Disease Ecology Patricia G. Parker, 2017-10-26 This book provides the first collection of chapters written by scientists who have contributed to the understanding of disease ecology in the Galapagos Islands an iconic and historic natural site The Galapagos Archipelago straddles the equator in the eastern Pacific Ocean almost 1000 km off the coast of Ecuador and includes 13 major islands numerous smaller satellite islands and many more even smaller islets The wildlife on the Galapagos Islands today represents one of the best preserved wild communities of plants and animals in the world owing to the location of the islands at the intersection of major ocean currents the commitment by Ecuador for the vast majority of the area to be left undeveloped and the protection provided by the Galapagos National Park Most of the animal species in Galapagos are endemic occurring nowhere else But they are descendants of ancestors that colonized earlier and then isolated from their mainland origins evolved into forms that are recognized as distinct today Since 2001 many of the authors of this book have been part of a four institution partnership investigating the threats posed by pathogens to Galapagos avifauna They approach the topic of disease ecology in a novel manner starting with the history of arrival of both the birds themselves and the pathogens This synthetic approach requires the integration of themes from veterinary medicine epidemiology population genetics and phylogenetics

The Deep Pull Walter Hayduk, 2018-07-03 As science advances at breakneck speed it becomes harder to make new discoveries and chart uncharted territory Yet *The Deep Pull* A Major Advance in the Science of Ocean Tides does just that This book offers the

world a new model of tide formation that can actually find a pattern in previously unintelligible tide data and be applied to both oceanic and atmospheric tides At the heart of this new model is a new theory on where lunisolar gravitational forces act With this simple key the author opens a new way of understanding a centuries old science Written for anyone with an interest in the mechanics behind natural phenomena Walter Hayduk takes the readers through his thought process behind his new discovery His accessible and engaging step by step manner of uncovering a new paradigm through the exploration of data analogies and natural phenomena from the Bay of Fundy s incredible tides to tornadoes provides the reader with the excitement of his or her own eureka moment of understanding the secret of the tides *Imperfect Passage* Michael Cosgrove,2015-03-03 Turning sixty isn t the end it s only the beginning Michael Cosgrove had a beautiful family a successful career and a lovely Southern California home overlooking the Pacific Ocean At age sixty he decided to leave all that behind to sail around the world With the vision of rugged individualism and salty tales to share with his grandchildren Cosgrove quickly realized that sailing around the world wasn t as easy as he had imagined From a psychotic crewmate to sleep deprivation and mental breakdowns to constant storms and hallucinations Cosgrove rode the waves trying to keep his idea of doing something grand alive Alone and thousands of miles away from everyone he loved he was forced to ask himself one question What in God s name am I doing here In his attempt to avoid the inevitable growing old weak frail Cosgrove runs amok He breaks his budget to outfit the boat and then refuses to read the manuals He enters unfamiliar harbors in the dead of night hires a violent first mate and sails headlong into ferocious storms At the same time he longs for the simpler days when his four daughters were still children when his first marriage was still intact and when his dreams were still within reach Though driven by scenes of sheer terror absurd folly and deep inner searching the tone is always buoyant and laugh out loud funny *Imperfect Passage* is the story of one man s perseverance against Father Time and Mother Nature proving that with enough will one can indeed conquer the unconquerable **Explanations and Sailing Directions to Accompany the Wind and Current Charts** Matthew Fontaine Maury,1859 *Current* ,1998 **Monograph Series** Statens etnografiska museum (Sweden),1953 **Naval Air Pilot, Central America** United States. Hydrographic Office,1937
