Preservation Comes Of Age From Williamsburg To The National Trust 1926:

Preservation Comes of Age Charles Bridgham Hosmer, 1981 **Saving San Antonio** Lewis F. Fisher, 2016-08-22 Few American cities enjoy the likes of San Antonio's visual links with its dramatic past. The Alamo and four other Spanish missions recently marked as a UNESCO World Heritage site are the most obvious, but there are a host of landmarks and folkways that have survived over the course of nearly three centuries that still lend San Antonio an odd and antiquated foreignness. Adding to the charm of the nation's seventh largest city is the San Antonio River, saved to become a winding linear park through the heart of downtown and beyond and a world model for sensitive urban development. San Antonio's heritage has not been preserved by accident. The wrecking balls and headlong development that accompanied progress in nineteenth century San Antonio roused an indigenous historic preservation movement, the first west of the Mississippi River to become effective. Its thrust has increased since the mid 1920s with the pioneering work of the San Antonio Conservation Society. In *Saving San Antonio*, Texas historian Lewis Fisher peels back the myths surrounding more than a century of preservation triumphs and failures to reveal a lively mosaic that portrays the saving of San Antonio's cultural and architectural soul. The process, entertaining in the telling, has reverberated throughout the United States and provided significant lessons for the built environments and economies of cities everywhere.

Taylor, 2008 Examines the efforts of Independence, Missouri to preserve and balance competing elements of the city's history as the hometown of President Harry S. Truman as the site where Joseph Smith established the Reorganized Church of Jesus Christ of Latter Day Saints and as the historic gathering place for western emigration. Provided by publisher.

Destination Dixie Karen L. Cox, 2018-03-15 Once upon a time it was impossible to drive through the South without coming across signs to See Rock City or similar tourist attractions. From battlegrounds to birthplaces and sites in between, heritage tourism has always been part of how the South attracts visitors and defines itself, yet such sites are often understudied in the scholarly literature. As the contributors to this volume make clear, the narrative of southern history told at these sites is often complicated by race, influenced by local politics and shaped by competing memories. Included are essays on the meanings of New Orleans' cemeteries, Stone Mountain, Georgia, historic Charleston, South Carolina, Yorktown National Battlefield, Selma, Alabama as locus of the civil rights movement and the homes of Mark Twain, Margaret Mitchell and other notables. *Destination Dixie* reveals that heritage tourism in the South is about more than just marketing destinations and filling hotel rooms; it cuts to the heart of how southerners seek to shape their identity and image for a broader touring public, now often made up of northerners and southerners alike.

Charleston!* The Estate of Walter J. Fraser, Jr., 2022-03-29 Often called the most Southern of Southern cities, Charleston was one of the earliest urban centers in North America. It quickly became a boisterous, brawling sea city trading with distant ports and later a capital of the Lowcountry plantations, a Southern cultural oasis and a summer home for planters. In this city the Civil War began. And now in the twentieth century its metropolitan area has evolved into a microcosm of the military-industrial complex. This book records Charleston's development from 1670 and ends with an afterword on the effects of Hurricane Hugo in 1989, drawing with special care on information from every facet of the city's life: its people and institutions, its art and architecture, its recreational, social and intellectual life, its politics and city government. The most complete social, political and cultural history of Charleston, this book is a treasure chest for historians and for anyone interested in delving into this lovely city layer by layer. Museum Curatorship in the National Park Service, 1904-1982 Ralph H. Lewis, 1993 **Towards World Heritage** Melanie Hall, 2016-02-24 Historic preservation, whether of landscapes or buildings, was an important development of the nineteenth century in many countries. There is, however, surprisingly little understanding about how it took place and research into it is narrowly focused. For example, generally landscape preservation from this time is examined separately from buildings; preservation is seen in terms of national narratives or considered within the contexts of area studies and it is usually seen from a specific disciplinary perspective. All of these later categorizations did not apply at the time and consequently a very partial view is achieved. In order to begin unlocking a very complex phenomenon that has helped to define our own age, this dynamic collection of essays brings together an international and transdisciplinary line-up of academics and practitioners to reconsider preservation's origins in the second half of the nineteenth and early part of the twentieth century. With a focus on Britain and the British Empire and including case studies from the United States, Canada, Sweden, France, Germany, Sri Lanka, The Holy Land and Turkey, this book places preservation in imperial, international and national contexts, demonstrating that there was far more interaction between different countries in this arena than may be supposed and revealing remarkable but hitherto hidden overlaps and intersections. It examines three main themes: the influence of religion, the political and sub-diplomatic aspects of preservation and the professionalization of preservation practice. Internationalizing trends already existed through the churches, the universities and the diplomatic services, as well as familial ties that had an important impact on preservation's epistemic communities and its targets. Other internationalizing factors include an interest in national histories and the histories of architecture and art, particularly when known through illustration, a growing interest in biography, especially of founding fathers or famous literary figures and tourism. Although the focus is on architectural preservation, this book demonstrates that in this formative period the preservation of buildings and landscapes needs to be considered together as it often was at the time and in context. The conclusion reached is that the preservation movement has

to be understood in imperial and international contexts rather than in simply national or regional ones
