Restructuring Pauline Lipman, 1998-01-01 Explores the intersection of two central issues in American education today school reform through restructuring and alienation from school of many children of color A tough look at the impact of teachers and administrators beliefs and practices Second International Handbook of Educational Leadership and Administration

Kenneth A. Leithwood, P. Hallinger, 2012-12-06 The first International Handbook of Educational Leadership and Administration Leithwood et al was published in 1996 and quickly became something of a best seller for reference works within education Such success we suggest was at least partly due to the unprecedented global waves of concern for improving schools launched in the mid 1980 s combined with a widespread belief in leadership as the single most powerful contribution to such improvement The roots of this belief can be found in evidence produced by the early effective schools research although there is a romance with leadership as an explanation for success in many non school enterprises as well During the two year period during which this current handbook was being written activity in the realms of school leadership school improvement and leadership development gained further momentum The English government created its new National College of School Leadership and several Asian nations announced new initiatives in leadership selection preparation and development *Education Reform in Florida* Kathryn M. Borman, Sherman Dorn, 2012-02-01 In Education

Reform in Florida sociologists and historians evaluate Governor Jeb Bush s nation leading school reform policies since 1999 They examine the startlingly broad range of education policy changes enacted in Florida during Bush s first term including moves toward privatization with a voucher system more government control of public education institutions with centralized accountability mechanisms and a superboard for all public education The contributors arrive at a mixed conclusion regarding Bush s first term education policies while he deserves credit for holding students to higher standards his policies have unfortunately pushed for equality in a very narrow way The contributors remain skeptical about seeing significant and sweeping improvement in how well Florida schools work for all students Educational Leadership in an Age of Accountability

Daniel L. Duke, Margaret Grogan, Pamela D. Tucker, Walter F. Heinecke, 2012-02-01 The insistence by policymakers and politicians that educators be held accountable for student outcomes has resulted in dramatic shifts in the responsibilities of department chairs principals and superintendents Educational Leadership in an Age of Accountability explores these changes in Virginia following its implementation of an ambitious accountability plan that called for standards of learning statewide high stakes tests standards of accreditation and annual school performance report cards This book examines factors such as the fate of students who fail state tests achievement differences between black and white students

ethical issues surrounding accountability measures and the increasing politicization of local schooling Educational Leadership in an Age of Accountability shows that accountability pressure has done more than previous reforms to foster instructional leadership *Leading Learning: Making Hope Practical in Schools* Bob Lingard, Debra Hayes, Martin Mills, Pam Christie, 2003-07-16 How can we understand and theorise school leadership How can school leadership work towards enhancing student learning What are the constraints and possibilities for school leadership at the beginning of a new century This title is relevant to anyone concerned with improving schooling and enhancing the professional practices of educators The authors focus on leadership for enhancing student outcomes both academic and social While recognizing the significance of the principal or headteacher in school leadership the authors argue a strong case for the dispersal of leadership Based on extensive research conducted within schools Focuses on leading learning across the school Theoretically sound reflects the theories of Bourdieu and Foucault Politically aware discusses the context of leadership within school communities educational systems global pressures new policy directions Current topical and thoughtful *Leading Learning* is key reading for principals or headteachers teachers and other school leaders policy makers and for students studying educational administration

Corridor Cultures Maryann Dickar, 2008-11 For many students the classroom is not the central focus of school The school's corridors and doorways are areas largely given over to student control and it is here that they negotiate their cultural identities and status among their peer groups The flavor of this corridor culture tends to reflect the values and culture of the surrounding community Based on participant observation in a racially segregated high school in New York City *Corridor Cultures* examines the ways in which school spaces are culturally produced offering insight into how urban students engage their schooling Focusing on the tension between the student dominated halls and the teacher dominated classrooms and drawing on insights from critical geographers and anthropology it provides new perspectives on the complex relationships between Black students and schools to better explain the persistence of urban school failure and to imagine ways of resolving the contradictions that undermine the educational prospects of too many of the nation's children Dickar explores competing discourses about who students are what the purpose of schooling should be and what knowledge is valuable as they become spatialized in daily school life This spatial analysis calls attention to the contradictions inherent in official school discourses and those generated by students and teachers more locally By examining the form and substance of student school engagement *Corridor Cultures* argues for a more nuanced and broader framework that reads multiple forms of resistance and recognizes the ways students themselves are conflicted about schooling

Yeakey, Ronald D. Henderson, 2000-09-01 Volume 1 in the two volume set about overcoming the odds in African American Education International Handbook of Urban Education William T. Pink, George W. Noblit, 2008-09-03 It is evident that urban education has become the central focus of educators at the present time In the U S for example almost one third of all school age children attend schools in large urban school districts It is in these urban schools where the diversity of cultures and languages is highest and where student learning is most problematic What has emerged from recent work to improve urban schools is the insight that there is no one size fits all panacea Rather we have discovered that the local context shapes in critically important ways what will be effective at the school level The universality of the problematics with urban education together with the importance of understanding the local or situated context of improvement interventions brings into sharp focus the importance and timeliness of an undertaking like the International Handbook of Urban Education An

important focus of the International Handbook of Urban Education will be the interrogation of both the social and political factors that lead to different problem posing and subsequent solutions within each region. An important question to be answered for example is what it takes in terms of resources, political will and policy actions to improve urban education.

African American Perspectives on Leadership in Schools Lenoar Foster, Linda C. Tillman, 2009-11-16. This book fills an educational void in the school leadership literature as it relates to historical, theoretical, intellectual and cultural understandings among those who prepare individuals for leadership in schools and for those who practice leadership in schools attended by significant numbers of African American students. Contributors to this volume are scholars whose research and service in schools have been important in understanding the historical, intellectual and cultural traditions that facilitate and support effective leadership and in schools where African American school leaders, teachers, students, parents and their communities of support construct effective and productive cultures of empowerment and achievement. It is these cultures that this volume addresses for their efficacy to support, empower and sustain visible and measurable achievement among African American students.

Critical Voices in Teacher Education Barry Down, John Smyth, 2012-04-28. We live in dangerous times when educational policies and practices are debated largely in terms of how they fit with the needs of the free market. This volume is a collection of writing by teacher educators that draws on their unique biographies, experiences and perspectives to denounce these misguided norms. It explores what it means practically and intellectually to teach for social justice in conservative times. In a globalised world where the power of capital holds sway, the purposes of social institutions such as universities and schools is being refashioned in ways that are markedly instrumental and technicist in nature. The consequence is that teachers' work is increasingly constrained by regimes of control such as standardised testing, accountability, transparency and national curricula. In the meantime, large numbers of students and teachers are disengaging, physically, emotionally and intellectually from learning. The contributors to this edited volume present both a powerful critique of these developments and a counter-hegemonic vision of teacher education founded on the principles and values of social justice, democracy and critical inquiry. Teacher education, they argue, involves a commitment to critical intellectual work that subjects some deeply entrenched assumptions, beliefs, habits, routines and practices to closer scrutiny. The contributing authors expose how ideology and power operate in seemingly blameless, rational ways to perpetuate social hierarchies based on class, gender, sexuality, race and culture.
