Preparing The Manuscript:

Writing Scientific Research Articles Margaret Cargill, Patrick O'Connor, 2009-04-20 Margaret Cargill's background as a linguist and research communications educator and Patrick O'Connor's experience as both research scientist and educator synergize to improve both the science and art of scientific writing. If the authors' goal is to give scientists the tools to write and publish compelling well-documented clear narratives that convey their work honestly and in proper context, they have succeeded admirably. *Veterinary Pathology* July 2009. The book is clearly written, has a logical step-by-step structure, is easy to read, and contains a lot of sensible advice about how to get scientific work published in international journals. The book is a most useful addition to the literature covering scientific writing. *Aquaculture International* April 2009. **Writing Scientific Research Articles: Strategy and Steps** guides authors in how to write as well as what to write to improve their chances of having their articles accepted for publication in international peer-reviewed journals. The book is designed for scientists who use English as a first or an additional language for research students and those who teach them paper-writing skills and for early career researchers wanting to hone their skills as authors and mentors. It provides clear processes for selecting target journals and writing each section of a manuscript, starting with the results. The stepwise learning process uses practical exercises to develop writing and data presentation skills through analysis of well-written example papers. Strategies are presented for responding to referee comments as well as ideas for developing discipline-specific English language skills for manuscript writing. The book is designed for use by individuals or in a class setting. Visit the companion site at www.writeresearch.com.au for more information.

Chicago Guide to Preparing Electronic Manuscripts University of Chicago. Press, 1987. This guide to preparing manuscripts on computer offers authors and publishers practical assistance on how to use authors' disks or tapes for typesetting. When the thirteenth edition of *The Chicago Manual of Style* was published in 1982, the impact of personal computers on the publishing process had just begun to be felt. This new book supplements information in the *Chicago Manual* by covering the rapidly changing subject of electronic manuscripts. Since the early 1980s, more and more authors have been producing manuscripts on computers and expecting their publishers to make use of the electronic version. For a number of reasons, including the proliferation of incompatible machines and software, however, publishers have not always found it easy to work with electronic manuscripts. The University of Chicago Press has been doing so since 1981, and in this book passes on the results of six years' experience with preparing such manuscripts and converting them to type.
