The Presocratic Philosophers G. S. Kirk, J. E. Raven, M. Schofield, 1983-12-29 This book traces the intellectual revolution initiated by Thales in the sixth century BC to its culmination in the metaphysics of Parmenides [The Presocratic Philosophers](#) Geoffrey Stephen Kirk, John E. Raven, 1969 **A History of Medicine: Greek medicine** Plinio Prioreschi, 1996

[The Pre-Socratic Philosophers: a Critical History with a Selection of Texts](#) Geoffrey Stephen Kirk, J.E. Raven, M. Schofield, 1971 *Ancient Philosophy* Lorenzo Perilli, Daniela P. Taormina, 2017-12-12 We are all Greeks Our laws our literature our religion our arts have their root in Greece the poet Percy Bysshe Shelley once wrote It is in Greek that the questions which shaped the destiny of Western culture were asked and so were the first attempts at an answer and the search for a method of investigation This book tries to rediscover the propulsive force that for over two millennia spread and still lives in our system of thought By systematically quoting the very words of the leading actors and by tracing their sources it leads the reader along a path where they will be able to observe the establishment of philosophical ideas and language in an updated and balanced picture of archaic lore of the thought of the classical and hellenistic ages and of the philosophy of late antiquity The book looks closely at the progress of scientific thought and at its increasing autonomy while following the evolution of the fruitful yet problematic relationship between the Greek world and the Near East **The Beginnings of European Theorizing: Reflexivity in the Archaic Age** Barry Sandywell, 2013-08-21 In Reflexivity and the Crisis of Western Reason Barry Sandywell outlined and defended a central place for reflexivity in the human sciences In this second equally outstanding Volume of Logological Investigations he reconstructs the origins of European reflection [The Human Calling](#) Dao Feng He, 2022-01-25 A study of the world's religious movements and what their history says about society today The Human Calling is a vigorously researched and profoundly spiritual narrative history of the world's religious movements as they relate to society's collective understanding of the duties they have to fellow people and looks ahead to what lessons from history can be applied as people navigate a technological age Focusing on the rise and fall of spiritual movements in both the East and West The Human Calling examines what the world's major religions have historically offered asks what people are here for outside of pure survival and makes the persuasive argument for Christianity as the best leader to guide individuals on the path toward better caring for one another our human calling The Human Calling takes readers through humanity's three great thought movements The first is the Axial Age the source of the first great human reflection on public spirit and public order The second is the twelfth to seventeenth centuries wrestles with the question of whether people can attain individual rationality in God's order The third delves into the independent reasoning societies of the twentieth and twenty-first centuries and looks forward to what people want their third great reflection on God's plan to be during their own period of societal flux [Meet the Philosophers of Ancient Greece](#) Patricia F. O'Grady, 2021-08-26 Ancient Greece was the cradle of philosophy in the Western tradition Meet the Philosophers of Ancient Greece brings the thoughts and lives of the

pioneers of Western philosophy down from their sometimes remote heights and introduces them to a modern audience

Nietzsche Christoph Cox,2023-12-22 Nietzsche Naturalism and Interpretation offers a resolution of one of the most vexing problems in Nietzsche scholarship As perhaps the most significant predecessor of more recent attempts to formulate a postmetaphysical epistemology and ontology Nietzsche is considered by many critics to share this problem with his successors How can an antifoundationalist philosophy avoid vicious relativism and legitimate its claim to provide a platform for the critique of arguments practices and institutions Christoph Cox argues that Nietzsche successfully navigates between relativism and dogmatism accepting the naturalistic critique of metaphysics and theology provided by modern science yet maintaining that a thoroughgoing naturalism must move beyond scientific reductionism It must accept a central feature of aesthetic understanding acknowledgment of the primacy and irreducibility of interpretation This view of Nietzsche s doctrines of perspectivism becoming and will to power as products of an overall naturalism balanced by a reciprocal commitment to interpretationism will spur new discussions of epistemology and ontology in contemporary thought Nietzsche Naturalism and Interpretation offers a resolution of one of the most vexing problems in Nietzsche scholarship As perhaps the most significant predecessor of more recent attempts to formulate a postmetaphysical epistemology and ontology

Systematic Atheology John R. Shook,2017-12-01 Atheology is the intellectual effort to understand atheism defend the reasonableness of unbelief and

support nonbelievers in their encounters with religion This book presents a historical overview of the development of atheology from ancient thought to the present day It offers in depth examinations of four distinctive schools of atheological thought: rationalist atheology, scientific atheology, moral atheology, and civic atheology John R Shook shows how a familiarity with atheology's complex histories, forms, and strategies illuminates the contentious features of today's atheist and secularist movements, which are just as capable of contesting each other as opposing religion The result is a book that provides a disciplined and philosophically rigorous examination of atheism's intellectual strategies for reasoning with theology

