Constantine Nomikos Vaporis,2009-11-12 Alternate attendance sankin kotai was one of the central institutions of Edo period 1603 1868 Japan and one of the most unusual examples of a system of enforced elite mobility in world history It required the daimyo to divide their time between their domains and the city of Edo where they waited upon the Tokugawa shogun Based on a prodigious amount of research in both published and archival primary sources Tour of Duty renders alternate attendance as a lived experience for not only the daimyo but also the samurai retainers who accompanied them Beyond exploring the nature of travel to and from the capital as well as the period of enforced bachelorhood there Constantine Vaporis elucidates for the first time the significance of alternate attendance as an engine of cultural intellectual material and technological exchange Vaporis argues against the view that cultural change simply emanated from the center Edo and reveals more complex patterns of cultural circulation and production taking place between the domains and Edo and among distant parts of Japan What is generally known as Edo culture in fact incorporated elements from the localities In some cases Edo acted as a nexus for exchange at other times culture traveled from one area to another without passing through the capital As a result even those who did not directly participate in alternate attendance experienced a world much larger than their own Vaporis begins by detailing the nature of the trip to and from the capital for one particular large scale domain Tosa and its men and goes on to analyze the political and cultural meanings of the processions of the daimyo and their extensive entourages up and down the highways These parade like movements were replete with symbolic import for the nature of early modern governance Later chapters are concerned with the physical and social environment experienced by the daimyo s retainers in Edo they also address the question of who went to Edo and why the network of physical spaces in which the domainal samurai lived the issue of staffing political power and the daily lives and consumption habits of retainers Finally Vaporis examines retainers as carriers of culture both in a literal and a figurative sense In doing so he reveals the

significance of travel for retainers and their identity as consumers and producers of culture thus proposing a multivalent model of cultural change Personnelman 3 & 2 United States.
