Present Times:

Present times and future prospects, in lectures delivered during Lent, 1854, at St. George's, Bloomsbury Present times, 1854 *United States Military History 1865 to the Present Day* Jeffery Charlston, 2017-11-22 Explaining America's rise as a global military power challenges the methodologies of military history This volume looks beyond the major conflicts covered elsewhere in the Library to explore the operational conceptual technological and cultural forces that shaped the United States military after the American Civil War Individual articles reflect the wide range of topics and approaches that contribute to the growing understanding of the American military and its relationship with its parent society **The Law Times**, 1907 Time, Language, and Ontology M. Joshua Mozersky, 2015-01-29 This book brings together in a novel way an account of the structure of time with an account of our language and thought about time Joshua Mozersky argues that it is possible to reconcile the human experience of time which is centred on the present with the objective conception of time according to which all moments are intrinsically alike He defends a temporally centreless ontology along with a tenseless semantics that is compatible with and indeed helps to explain the need for tensed language and thought This theory of time also it is argued helps to elucidate the nature of change and temporal passage neither of which need be denied nor relegated to the realm of subjective experience only The book addresses a variety of topics including whether the past and future are real whether temporal passage is a genuine phenomenon or merely a subjective illusion how the asymmetry of time is to be understood the nature of representation how something can change its properties yet retain its identity and whether objects are three dimensional or four dimensional It is a wide ranging examination of recent issues in metaphysics philosophy of language and the philosophy of science and presents a compelling picture of the relationship of human beings to the spatiotemporal world *The Human Experience of Time* Charles M. Sherover, 2001 First published in 1975 and still without equal The Human Experience of Time provides a thorough review of the concept of time in the Western philosophic tradition Encompassing a wide range of writings from the Book of Genesis and the classical thinkers to the work of such twentieth century philosophers as Collingwood and McKeon all with introductory essays by the editor this classic anthology offers a synoptic view of the changing philosophic notions of time *U.S. Geological Survey Circular*, 1984 **Imaginings of Time in Lydgate and Hoccleve's Verse** Karen Elaine Smyth, 2016-05-13 Using empirical research to explore medieval writers' imaginings of time this study presents a new morphology by which to study narratives of time in fifteenth century literary culture focusing on poems of John Lydgate and Thomas Hoccleve Karen Smyth begins with an overview of medieval time keeping devices and considers collective and individual attitudes and perceptions of time She then examines a range of Middle English authors' appropriations and innovations in relation to such perceptions identifying competitions of tradition and innovation allowing for an interrogation of commonly accepted medieval theories of time An empirically based morphology emerges and is used to examine narratives of time in Lydgate and Hoccleve's work Through a series of close

readings of selected short poems and Lydgate's Troy Book Fall of Princes and Siege of Thebes and of Hoccleve's Regiments of Princes and Series Karen Smyth looks at expressions of time and examples of the authors negotiation of time consciousness illustrating how both poets manipulate a range of cultural narratives of time in order to create multiple and sometimes competing temporalities within a single poem Smyth simultaneously draws attention to Lydgate's and Hoccleve's underestimated artistic skills and lays out a means to re-evaluate medieval cultural attitudes towards time

Augustine and Time John Doody, Sean Hannan, Kim Paffenroth, 2021-05-25 This collection examines the topic of time in the life and works of Augustine of Hippo Adopting a global perspective on time as a philosophical and theological problem the volume includes reflections on the meaning of history the mortality of human bodies and the relationship between temporal experience and linguistic expression As Augustine himself once observed time is both familiar and surprisingly strange Everyone's days are structured by temporal rhythms and routines from watching the clock to whiling away the hours at work Few of us however take the time to sit down and figure out whether time is real or not or how it is we are able to hold our past present and future thoughts together in a straight line so that we can recite a prayer or sing a song Divided into five sections the essays collected here highlight the ongoing relevance of Augustine's work even in settings quite distinct from his own era and context The first three sections organized around the themes of interpretation language and gendered embodiment engage directly with Augustine's own writings from the Confessions to the City of God and beyond The final two sections meanwhile explore the afterlife of the Augustinian approach in conversation with medieval Islamic and Christian thinkers like Avicenna and Aquinas as well as a broad range of Buddhist figures like Dharmakirti and Vasubandhu What binds all of these diverse chapters together is the underlying sense that regardless of the century or the tradition in which we find ourselves there is something about the puzzle of temporality that refuses to go away Time as Augustine knew demands our attention This was true for him in late ancient North Africa It was also true for Buddhist thinkers in South and East Asia And it remains just as true for humankind in the twenty first century as people around the globe continue to grapple with the reality of time and the challenges of living in a world that always seems to be speeding up rather than slowing down

Augustine and Philosophy Phillip Cary, John Doody, Kim Paffenroth, 2012-07-10 Augustine of Hippo was a philosopher as well as theologian bishop and saint He aimed to practice philosophy not simply as an academic discipline but as a love for divine wisdom pervading everything in his life and work To inquire into Augustine and philosophy is thus to get to the heart of his concerns as a Christian writer and uncover some of the reasons for his vast influence on Western thought This volume containing essays by leading Augustine scholars includes a variety of inquiries into Augustine's philosophy in theory and practice as well as his relation to philosophers before and after him It opens up a variety of perspectives into the heart of Augustine's thought He frequently reminds his readers philosophy means love of wisdom and in that sense he expects that every worthy impulse in human life will have something philosophical about it something directed toward the attainment of wisdom In Augustine's own writing we find this expectation put into practice in a stunning variety of ways as key themes of Western philosophy and intricate forms of philosophical argument turn up everywhere The collection of essays in this book examines just a few aspects of the relation of Augustine and philosophy both in Augustine's own practice as a philosopher and in his interaction with others The result is not one picture of the relation of Augustine and philosophy but many as the authors of these essays ask many different questions about Augustine and his influence and bring a large diversity of interests and expertise to their task Thus the collection shows that Augustine's philosophy remains an influence and a provocation in a wide variety of settings today

Diverging Time David Carvounas, 2002-01-01 Temporal divergence creates a need for new narratives and paradigms In *Diverging Time* David Carvounas supports this assertion through detailed expository and diagnostic readings of Kant Hegel and Marx He focuses on their contribution to our understanding of modernity as an epochal shift in the relationship between past and future recasting the significance of the past and future of the modern present Despite their different solutions to the problem of temporal coordination they urged the modern world to look not to the past but to the newly opened future for continuity meaning and purpose This book not only offers a fresh look at a defining characteristic of modernity but also makes a compelling case that a coherent modern temporal structure requires a sustainable orientation toward the future an orientation that Kant Hegel and Marx delineate in distinctive and powerful ways
