*Sex and Buildings* Richard J. Williams, 2013-07-15 Massive modern skyscrapers obelisks towers all are structures that thanks to their phallic shape are often associated with sex But other buildings are more subtly connected as they provide the frameworks for our sexual lives and act as reminders of our sexual memories This relationship between sex and buildings mattered more than ever in the United States and Europe during the turbulent twentieth century when a culture of unprecedented sexual frankness and tolerance emerged and came to dominate many aspects of public life Part architectural history part cultural history and part travelogue *Sex and Buildings* explores how progressive sexual attitudes manifest themselves in architecture asking what progressive sexuality might look like architecturally and exploring the successes and failures of buildings attempts to reflect it In search of structures that reflect the sexual mores of their inhabitants Richard J Williams visits modernist buildings in Southern California the Westin Bonaventure Hotel the Playboy Mansion in Chicago the Seagram in New York communes from the 1960s and more A fascinating and often funny look at a period of extraordinary social change coupled with aesthetic invention *Sex and Buildings* will change the way we look at the buildings around us

*Carbon-Neutral Architectural Design* Pablo M. La Roche, 2024-05-31 The energy used to build and operate buildings is a significant source of greenhouse gas emissions While it is possible to reduce emissions through low carbon design many architects are not trained to do this Filling an urgent need for a design reference in this emerging field this book describes how to reduce building related greenhouse gas emissions through appropriate design techniques It presents strategies to achieve CO2 reductions with an emphasis on control of energy flows through the building envelope and passive cooling and heating strategies This new revised edition is updated throughout and includes a new section on embodied carbon and new chapters on daylighting and nature based cooling Features Adds new chapters on daylighting and nature based cooling with numerous updates throughout the rest of the chapters Presents strategies illustrated with examples for new construction and existing buildings to reduce energy consumption and reduce emissions Explains the origins of CO2 emissions associated with the operation and fabrication of buildings supplying water disposing of waste from the building and proposes strategies to reduce them Covers carbon calculations thermal comfort indigenous technology climate responsive design passive cooling and heating solar design air flow analysis daylighting building simulation and microclimate design with abundant examples Examines siting location to design buildings that adapt and mitigate their effect on climate change **R. what he learned from the American Master Frank Lloyd Wright      Schindler James Steele, 2005 Maverick of mid century American architecture Each of my buildings deal with a different architectural problem the existence of which has been forgotten in this period of Rational Mechanization The question of whether a house is really a house is more important to me than the fact that it is made of steel glass putty or hot air R M Schindler Hailing from Vienna Rudolph Michael Schindler 1887 1953 like his colleague Richard Neutra emigrated to the US and applied his International Style techniques to the movement that would come to be known as California Modernism Influenced by the work of Frank Lloyd Wright and taking cues from spatial notions found in cubism he developed a singular style characterized by geometrical shapes bold lines and association of materials such as wood and concrete as seen in his own Hollywood home built in 1921 22 and the house he designed for P M Lovell in Newport Beach 1923 24 About the Series Each book in TASCHEN s Basic Architecture Series features an introduction to the life and work of the architect the major works in chronological order information about the clients architectural preconditions as well as construction problems and resolutions a list of all the selected works and a map indicating the locations of the best and most famous buildings approximately 120 illustrations photographs sketches drafts and plans      **Encyclopedia of Twentieth Century Architecture** R. range from scientific images to historic artistic and architectural masterpieces Artworks span Michelangelo and Vermeer to Gordon Matta Clark and architecture takes in Modern Masters such as Mies van der Rohe Le Corbusier and Alvar Aalto as well as significant contemporary works by Steven Holl and Daniel Libeskind      **Urban Future Manifestos** Peter Noever, Kimberli Meyer, 2010 Calls upon leading creative thinkers to address urgent questions about the future of the contemporary city Contributing architects artists designers and urban scholars from around the globe consider the city from a variety of positions and posit their unique and inspiring visions Page 4 of cover      **Dissertation Abstracts International** ,2004 Abstracts of dissertations available on microfilm or as xerographic reproductions      **Books in Print, 2006-2007** ,2006      **Deutsche Nationalbibliographie und Bibliographie der im Ausland erschienenen deutschsprachigen Veröffentlichungen** ,2006      Art Papers ,2002      *The Architects' Journal* ,1989      Art Papers Magazine ,2002      **The British National Bibliography** Arthur James Wells, 2006      The Architectural Review ,1980      **2G dossier** ,1997      **Domus** Gio Ponti, 1993 Monthly review of architecture interiors designing art      *Abstracts* College Art Association of America.
