Inequalities and the Life Course Magda Nico, Gary Pollock, 2021-12-30 Drawing upon perspectives from across the globe and employing an interdisciplinary life course approach this handbook explores the production and reproduction of different types of inequality across a variety of social contexts Inequalities are not static easily measurable and essentially quantifiable circumstances of life They are processes which impact on individuals throughout the life course interacting with each other accumulating attenuating reproducing or distorting themselves along the way The chapters in this handbook examine various types of inequality such as economic gender racial and ethnic inequalities and analyse how these inequalities manifest themselves within different aspects of society including health education and the family at multiple levels and dimensions The handbook also tackles the global COVID 19 pandemic and its striking impact on the production and intensification of inequalities The interdisciplinary life course approach utilised in this handbook combines quantitative and qualitative methods to bridge the gap between theory and practice and offer strategies and principles for identifying and tackling issues

of inequality This book will be indispensable for students and researchers as well as activists and policy makers interested in understanding and eradicating the processes of production reproduction and perpetuation of inequalities **Hisclass**

Marco H. D. van Leeuwen, Ineke Maas, 2011 For the sake of comparability it is advisable not to develop new class schemes but to use old ones Yet presenting a new class scheme HISCLASS is exactly what this book does Unlike existing historical schemes HISCLASS is international created for the purpose of making comparisons across different periods countries and languages Furthermore it is linked to an international standard classification scheme for occupations HISCO The chapters in the book show how historical occupational titles classified in HISCO can form the building blocks of a social class scheme for past populations The dimensions underlying classes are discussed How for instance can manual work be distinguished from non manual work Skilled from non skilled And what did supervision really mean Social Stratification and Career Mobility

Cradle to Grave: Life-Course Change in Modern Sweden Jan O. Jonsson, Colin Mills, 2021-04-14 The empirical study of individuals' life course is one of the most promising areas of research within sociology today. Increased availability of large scale longitudinal data and improved statistical methods have made it possible to address theoretically relevant questions about events such as entrance into the labour market, job mobility, divorce and death. This book consists of studies capturing the life course from the cradle to the grave. The research questions include long term consequences of childhood conditions, family formation and school careers, work and parental leave, gender discrimination in job promotion, divorce and occupational career persistence in poverty and the intriguing question of why the highly educated tend to survive everyone else. The studies shed light on the relation between family and work, on gender inequality, social class differences, welfare state redistribution and labour market processes. They do this in a particular context, namely Sweden in the post war period that is during the decades that formed one of the most advanced welfare states in modern history. One chapter provides a descriptive account of institutional and life course change in Sweden during that period. Most authors use the Swedish level of living surveys, a unique data set providing ample opportunity to study social processes in a longitudinal perspective. The book will therefore be of relevance to those with interests in the Swedish welfare state as well as those with theoretical and research interests in the reproduction of inequality.

The Human Meaning of Social Change Angus and Converse, Philip E. Campbell, Angus Campbell, Philip E. Converse, 1972-03-30 This book is a companion piece to Sheldon and Moore's *Indicators of Social Change*. Whereas *Indicators of Social Change* was concerned with various kinds of hard data, typically sociostructural, this book is devoted chiefly to so-called softer data of a more social psychological sort: the attitudes, expectations, aspirations and values of the American population. The book deals with the meaning of change from two points of view. First, it is interested in the human meaning which people attribute to the complex social environment in which they find themselves, their understanding of group relations, the political process and the consumer economy in which they participate. Secondly, it discusses the impact that the various alternatives offered by the environment have on the nature of their lives and the fulfillment of those lives. The twelve essays which make up the volume deal successively with the major domains of life. Each author sets forth an inclusive statement of the most significant dimensions of psychological change in a specific area of life, to review the state of present information and to project the measurements needed to improve understanding of these changes in the future.

Soldiers, Peasants, and Bureaucrats Roman Kolkowicz, Andrzej Korbonski, 2021-01-26 This book, first published in 1981, is a comprehensive examination of the main theoretical, methodological and empirical approaches to the study of the military in modernising political systems in socialist and non-socialist countries. It analyses civil-military relations in the Middle East, Eastern Europe and China and in doing so sheds new

light on the comparative politics and strategic affairs of the Cold War period **Resources in Education** ,1998 Media Research on Climate Change Ulrika Olausson,Peter Berglez,2018-04-19 Research on media coverage of climate change as a particular subfield of environmental communication research has proliferated over the past decade This book sets out to consider what conclusions can be drawn in light of the existing body of work what lessons can be learnt what are the challenges to be met and what are the directions to be taken in order to further develop media research on climate change The mixture of articles in this volume serve well to illustrate the range of empirical theoretical and methodological approaches subsumed under the broad heading of media studies on climate change Some contributions focus on the past how the subfield has developed and what we can learn from that and some look toward the future Either way all the authors share the ambition to suggest important avenues of research be they centered on media context applicability of results or theoretical advancement As such they make a valuable contribution to identifying important directions for future research on the role of the media in communicating climate change This book was previously published as a special issue of Environmental Communication **Social Stratification** David B. Grusky,2018-05-04 The book covers the research on economic inequality including the social construction of racial categories the uneven and stalled gender revolution and the role of new educational forms and institutions in generating both equality and inequality **JQ.
