**The Prentice-Hall Concise Book of the Origins of Man** Aiello, Leslie, 1982      **Canadiana** ,1982      *A Concise History of Modern Europe* David S. Mason, 2018-06-15 Highlighting the most important events ideas and individuals that shaped modern Europe this text provides a concise history of the continent from the Enlightenment to the present day focusing on the causes and consequences of revolution the origins and development of human rights and democracy and issues of European identity and integration      *The Mysterious Origins of Hybrid Man* Susan B. Martinez, 2013-11-02 A provocative challenge to Darwin s theory of evolution Shows there is no missing link because the human race since day one is the result of outright interbreeding among highly diverse types Reveals multiple Gardens of Eden and how each continent has its own independent hominid lineages Explains Homo sapiens mental powers the Great Leap Forward and how we acquired the blood of the gods which endowed us with a soul Did we evolve from apes or are we all descendants of Adam and Eve Why is the missing link still missing Is the dumb luck of natural selection valid Piecing together the protohistory of humanity through anthropology genetics paleolinguistics and indigenous traditions Susan B Martinez offers an entirely original alternative to Darwin s evolution Modern humanity did not evolve but is a mosaic of mixed ancestry the result of eons of cross breeding and retro breeding among different groups including Cro Magnon Neanderthal hobbits giants and Africa s Lucy and Zinj Martinez shows that there were multiple Gardens of Eden and how each continent had its own blend of races prior to the Great Flood which caused the diaspora that brought a renaissance of culture to every division of the Earth Martinez explains Homo sapiens mental powers the Great Leap Forward in cosmological terms how we are the product of both heaven and earth She identifies the Sons of Heaven and the angel engendered races explaining how Homo sapiens acquired the blood of the gods which endowed us with a soul Providing the ultimate resolution to the Evolution versus Creationism debate this landmark study of hybrid man justifies his unexpectedly sudden appearance in the fossil record the curious parallels between oral histories of the world s people and why anatomically modern features are found in the earliest paleontological evidence      *The Evolution of Human Consciousness and Linguistic Behavior* , Karen A. Haworth, Terry J. Prewitt, 2020-09-22 Drawing from the disciplines of cognitive science Paleolithic anthropology art history and semiotics Karen A Haworth and Terry J Prewitt offer a novel discussion of the origins of language based primarily in the distinction of holistic versus analytical cognitive processing Also by employing a refined view of human symboling capacities grounded in the writings of C S Peirce they provide a short but comprehensive explanation of what the artifacts and art of the Paleolithic and Mesolithic periods suggest about language origins Their interpretation supports a semiotic argument that iconic and indexical logical modeling precedes human elaboration of experience by symbolic reference in words or propositions and ultimately in what Peirce called the argument Further they suggest that the use of symbols to model the world developed rapidly between about 20 000 and 10 000 years ago and has the effect of giving emphasis to analytic thought as the dominant

mode of human consciousness Rather than seeing symbols as the impetus for human logic they argue for presymbolic elements of logic in Peirce's sign categories shared widely by humans and other animals Intended readers are scholars in philosophy anthropology psychology linguistics and semiotics as well as interested nonspecialists The presentation is also complemented with brief personal narratives intended to offer background that helps make a dense academic argument more accessible to the widest audience possible The authors insights into the basis for language have ramifications for any number of other fields education psychology philosophy prehistory and art to name a few
