This stated that the U.S. would treat any European involvement in Latin American matters as an act of aggression and war.

Military Decision-Making Processes

Kevin Dougherty, 2013-11-08

President Bill Clinton speaking as might any commander in chief on the eve of his decision to deploy ground troops to Bosnia in 1995 declared he had no responsibility more grave than putting soldiers in harm's way. Such a statement suggests that a study of the decision making process associated with the weighty matters of using force would be enlightening. Indeed it is. The decision making process is far from standardized nor is it simple. While all individuals associated with important decisions about national security and the lives of America's service members take their responsibilities seriously, the processes by which they reach their conclusions are varied and complicated. The book traces eight traditional and emerging theories or models of decision making by first explaining the components of each model and then by analyzing its practical application through three case studies. Each chapter concludes with a discussion of the utility and explanatory power of the particular model.
