Nuclear Proliferation Problems:

The comparative analysis of the solutions to the problem of nuclear proliferation Paul Shoust, 2010-12-07 Research Paper undergraduate from the year 2010 in the subject Politics Topic Peace and Conflict Security grade Good European University at St Petersburg course Security and Disarmament in Europe language English abstract The world has not become safer in the 21st century But there is only limited number of really global threats Those include inter alia international terrorism climate change and the issue of nuclear proliferation In its Resolution on the Convention on the Prohibition of Use of Nuclear Weapons the UN General Assembly underlined that the use of nuclear weapons poses the most serious threat to the survival of mankind But despite a nearly universal recognition of the threat posed by the mere existence of the nuclear arsenals the issue of further nuclear proliferation among the members of the international community is yet to be solved In this paper we attempt to conduct a comparative analysis of possible approaches to the issue of nuclear proliferation The goal of the research however is not the elaboration of practical solution of the issue We will focus on the conceptual value of the one or another option instead The aim is to define main dimensions of the problem that can be faced by the international community be it in the universal fora e g the UN General Assembly or in the exclusive clubs the UN Security Council First part will be dedicated to the theoretical approaches that may be employed in the research Also the framework for the comparative analysis per se will be defined In the second part of the paper we will focus on the determination of factors that should be taken into account during the comparative evaluation of the solutions In the third part the set of factors will be applied to the potential solutions and we will try to define common and specific characteristics of every option There are a lot of competent research papers dedicated to the problem of nuclear proliferation Many of them were published before the end of the Cold War and therefore provide us with the dynamic view on the issue Most of the literature used in the paper is dedicated to the problem of the theoretical and legal dimensions of the nuclear proliferation A number of international documents were used as well the Nonproliferation Treaty the UN General Assembly Resolutions etc Mass media sources proved to be a rich source of information Additional information was derived from the statistical data publications caselaw of the International Court

crucial for improving the capacity of IR to engage with concrete issues that today are of high policy relevance for international organisations states diplomats mediators and humankind in general Whilst the authors do not reject the present IR they offer a wider research agenda with new directions intended not only for those IR scholars who are unsatisfied with the analytical power of the current discipline but also for those working on international foreign global or interregional issues in other disciplines and fields of research In this instance they pay particular attention to linking up with peace research international political economy IPE and cultural political economy CPE sociology political geography development studies linguistics cultural studies environmental studies and energy research gender studies and traditions of area studies

Nuclear Proliferation Council on Foreign Relations. Independent Task Force on Nuclear Proliferation,1995 **Global Problems and Common Security** Josef Rotblat,Vitalii I. Goldanskii,2012-12-06 After many years of sterile arms control negotiations between the super powers which did not produce a single genuine disarmament measure and sometimes had the opposite effect of stimulating the development of new weapons to serve as bargaining chips an agreement to abolish completely two categories of nuclear weapons the INF Treaty was signed and is now being implemented This historical event the first actual destruction of deployed nuclear missiles although not of their warheads became possible largely because of the radical changes in the policies of the Soviet Union the new way of thinking advanced by its leader Mikhail Gorbachev The relaxation of tension that resulted from this policy was one of the factors contributing to the successful conclusion of the INF Treaty Another no less important factor was the acceptance by the Soviet Union of on site inspections as a basic element of a verification system essential to ensure compliance with the Treaty This breakthrough led to the mutual acceptance of an elaborate and precise verification regime and thus made possible the signing of the INF Treaty which in turn contributed to the further lessening of tension between East and West But perhaps the most important factor one which carries much promise for the future was the changed approach to security problems The Challenges of Nuclear Non-Proliferation Richard Dean Burns,Philip E. Coyle,2015-03-12 The Challenges of Nuclear Non Proliferation is an exhaustive survey of the many aspects of non proliferation efforts It explains why some nations pursued nuclear programs while others abandoned them as well as the challenges strengths and weaknesses of non proliferation efforts It addresses key issues such as concerns over rogue states and stateless rogues delivery systems made possible by technology and the connection between nuclear weapons and ballistic missiles examining whether non proliferation regimes can deal with these threats or whether economic or military sanctions need to be developed It also examines the feasibility of eliminating or greatly reducing the number of nuclear weapons A broad survey of one of today's great threats to international security this text provides undergraduates students with the tools needed to evaluate current events and global threats **Problems of Nuclear Proliferation** Robert William Reford,1975 *Nonproliferation - Challenges Old and New* Brad Roberts,2004 Since the advent of the nuclear era in 1945 Americans and others have been debating whether or how it might be possible to

prevent the proliferation of nuclear and other weapons of mass destruction WMD As each new proliferation challenge has emerged debate about the shortcomings of the various policy tools for coping with proliferation has intensified These debates have grown only more intense in the last ten to fifteen years Despite such debates American presidents have steered a fairly consistent course promoting nonproliferation innovating along the way while also coping with its periodic failures The end of the Cold War seemed to make new things possible for nonproliferation with the promise of even more cooperation between East and West on specific proliferation challenges And the Persian Gulf War of 1990 91 seemed to make new things necessary as the United States faced the first regional war under the shadow of weapons of mass destruction First President George H W Bush and then President William Clinton committed the federal government to significant political efforts to strengthen the tools of nonproliferation policy A World Without Nuclear Weapons Kenneth L. Mozley,2011-10-01 Politics and technology intersect in the international effort to prevent nuclear proliferation Written for scientists policy makers journalists students and concerned citizens *The Politics and Technology of Nuclear Proliferation* makes a highly complex subject understandable This comprehensive overview provides information about both the basic technologies and the political realities Methods of producing weapon materials plutonium and highly enriched uranium as well as their use in bombs are described in detail as is the generally successful international effort to prevent the spread of the ability to make nuclear weapons In explaining the problems the world will face if nuclear weapons become generally available Mozley summarizes and reviews the methods used to prevent proliferation and describes the

status of those nations involved in trade in nuclear materials He places emphasis on the danger of attack by renegade nations or terrorist groups particularly the possibility that weapon material might be stolen from the presently impoverished and unstable former Soviet Union **Nuclear Non-Proliferation** Michael P.