Systematic Atheology is an important contribution to the philosophy of religion, religious studies, secular studies, and the sociology and psychology of nonreligion *Cytherica* Josef Chytrý, 2005 *Cytherica* boldly introduces a new faculty of thought called cytherics to contemporary academic discursivities It defines cytherics as the sighting and siting of an aesthetic, erotic, or aphrodisian environment Building on the furthest extensions of aesthetics since the eighteenth century, cytherics develops both the aesthetic, political, and aesthetic-erotic dimensions of the aesthetic tradition to formulate exciting new responses to the pressing issues of contemporary societies While drawing richly on the background of German and European Hellenism, this book provides valuable new insights for those working in the areas of the aesthetic, political, critical theory, postmodernist discursivities, and dialectical speculation *Encyclopedia of Classical Philosophy* Donald J. Zeyl, 2013-10-23 The *Encyclopedia of Classical Philosophy* is a reference work on the philosophy of Greek and Roman antiquity It includes subjects and figures from the dawn of philosophy in Ionia in the 6th century BC to the demise of the Academy in Athens in the 6th century AD Scholarly study of the texts and philosophical thought of this period has been during the last half of the 20th century amazingly productive and has become increasingly sophisticated The 269 articles in the encyclopedia reflect this development While the majority of the articles are devoted to individual figures, many of the articles are thematic surveys of broad areas such as epistemology, ethics, and political thought Some articles focus on particular concepts that evoked significant philosophical treatment by the ancients and have proved central to later thought Other articles treat fields that are no longer considered part of philosophy proper, such as mathematics and science There are articles examining areas of intellectual or cultural endeavour, such as poetry or rhetoric, or genres of philosophical expression, such as dialogue and diatribe Still others describe the historical developments of philosophical schools and traditions The encyclopedia includes a chronology and guide to further reading **Best Reference Source**

Metaphysics or Ontology? Piotr Jaroszyński, 2018-02-12 *Metaphysics or Ontology* treats the evolution of the object of metaphysics from being to the concept of being to finally the object of thought Possible being must be non-contradictory, but an object of thought includes anything a human being can think, including contradictions and nothingness When the concept of being or object of thought replaces existence as the object of metaphysics, it becomes something other than metaphysics, ontology, or something beyond ontology However, ontology cannot examine existence because it only investigates concepts and possibility Only classical metaphysics

investigates reality qua reality This book masterfully treats the history of this controversy and many other important metaphysical questions raised over the centuries

Beyond Elemental Loss Marjolein Oele, 2025-04-01 Offers an important and innovative contribution to environmental philosophy by investigating loss in times of anthropogenic climate change through the elements of water fire air and earth Beyond Elemental Loss offers an important and innovative contribution to environmental philosophy by investigating loss in times of anthropogenic climate change through the elements of water fire air and earth Marjolein Oele argues that the current experience of loss prompts a reassessment of the conventional meaning and conceptualization of loss She proposes that such loss is best understood through infinitesimal diachronic shifts occurring in the elemental constellations that structure the world water fire air and earth and humanity's incremental inability to cognitively and affectively make sense of this world increasingly transformed by anthropogenic forces Through a generous yet critical reading of a broad range of interdisciplinary sources tracing changes in our relationship to the elemental over time Oele's scholarship plumbs the history of philosophy as much as it pulls from Indigenous philosophies continental thought mythologies anthropological and historical sources science and ecology The book's argumentative arc ultimately directs our attention toward constructive transformations in our cognitive and affective habits and it argues that trust can bring us beyond elemental loss

Plato's Republic has been dropped. Those who use this first volume in a one-term course in ancient philosophy will find more material here than can easily fit a normal semester. But this embarrassment of riches gives teachers some choice and for those who offer the same course year after year an opportunity to change the menu. [Suffering Time: Philosophical, Kabbalistic, and Hasidic Reflections on Temporality](#) Elliot R. Wolfson, 2021-05-25. No one theory of time is pursued in these essays but a major theme that threads them together is Wolfson's signature idea of the timeswerve as a linear circularity or a circular linearity expressions that are meant to avoid the conventional split between the two temporal modalities of the line and the circle. The conception of time elicited by Wolfson from a host of philosophical and mystical sources both Jewish and non-Jewish buttresses the contention that it is precisely structural invariability that engenders interpretive variation. This hermeneutical axiom is justified in turn by the presumption regarding the cadence of time as the constant return of what has always been what is yet to be. The telling of time wells forth from the time of telling. One cannot speak of the being of time consequently except from the standpoint of the time of being nor of the time of being except from the standpoint of the being of time. **Explorations in Ancient and Modern Philosophy** Myles Burnyeat, 2022-03-31. Collects important studies on Plato and his subsequent reception and presents hitherto unpublished lectures. The Archaeology of Feeling.
