Global Perspectives in the Geography Curriculum Alex Standish,2008-10-07 For geographers across the globe this book provides the arguments for a return to the teaching of geography and why they should reject the politicisation of the subject by education policy makers and politicians Standish s careful critique shows the necessity of a depoliticised geography curriculum the irony of which would be that it would ensure that every child could point to Iraq Iran and Afghanistan on a

map Prof Dennis Hayes Oxford Brookes University UK A prescient and critical analysis of the changing face of geography teaching This book deserves to be widely read and debated Alex Standish s book puts current trends in geography teaching in historical and critical context It comprises a forthright and timely defence of geographical education for its own sake Dr Jim Butcher FRSA Department of Sport Science Tourism and Leisure Canterbury Christ Church University Since the early 1990s educational policy makers and some subject leaders have been seeking to fundamentally change the teaching of geography in UK and US schools from a subject which encourages students to explore spatial concepts ideas and skills to a more ethics based subject concerned with the promotion of environmentalism cultural diversity and social justice In this book the new approach is critically examined within a historical and ideological context addressing a number of fundamental questions Should geography be used as a tool for the delivery of citizenship ideals How does this affect the intellectual and moral value of geographical education for young people If the state and teachers are taking more responsibility for the values attitudes and emotional responses of students how will they learn to develop these qualities for themselves If global perspectives shift the focus of education from learning about the outside world to learning about the self what is its vision of social progress and conception of social change This book advocates a return to liberal models of education arguing that the new approach to geography currently being promoted for schools fundamentally undermines the educational value of the subject and the freedom of young people to shape the world in which they live A vital resource for teachers and student teachers alike *Global Perspectives in the Geography Curriculum* makes a significant contribution to the growing debate about the future direction of the discipline itself *Indigenous Management Practices in Africa* Uchenna Uzo, Abel Kinoti Meru, 2018-08-10 Africa is fast becoming an investment destination for firms operating outside the continent and effective management is central to the realization of organizational goals This volume evaluates the need for management philosophies and theories that reflect the peculiarities of the African continent **Educational Media Resources on Egypt** University of Michigan. foreign trade and distribution of experts turned into a profitable business Yet the tendencies towards sustainability and higher return on investment in the field of development aid were not limited just to the socialist bloc but emerged globally This book therefore not only revisits the roles of Czechoslovakia and Africa in the Cold War history but also reflects on the function of aid in international politics The Eastern Bloc and Sub Saharan Africa will appeal to students and historians specializing in the global Cold War and particularly those curious about development international organizations economic history and transfers of knowledge in transnational networks
