Azzarello,2025-03-31 This book is a philosophical examination of the ways in which neoliberalism underpins and impedes public education It proposes that education s adoption of neoliberal logic generates a sense of despair amongst educators who often enter the profession with the hope of building a better more just world Drawing on the author s 27 years of experience as a secondary classroom teacher and engaging with a range of theoretical concepts cultural objects and scenes of violence from her time in the classroom *The Radical Potency of Despair* renders visible the ongoing harms that neoliberal logic creates for education and educators The author proposes a new ruptured fantasy of education and suggests that it is not hope that ignites educators who keep fighting for education but rather despair Despair is conceived of as a generative force provoking educators to hold time and space open for pedagogical encounters that interrupt the ongoing instrumentalization of education The author further conceptualizes a notion of thinking with images as a pedagogical interruptive force Thinking with images she argues gives students time and space to attend to what they see thus affording them the chance to think differently about the violence of modern society Such pedagogical interruptions are presented as a refusal of the normative order of education countering present infrastructures that aim to constrain and instrumentalize education A compelling and original volume it will appeal to scholars researchers and upper level students with interests in neoliberalism and education the philosophy of education critical pedagogy and educational policy and politics      *The*

**Schooling the System**

Funké Aladejebi, 2021-03-05 In post World War II Canada black women's positions within the teaching profession served as sites of struggle and conflict as the nation worked to address the needs of its diversifying population. From their entry into teachers college through their careers in the classroom and administration, black women educators encountered systemic racism and gender barriers at every step. So they worked to change the system. Using oral narratives to tell the story of black access and education in Ontario between the 1940s and the 1980s, *Schooling the System* provides textured insight into how issues of race, gender, class, geographic origin, and training shaped women's distinct experiences within the profession. By valuing women's voices and lived experiences, Funk Aladejebi illustrates that black women as a diverse group made vital contributions to the creation and development of anti-racist education in Canada. As cultural mediators within Ontario school systems, these women circumvented subtle and overt forms of racial and social exclusion to create resistive teaching methods that centred black knowledges and traditions. Within their wider communities and activist circles, they fought to change entrenched ideas about what Canadian citizenship should look like. As schools continue to grapple with creating diverse educational programs for all Canadians, *Schooling the System* is a timely excavation of the meaningful contributions of black women educators who helped create equitable policies and practices in schools and communities.

**Engaging Families, Educators, and Communities as Educational Advocates** Sue Winton, Lauri Johnson, 2018-10-16 This edited collection broadens understanding of family-school-community partnerships by focusing on how community groups, educators, and university professors engage with public education to achieve their own goals rather than goals defined by schools, school systems, and governments. Authors critically examine various school-community partnerships that collectively aim to improve decision-making, democratize policy processes, resist policies that support the marketization of public education, and advocate for racial equality. The book's chapters focus on advocacy efforts within and across three national contexts: England, Canada, and the United States. Together, they expand current scholarship by demonstrating how different constituencies develop alliances, experience tensions, and navigate the politics inherent in change efforts. By examining the intersections of parent and community organizing, teacher unions, and school-community partnerships across national contexts, the chapters uncover fruitful new terrain for understanding the theory and practice of educational activism. This volume was originally published as a special issue of *Leadership and Policy in Schools*.
