The Founders of Western Thought - The Presocratics Constantine J. Vamvacas, 2009-05-28 There can be little doubt that the Greek tradition of philosophical criticism had its main source in Ionia It thus leads the tradition which created the rational or scientific attitude and with it our Western civilization the only civilization which is based upon science though of course not upon science alone Karl Popper Back to the Presocratics Harvard University physicist and historian of Science Gerald Holton coined the term Ionian Enchantment an expression that links the idea back in the 6th century B C to the ancient Ionians along the eastern Aegean coast while capturing its fascination Approximately within a seventy year period 600-525 B C a split second in the history of humanity the three Milesian thinkers Thales Anaximander and Anaximenes without plain evidence but with an unequalled power of critical abstraction and intuition had achieved a true intellectual revolution they

founded and bequeathed to future generations a new unprecedented way of theorizing the world it could be summarized in four statements beneath the apparent disorder and multiplicity of the cosmos there exists order unity and stability unity derives from the fundamental primary substratum from which the cosmos originated this and consequently the cosmic reality is one and is based not on supernatural but on physical causes they are such that man can vestigate them rationally These four statements are neither self evident nor self explanatory
