Youth Transitions among Descendants of Turkish Immigrants in Amsterdam and Strasbourg: Elif

Keskiner,2019-04-16 This open access book maps the youth transitions of descendants of migrants from Turkey living in Amsterdam and Strasbourg through a comparative mixed methods research design As such it is of interest to discussions in youth sociology social mobility and second generation research The book follows transition trajectories of the second generation from school to activity or inactivity in the labour market to marriage or further study and deepens our understanding of transitions by unravelling the macro and micro mechanisms behind individual pathways On the one hand the author reveals the ongoing significance of distinct macro institutional settings as well as social structures such as social class ethnicity and gender in shaping the youth transition experience On the other she shows that youth transitions are not predestined to social reproduction when institutional and social structures create conditions for the development of resources necessary for social mobility Therefore through an examination of how immigrants descendants develop forms of capital in their social trajectories in relation to institutional and social structures the book advances the theoretical discussion on Bourdieu s capital theory Moreover in times when native born descendants of immigrants are at the forefront of public debate being subjected to normative integration demands the book significantly shifts the lens and draws our attention to the daily challenges and realities faced by ethnic minority youth [Inclusion and Exclusion of Young Adult](#)

Gerhard Bosch,Jean Charest,2009-09-10 The last decade has given rise to a strong public discourse in most highly industrialized economies about the importance of a skilled workforce as a key response to the competitive dynamic fostered

by economic globalisation The challenge for different training regimes is twofold attracting young people into the vocational training system while continuing to train workers already in employment Yet on the whole most countries and their training systems have failed to reach those goals How can we explain this contradiction Why is vocational training seen to be an old institution Why does vocational training not seem to be easily adapted to the realities of the 21st century This book seeks to respond to these important questions It does so through an in depth comparative analysis of the vocational training systems in ten different countries Australia Canada Denmark France Germany Korea Mexico Morocco the United Kingdom and the USA
