Clayton D. Laurie, 1997-07-15 CMH 30 15 Army Historical Series 2nd of three planned volumes on the history of Army domestic support operations This volume encompasses the period of the rise of industrial America with attendant social dislocation and strife Major themes are the evolution of the Army's role in domestic support operations its strict adherence to law and the disciplined manner in which it conducted these difficult and often unpopular operations

Urban Farming in the West Robert M. Carriker, 2010-04-15 From 1933 to 1935 the federal government's Division of Subsistence Homesteads created thirty four New Deal communities that sought to provide a healthier and more economically secure life for disadvantaged Americans These settlements were designed to combine the benefits of rural and urban living by offering part time farming uplifting social functions and inexpensive homes Four were located in the West in Phoenix Arizona El Monte and San Fernando California and Longview Washington Robert Carriker examines for the first time the intricate histories of these subsistence homestead projects which have long been buried in bureaucratic records and clouded by misunderstanding showing that in many ways they were among the agency's most successful efforts He provides case studies of the projects rescuing their obscure histories using archival documents and rare photographs He also reveals the machinations of civic groups and private citizens across the West who jockeyed for access to the funds being allotted for New Deal community building By describing what took place on these western homesteads Carriker shows that the DSH's agenda was not as far fetched as some have reported The tendency to condemn the Division and its projects he argues has failed to appreciate the good that came from some of the individual homestead communities particularly those in the Far West Although overshadowed by the larger undertakings of the New Deal some of these western communities remain thriving neighborhoods living legacies to FDR's efforts that show how the country once chose to deal with economic hardship Too often the DSH is noted for its failures Carriker's study shows that its western homesteads were instead qualified accomplishments

Forgotten Veterans, Invisible Memorials Allison S. Finkelstein, 2021-08-10 Investigates the groundbreaking role American women played in commemorating those who served and sacrificed in World War I In *Forgotten Veterans Invisible Memorials* How American Women Commemorated the Great War 1917-1945 Allison S Finkelstein argues that American women activists considered their own community service and veteran advocacy to be forms of commemoration just as significant and effective as other more traditional forms of commemoration such as memorials

Finkelstein employs the term veteranism to describe these women's overarching philosophy that supporting, aiding, and caring for those who served needed to be a chief concern of American citizens' civic groups and the government in the war's aftermath. However, these women did not express their views solely through their support for veterans of a military service narrowly defined as a group predominantly composed of men and just a few women. Rather, they defined anyone who served or sacrificed during the war, including women like themselves, as veterans. These women veteranists believed that memorialization projects that centered on the people who served and sacrificed was the most appropriate type of postwar commemoration. They passionately advocated for memorials that could help living veterans and the families of deceased service members at a time when postwar monument construction surged at home and abroad. Finkelstein argues that by rejecting or adapting traditional monuments or by embracing aspects of the living memorial building movement, female veteranists placed the plight of all veterans at the center of their commemoration efforts. Their projects included diverse acts of service and advocacy on behalf of people they considered veterans and their families, as they pushed to infuse American memorial traditions with their philosophy. In doing so, these women pioneered a relatively new form of commemoration that impacted American practices of remembrance, encouraging Americans to rethink their approach and providing new definitions of what constitutes a memorial. In the process, they shifted the course of American practices, even though their memorialization methods did not achieve the widespread acceptance they had hoped it would.

Meticulously researched, *Forgotten Veterans: Invisible Memorials* utilizes little-studied sources and reinterprets more familiar ones. In addition to the words and records of the women themselves, Finkelstein analyzes cultural landscapes and ephemeral projects to reconstruct the evidence of their influence. Readers will come away with a better understanding of how American women supported the military from outside its ranks before they could fully serve from within, principally through action-based methods of commemoration that remain all the more relevant today.

The Role of Federal Military Forces in Domestic Disorders, 1877-1945 Clayton David Laurie, Ronald H. Cole, 1997. Published in 1904, this forgotten classic is sci-fi and dystopia at its best, written by the creator and master of the genre. Following extensive research in the field of growth, Mr. Bensington and Professor Redwood light upon a new, mysterious element: a food that causes greatly accelerated development. Initially christening their discovery *The Food of the Gods*, the two scientists are overwhelmed by the possible ramifications of their creation. Needing room for experiments, Mr. Bensington chooses a farm that offers him the chance to test on chickens, which duly grow monstrous six or seven times their usual size. With the farmer Mr. Skinner failing to contain the spread of the Food, chaos soon reigns as reports come in of local encounters with monstrous wasps, earwigs, and rats. The chickens escape, leaving carnage in their wake. The Skinners and Redwoods have both been feeding their children the compound illicitly; their eventual offspring will constitute a new age of giants. Public opinion rapidly turns against the scientists, and society rebels against the world's new flora and fauna. Daily life has changed shockingly, and now politicians are involved, trying to stamp out the Food.

of the Gods and the giant race Comic and at times surprisingly touching and tragic Wells story is a cautionary tale warning against the rampant advances of science but also of the dangers of greed political infighting and shameless vote seeking
