1-32 This SIECO car has Dreadnaught ends, a Superior Door, and a straight sill with squared-off ends. Boston River was one of many short lines to acquire large fleets of boxcars in the 1970s. George Drury

Many of the boxcars in service today are the 50-footers of the 1970s, many of which have been built and refurbished. Some other specialized cars, such as the 60- and 86-foot auto parts cars, also still ride the rails. Although they've slipped in number, boxcars are still being

built to replace older cars that are scrapped or no longer fit for paper loading, which requires clean, weather-tight cars (fig. 1-34). With their external-post design, new cars resemble the cars of the 1970s but are larger. Among the newest cars on the rails are TTX's TBOX cars (fig. 1-35), built by

Gunderson and National Steel Car, which hearken back to the Railbox cars of the 1970s.

Paper and wood products, as well as food and other packaged products, are the most common loads for boxcars today.
