explores the origins and consequences of laws guaranteeing married women's property rights focusing on the people and institutions that shaped them Sara Chatfield demonstrates that the motives of male elites included personal interests benefits to the larger economy and bolstering state power She shows that married women's property rights could serve varied political goals across regions and eras from temperance to debt relief to settlement of the West State legislatures constitutional conventions and courts expanded these rights incrementally and laws spread across the country without national level coordination Chatfield emphasizes that the reform of married women's economic rights rested on exclusionary foundations including protecting slavery and encouraging settler colonialism Although some women benefited from property reforms many others saw their rights stripped away by the same processes Drawing on a mix of qualitative and quantitative evidence *In Her Own Name* sheds new light on the place of women in the fitful democratization of the United States

Subcommittee on Select Revenue Measures, 1994      **Owning Land, Being Women** Amrita Mondal, 2021-04-06 *Owning Land Being Women* enquires into the processes that establish inheritance as a unique form of property relation in law and society It focuses on India examining the legislative processes that led to the 2005 amendment of the Hindu Succession Act 1956 along with several interconnected welfare policies Scholars have understood these Acts as a response to growing concerns about women's property rights in developing countries In re-reading these Acts and exploring the wider nexus of Indian society in which the legislation was drafted this study considers how questions of family structure and property rights contribute to the creation of legal subjects and demonstrates the significance of the politico-economic context of rights formulation On the basis of an ethnography of a village in West Bengal this book brings the moral axis of inheritance into sharp focus elucidating the interwoven dynamics of bequest distribution of family wealth and reciprocity of care work that are integral to the logic of inheritance It explains why inheritance rights based on the notion of individual property rights are inadequate to account for practices of inheritance Mondal shows that inheritance includes normative structures of affective attachment and expectations i.e. evaluatively charged imaginaries of the future that coordinate present practices These insights pose questions of the dominant resource-based conceptualisation of inherited property in the debate on women's empowerment In doing so this work opens up a line of investigation that brings feminist rights discourse into conversation with ethics enriching the liberal theory of gender justice
