Argumentation, Communication, and Fallacies Frans H. van Eemeren,Rob Grootendorst,2016-07-22 This volume gives a theoretical account of the problem of analyzing and evaluating argumentative discourse After placing argumentation in a communicative perspective and then discussing the fallacies that occur when certain rules of communication are violated the authors offer an alternative to both the linguistically inspired descriptive and logically inspired normative approaches to argumentation The authors characterize argumentation as a complex speech act in a critical discussion aimed at resolving a difference of opinion The various stages of a critical discussion are outlined and the communicative and interactional aspects of the speech acts performed in resolving a simple or complex dispute are discussed After dealing with crucial aspects of analysis and linking the evaluation of argumentative discourse to the analysis the authors identify the fallacies that can occur at various stages of discussion

Their general aim is to elucidate their own pragma dialectical perspective on the analysis and evaluation of argumentative discourse bringing together pragmatic insight concerning speech acts and dialectical insight concerning critical discussion

**Form Without Matter** Mark Eli Kalderon, 2015 Mark Eli Kalderon presents an original study in the philosophy of perception written in the medium of historiography He considers the phenomenology and metaphysics of sensory presentation through the examination of an ancient aporia Specifically he argues that a puzzle about perception at a distance is behind Empedocles theory of vision Empedocles conceives of perception as a mode of material assimilation but this raises a puzzle about color vision since color vision seems to present colors that inhere in distant objects But if the colors inhere in distant objects how can they be taken in by the organ of sight and so be palpable to sense Aristotle purports to resolve this puzzle in his definition of perception as the assimilation of sensible form without the matter of the perceived particular Aristotle explicitly criticizes Empedocles though he is keen to retain the idea that perception is a mode of assimilation if not a material mode Aristotle's notorious definition has long puzzled commentators Kalderon shows how read in light of Empedoclean puzzlement about the sensory presentation of remote objects Aristotle's definition of perception can be better understood Moreover when so read the resulting conception of perception is both attractive and defensible
