe and confronting the Earth's social and environmental crises of our times and coming decades

Bartter, 1988-10-24 Bartter surveys 250 American science fiction stories and American SF novels with occasional overlaps of stories made into episodic novels that have some relationship often direct sometimes marginal to atomic weapons and their effects Highly recommended for popular literature collections Choice Divided into three principal parts The Way to Ground Zero begins by exploring The Way to Hiroshima Through a detailed analysis of the works included Bartter reveals the sociopolitical assumptions that authors took for granted and develops a method by which these assumptions can be disclosed She shows that encoded in these fictions we can find the patterns that led us to create and use the atomic bomb In the second section Bartter looks at the deeper assumptions on which these sociopolitical assumptions rest focusing particularly on those which perpetuate considerations of nuclear war both in science fiction and in actual policy making Finally Bartter explores alternative assumptions proposed by innovative science fiction writers Throughout an attempt is made to forge a deeper understanding of the ways in which science fiction both reflects and influences human and international relations Students of science fiction and of literature and politics will find Bartter s work enlightening provocative reading Bartter argues that a close examination of American fiction particularly science fiction can offer important new insights into the events surrounding the bombing of Hiroshima in 1945 The use of an atomic bomb to end the war followed a scenario long established in science fiction defeating our enemy with a super weapon developed by native technological genius By examining the interrelationship between this persistent plot device and the development and use of a real super weapon Bartter sheds new light on the transactional role of literature and real life Her analysis is based on a comprehensive theory of human nature substantiated by exhaustive research in science fiction archives and libraries and covers a large number of stories both well known and relatively obscure featuring super weapons or super war and published by American authors
