Directing for Animation Tony Bancroft,2013-10-01 There s no class in art school that can teach you this Believe it or not there s a lot more to directing a great animated film than beautiful illustrations and cool characters You need to bring out your inner creative visionary and take your savvy leadership skills to the front lines being great with a pencil brush or stylus is not enough Tony Bancroft released his inner creative visionary when creating *Mulan* In *Directing for Animation* he shows you exactly how Pull the right strings to bring your characters to life and center your story by developing the visual cues that lend to your audiences understanding of the plot place and purpose Tony walks you through the process bringing you behind the scenes of real well known projects with a little help from some famous friends Learn from the directors of *Aladdin* *The Little Mermaid* *Ice Age* *Chicken Run* and *Kung Fu Panda* and see how they developed stories and created characters that have endured for generations Get the inside scoop behind these major features pitfalls and all **A Development Strategy for Hybrid Products** Takeyasu Ichikohji,2021-10-31 This is the first book that deals with technological innovation in Japanese animation industry from a management perspective In reviewing prior research and explaining the history of the technology the author raises the difficulty of dealing with new technologies In particular the focus is on systems that combine analog technology drawing by hand and digital technology 3D computer graphics or 3DCG to create a product This combined technology is referred to as hybrid technology in this book and the development and management of hybrid products using this technology are studied The study was conducted in two stages The first stage was to determine the engineers animators perception of hybrid technology The results showed that in terms of potential the hybrid technology of hand drawn animation combined with 3DCG was rated more highly by engineers than hand drawn alone However in terms of the assessment at that time hybrid technology was rated higher than 3DCG alone but lower than hand drawn Therefore it was assumed that hybrid

technology while useful would pose challenges with respect to systematic implementation The second stage was the development management of hybrid products The results showed that the adaptive engineer who openly accepts other new technologies in the early stages of their emergence contributed to the integration of new and existing technologies
