Mode Of Production And Social Formation An Auto Critique Of Pre Capitalist Modes Of Production:

Mode of Production and Social Formation Barry Hindess, Paul Q. Hirst, 1977-03-01 **Mode of Production and Social Formation**, 1978 Concept Formation in Social Science (Routledge Revivals) William Outhwaite, 2010-10-22 First published in 1983 this book examines the problems of concept formation in the social sciences and in particular sociology from the standpoint of a realistic philosophy of science Beginning with a discussion of positivistic hermeneutic rationalist and realistic philosophies of science Dr Outhwaite argues that realism is best able to furnish rational criteria for the choice and specification of social scientific concepts A realistic philosophy of science therefore acts as his reference point for the dialectical presentation of alternative accounts **A Critique of Postcolonial Reason** Gayatri Chakravorty Spivak, 1999-06-28 Are the culture wars over When did they begin What is their relationship to gender struggle and the dynamics of class In her first full treatment of postcolonial studies a field that she helped define Gayatri Chakravorty Spivak one of the world's foremost literary theorists poses these questions from within the postcolonial enclave **Marx and the Common** Luca Basso, 2015-09-29 In *Marx and the Common* Luca Basso provides a detailed reconstruction of the late Marx's connection of the collective dimension of communism and the element of individual realisation Through an original analysis of a vast range of Marx's writings from *Capital* to his political texts and scientific notes the author brings out an articulated historical theoretical landscape in which the notion of individual is intertwined with the ideas of class society and community Rooting his analysis in the revolutionary power of the workers acting in common Basso brings to the fore an anthropological dynamic in Marx irreducible to either liberal individualism or any kind of organicist approach *The Female Body and the Law* Zillah R. Eisenstein, 2024-07-26 *The Female Body and the Law* provides an original and incisive reexamination of the dynamics of sexual equality Eisenstein contends that sexual inequality is fostered both by the law and by the insistence that men and women are biologically different Through a fascinating discussion of a series of issues including affirmative action AIDS Baby M pornography and abortion Eisenstein shows how the law operates as a political language that establishes and curtails choices and actions This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1990 *Hegemony Now* Alex Williams, Jeremy Gilbert, 2022-08-30 Today power is in the hands of Wall Street and Silicon Valley How do we understand this transformation in power And what can we do about it We cannot change anything until we have a better understanding of how power works who holds it and why that matters Through upgrading the concept of hegemony understanding the importance of passive consent the complexity of political interests and the structural force of technology Jeremy Gilbert and Alex Williams offer us an updated theory of power for the twenty first century *Hegemony Now* explores how these forces came to control our world The authors

show how they have shaped the direction of politics and government as well as the neoliberal economy to benefit their own interests However this dominance is under threat Following the 2008 financial crisis a new order emerged in which the digital platform is the central new technology of both production and power This offers new opportunities for counter hegemonic strategies to win back power Hegemony Now outlines a dynamic socialist strategy for the twenty first century

Arresting Development Craig Johnson, 2008-11-28 Scholars have become increasingly concerned about the impact of neo liberalism on the field of development Governments around the world have for some time been exposed to the forces of globalization and macro economic reform reflecting the power and influence of the world's principal international economic institutions and a broader commitment to the principles of neo classical economics and free trade Concerns have also been raised that neo classical theory now dominates the ways in which scholars frame and ask their questions in the field of development This book is about the ways in which ideologies shape the construction of knowledge for development A central theme concerns the impact of neo liberalism on contemporary development theory and research The book's main objectives are twofold One is to understand the ways in which neo liberalism has framed and defined the meta theoretical aims and assumptions of what is deemed relevant important and appropriate to the study of development A second is to explore the theoretical and ideological terms on which an alternative to neo classical theory may be theorized idealized and pursued By tracing the impact of Marxism postmodernism and liberalism on the study of development *Arresting Development* contends that development has become increasingly fragmented in terms of the theories and methodologies it uses to understand and explain complex and contextually specific processes of economic development and social change Outside of neo classical economics and related fields of rational choice the notion that social science can or should aim to develop general and predictive theories about development has become mired in a philosophical and political orientation that questions the ability of scholars to make universal or comparative statements about the nature of history cultural diversity and progress To advance the debate a case is made that development needs to recapture what the American sociologist Peter Evans once called the comparative institutional method At the heart of this approach is an inductive methodology that searches for commonalities and connections to broader historical trends and problems while at the same time incorporating divergent and potentially competing views about the nature of history culture and development This book will be of interest to scholars and students of Development Social and Political Studies and it will also be beneficial to professionals interested in the challenge of constructing knowledge for development

The Bet Garry Potter, 2019-06-04 First published in 1999 this epistemological volume takes Searle's simple theory and common sense realism and builds it from the ground up applying it to some of the most contentious issues in the philosophy of science Garry Potter shall also attempt to extend his notions of science and realism beyond the subject boundaries to demonstrate the applicability of both scientificity and realism where

such a possibility is perhaps most counter intuitive literary criticism Potter thus presents a unified theory of knowledge
