**Phage Therapy: Past, Present and Future** Stephen T. Abedon, Pilar García, Peter Mullany, Rustam Aminov, 2017-09-05 Historically the first observation of a transmissible lytic agent that is specifically active against a bacterium *Bacillus anthracis* was by a Russian microbiologist Nikolay Gamaleya in 1898 At that time however it was too early to make a connection to another discovery made by Dmitri Ivanovsky in 1892 and Martinus Beijerinck in 1898 on a non bacterial pathogen infecting tobacco plants Thus the viral world was discovered in two of the three domains of life and our current understanding is that viruses represent the most abundant biological entities on the planet The potential of bacteriophages

for infection treatment have been recognized after the discoveries by Frederick Twort and Felix d H relle in 1915 and 1917 Subsequent phage therapy developments however have been overshadowed by the remarkable success of antibiotics in infection control and treatment and phage therapy research and development persisted mostly in the former Soviet Union countries Russia and Georgia as well as in France and Poland The dramatic rise of antibiotic resistance and especially of multi drug resistance among human and animal bacterial pathogens however challenged the position of antibiotics as a single most important pillar for infection control and treatment Thus there is a renewed interest in phage therapy as a possible additive alternative therapy especially for the infections that resist routine antibiotic treatment The basis for the revival of phage therapy is affected by a number of issues that need to be resolved before it can enter the arena which is traditionally reserved for antibiotics Probably the most important is the regulatory issue How should phage therapy be regulated Similarly to drugs Then the co evolving nature of phage bacterial host relationship will be a major hurdle for the production of consistent phage formulae Or should we resort to the phage products such as lysins and the corresponding engineered versions in order to have accurate and consistent delivery doses We still have very limited knowledge about the pharmacodynamics of phage therapy More data obtained in animal models are necessary to evaluate the phage therapy efficiency compared for example to antibiotics Another aspect is the safety of phage therapy How do phages interact with the immune system and to what costs or benefits What are the risks in the course of phage therapy of transduction of undesirable properties such as virulence or antibiotic resistance genes How frequent is the development of bacterial host resistance during phage therapy Understanding these and many other aspects of phage therapy basic and applied is the main subject of this Topic

**Landscape in the Longue Durée** Christopher Tilley, 2017-10-06 Pebbles are usually found only on the beach in the liminal space between land and sea But what happens when pebbles extend inland and create a ridge brushing against the sky Landscape in the Longue Dur e is a 4 000 year history of pebbles It is based on the results of a four year archaeological research project of the east Devon Pebblebed heathlands a fascinating and geologically unique landscape in the UK whose bedrock is composed entirely of water rounded pebbles Christopher Tilley uses this landscape to argue that pebbles are like no other kind of stone they occupy an especial place both in the prehistoric past and in our contemporary culture It is for this reason that we must re think continuity and change in a radically new way by considering embodied relations between people and things over the long term Dividing the book into

two parts Tilley first explores the prehistoric landscape from the Mesolithic to the end of the Iron Age and follows with an analysis of the same landscape from the eighteenth into the twenty first century The major findings of the four year study are revealed through this chronological journey from archaeological discoveries such as the excavation of three early Bronze Age cairns to the documentation of all 829 surviving pebble structures and beyond to the impact of the landscape on local economies and its importance today as a military training camp The results of the study will inform many disciplines including archaeology cultural and art history anthropology conservation and landscape studies

*Augustine and Time* John Doody, Sean Hannan, Kim Paffenroth, 2021-05-25 This collection examines the topic of time in the life and works of Augustine of Hippo Adopting a global perspective on time as a philosophical and theological problem the volume includes reflections on the meaning of history the mortality of human bodies and the relationship between temporal experience and linguistic expression As Augustine himself once observed time is both familiar and surprisingly strange Everyone's days are structured by temporal rhythms and routines from watching the clock to whiling away the hours at work Few of us however take the time to sit down and figure out whether time is real or not or how it is we are able to hold our past present and future thoughts together in a straight line so that we can recite a prayer or sing a song Divided into five sections the essays collected here highlight the ongoing relevance of Augustine's work even in settings quite distinct from his own era and context The first three sections organized around the themes of interpretation language and gendered embodiment engage directly with Augustine's own writings from the Confessions to the City of God and beyond The final two sections meanwhile explore the afterlife of the Augustinian approach in conversation with medieval Islamic and Christian thinkers like Avicenna and Aquinas as well as a broad range of Buddhist figures like Dharmakirti and Vasubandhu What binds all of these diverse chapters together is the underlying sense that regardless of the century or the tradition in which we find ourselves there is something about the puzzle of temporality that refuses to go away Time as Augustine knew demands our attention This was true for him in late ancient North Africa It was also true for Buddhist thinkers in South and East Asia And it remains just as true for humankind in the twenty first century as people around the globe continue to grapple with the reality of time and the challenges of living in a world that always seems to be speeding up rather than slowing down

*Making Contact* Leston Havens, 1988-10-15 Since 1955 moving from early work in psychopharmacology to studies of clinical method and the psychiatric schools Leston Havens has been working toward a general theory of therapy It often seems that twentieth century psychiatry sect ridden is a Tower of Babel as Havens once characterized it This book is the distillation of long years of thought and practice a bold yet modest attempt to delineate an integrated psychotherapy The boldness of this effort lies in its author's willingness to recognize the best that each school has to offer to describe it cogently and to integrate it into a full response to today's new kind of patient Descriptive or medical psychiatry psychoanalysis interpersonal or behavioristic psychiatry empathic or existential therapy viewed in metaphors respectively of perceiving thinking managing feeling all have

useful contributions to make to contemporary methods of treatment But how Havens's modest answer is through appropriate language and he demonstrates exactly what he means when to ask questions when to direct or draw back when to sympathize Practitioners now must deal with less dramatic but more stubborn problems of character and situation lack of purpose isolation submissiveness invasiveness deep yet vague dissatisfaction Some kind of human presence must be discovered in the patient and Havens gives concrete absorbing examples of ways of speaking to absence of making contact The emphasis is on verbal technique but the underlying broad humane intent is everywhere evident It is no less than to transform passivity by means of disciplined therapeutic concern into a state of being Human **Being and Nothingness**

Jean-Paul Sartre, 2021-09-07 Revisit one of the most important pillars in modern philosophy with this new English translation the first in more than 60 years of Jean Paul Sartre's seminal treatise on existentialism This is a philosophy to be reckoned with both for its own intrinsic power and as a profound symptom of our time The New York Times In 1943 Jean Paul Sartre published his masterpiece Being and Nothingness and laid the foundation of his legacy as one of the greatest twentieth century philosophers A brilliant and radical account of the human condition Being and Nothingness explores what gives our lives significance In a new and more accessible translation this foundational text argues that we alone create our values and our existence is characterized by freedom and the inescapability of choice Far from being an internal passive container for our thoughts and experiences human consciousness is constantly projecting itself into the outside world and imbuing it with meaning Now with a new foreword by Harvard professor of philosophy Richard Moran this clear-eyed translation guarantees that the groundbreaking ideas that Sartre introduced in this resonant work will continue to inspire for generations to come
