Hutchins, 2019-07-15 Who among us wouldn t like to have more joy in their lives each day and live in a more vibrant community and peaceful world From ancient times down to the present day humanity s best minds have sought a path by which anyone anywhere embracing any point of view and lifestyle could build such a life and at the same time help create more vibrant sustainable peaceful communities Now informed by these elevated minds *Becoming Humanity s Next R Evolution* offers a practical scalable way to achieve the life the communities and the world each of us wants and humanity desperately needs The key is not mass conversion to a new religious or social doctrine or the global application of a new physical or digital technology Rather it is the daily use of at least two of five simple proven techniques based on universal

principles of human neurophysiology consciousness and social interaction When used by roughly 1 percent of any community these techniques will begin to measurably elevate the social economic and environmental stability of that community As individuals and communities on every continent and in every culture begin moving forward and upward each day humanity s global matrix of suffering and discontent will begin to transform into a matrix of wellbeing and positive achievement In this next r evolutionary matrix we will finally unlock life s deepest mysteries and begin permanently colonizing the moon Mars and perhaps beyond
