Blacks face a real alcohol problem, the contributors to this book focus on the prevention of alcohol abuse and alcoholism among American blacks. Not only do they survey the existing literature, they also break new theoretical and empirical ground. The first of the book's two sections addresses major models of black alcoholism and its consequences. The authors assess the strengths and weaknesses of contemporary preventive efforts designed specifically for blacks, and they map out new directions for the future. The second section examines the prevention of alcoholism among specific subgroups of blacks, such as adolescents and women; the prevention and treatment of black alcoholism in the workplace; and the role of religion as alcohol counselors and educators in the black community.

Bellack,Michel Hersen,Alan E. Kazdin,2012-12-06 It is particularly gratifying to prepare a second edition of a book because there is the necessary implication that the first edition was well received Moreover now an opportunity is provided to correct the problems or limitations that existed in the first edition as well as to address recent developments in the field Thus we are grateful to our friends colleagues and students as well as to the reviewers who have expressed their approval of the first edition and who have given us valuable input on how the revision could best be structured Perhaps the first thing that the reader will notice about the second edition is that it is more extensive than the first The volume currently has 41 chapters in contrast to the 31 chapters that comprised the earlier version Chapters 3 9 29 and 30 of the first edition either have been dropped or were combined whereas 14 new chapters have been added In effect we are gratified in being able to reflect the continued growth of behavior therapy in the 1980s Behavior therapists have addressed an ever increasing number of disorders and behavioral dysfunctions in an increasing range of populations The most notable advances are taking place in such areas as cognitive approaches geriatrics and behavioral medicine and also in the treatment of childhood disorders **Alcoholism and Other Drug Problems** James E. Bukoski,2007-08-06 There are a number of reasons why this book is important First there is no one source that summarizes what we know about the prevention of substance abuse from the research field so the book serves as a repository of accumulated knowledge on prevention theory intervention design and development and prevention research methodology Second as an evolving field prevention science has only begun to assert itself in both the arenas of practice and policy The formation of the Society for Prevention Research in 1991 was the first recognition that a science of prevention existed and required a separate forum to present the rapidly growing content of the field for discussion and review Finally there is a need to establish a baseline a reference point against which progress in the field of prevention science can be assessed This book serves all of these purposes The idea for this book grew from the observation in the early 1990s that after decades of attempts to develop effective interventions to prevent drug use among children and adolescents in the United States that we were finally having success particularly in addressing the initiation of use These successes are the result of research that has provided a better understanding of the factors and processes associated with the onset of substance use *Alcohol Health and Research World* ,1982 **NIAAA Information and Feature Service** ,1982

Handbook of Crime Correlates Lee Ellis, Kevin M. Beaver, John Wright, 2009-05-07 Over the past two centuries many aspects of criminal behavior have been investigated Finding this information and making sense of it all is difficult when many studies would appear to offer contradictory findings The Handbook of Crime Correlates collects in one source the summary analysis of crime research worldwide It provides over 400 tables that divide crime research into nine broad categories Pervasiveness and intra offending relationships Demographic factors Ecological and macroeconomic factors Family and peer factors Institutional factors Behavioral and personality factors Cognitive factors Biological factors Crime victimization and fear of crime Within these broad categories tables identify regions of the world and how separate variables are or are not positively or negatively associated with criminal behavior Criminal behavior is broken down into separate offending categories of violent crime property crime drug offenses sex offenses delinquency general and adult offenses and recidivism Accompanying each table is a description of what each table indicates in terms of the positive or negative association of specific variables with specific types of crime by region This book should serve as a valuable resource for criminal justice personnel and academics in the social and life sciences interested in criminal behavior Alcohol Resources ,1985

Perspectives on Alcohol Abuse ,1988 **Women: Alcohol and Other Drugs** Ruth C. Engs, 2007-02-01 This publication of Women Alcohol and other Drugs is a contribution by the Alcohol and Drug Problems Association ADPA to the understanding of and in response to gender differences in addictions Here is a tool for understanding and a guide for more effective treatment of women by the programs and professionals in the drug and alcohol treatment field Authored by women for the treatment of women this volume deals with all aspects of the field including research intervention treatment prevention and education at the community academic government public and private levels **Clinical Manual of Substance Abuse** Jean Kinney, 1996 A comprehensive practical reference for all health care professionals who care for patients with substance abuse problems Part I provides a framework for clinical management of these patients and Part II is comprised of chapters on working with specific populations and groups **Handbook of Prevention** Barry A. Edelstein, Larry Michelson, 2012-12-06 Americans are healing themselves Heckler 1985 and prevention has taken root McGinnis 1985a We are altering our lifestyle to reduce physical and mental health risks Perhaps as important is the fact that the science of prevention is beginning to catch up with the practices of prevention although some might argue that the popularity of these practices far outstrips sound theoretical and empirical foundations The chapter authors in this volume examine the theoretical and empirical foundations of many current prevention practices and where data exist discuss the status of prevention efforts Where substantial prevention is not yet on the horizon the authors attempt to point us in the right direction or at least share with the reader some of the risk factors that should be addressed in our research We hope that readers will be stimulated to discuss the issues raised advance the current research and where possible adopt the prevention and health promotion strategies that are supported by sound theoretical and empirical work This volume can in no way be

comprehensive with respect to the current work in prevention however we hope that we have provided a sampling of prevention activities and issues that appear together in one volume for perhaps the first time The primary intent of this volume is modest and the reader should not attempt to find continuity among the various chapters The only binding among these contributions is their focus on prevention
