Even if you feel you are not quite ready, this will draw you in and make quitting easy. **Nicotine Addiction** C. Tracy Orleans, John D. Slade, 1993. Despite persistent warnings from the medical profession about the health risks involved in cigarette smoking, millions of people continue to smoke cigarettes. With contributions from renowned experts, this ground breaking work defines and explains nicotine addiction as a primary problem or disease instead of as a habit or risk factor for other diseases. A comprehensive clinical text on tobacco dependence, this book provides clinicians with essential information on how to diagnose and treat nicotine addicted patients. It also offers the medical, epidemiological and behavioral science backgrounds necessary for understanding the process and dynamics of tobacco dependence. Following the traditional format of medical texts, the book first covers etiology, pathogenesis and complications, then diagnosis and treatment, and finally public health and prevention. Part One presents an overview of the biological, psychological and social factors that contribute to nicotine dependence, including such topics as a description of nicotine delivery systems, psychopharmacology, economics, natural history and epidemiology, mortality, morbidity and environmental tobacco smoke exposure. The second part offers practical guidelines and tools for treating nicotine dependence and describes a stepped care treatment model with brief interventions that can be easily integrated into routine medical practice. This section also covers the role of psychopharmacologic and formal treatment programs, the treatment of smokeless tobacco addiction and treating nicotine dependence in pregnant women and in people with medical illnesses, other chemical dependencies or psychiatric disorders. The last section focuses on worksite and community intervention programs and summarizes the research on smoking patterns and history in women, Blacks, Hispanics, youth and older adults, discussing how intervention and prevention programs could be made more effective in these groups. Written by the nation's leading tobacco control researchers and clinicians, this important work contains new and critical information not previously available.

Overcoming Addictions Anthony Ekanem, 2016-08-08 When you are suffering from an addiction it can feel like your entire life is out of control and you have no power to stop yourself from using again and again When you are addicted to something it can also feel like you re completely alone and have nowhere to turn These are all common mindsets for someone who has an addiction to any substance whether that is food cigarettes or other tobacco products alcohol prescription or illegal drugs and even sex But neither are you alone in your addiction nor do you have to be a slave to addiction for the rest of your life That s exactly why this book exists It is very easy to feel like you are the only one who is experiencing your particular addiction or the level of addiction you re experiencing but the truth is there are millions of others who experience exactly the same things that you do That s because addiction affects more than 10% of the United States population That means if you were to get on a typical city bus there are probably two or three people on that bus besides you that are suffering from some kind of addiction Don t fool yourself either having a food addiction or being unable to quit drinking alcohol is the same as an addiction to a drug or any other substance Addiction is addiction no matter what the substances
