often well intentioned managers put roadblocks in the team's way instead of empowering them with the tools they need to succeed. This approach to project environments grounded in decades of research and practice will help you make your organization the most project friendly it's ever been. Organizational changes rarely work unless upper management is heavily involved. Although project managers are most closely responsible for the success of projects, upper managers are the ones who ultimately create an environment that supports those projects. The way upper managers define structure and act toward projects has an important effect on the success or failure of those projects and consequently the success or failure of the organization. This book helps all managers understand the need for project management changes and shows how to develop project management as an organizational practice. Effective, timely and engaging. A practical approach to transforming educators into successful and reflective school administrators. John C. Daresh, Author of *Beginning The Principalship*. Insight into the perceptions, personal values and personalities that help principals succeed. A successful principal is more than a good manager. Becoming an effective school leader means understanding the culture as well as acquiring the technical skills. *If You Want to Lead, Not Just Manage* tells you what the Masters programs don't about the personalities and value systems that school leaders need to succeed. First year administrators and graduate students will find this a practical gauge in determining what it takes to become a successful principal. More experienced administrators will find it a useful tool for reflection and validation of their own practices and approaches within the school and district. Key issues include: Matching your personality with the role of principal; Navigating the school culture successfully; Changing the organization without alienating the culture; Blending the best of management and leadership; Fitting in; marketing yourself as well as your school; Culture shock when teachers become principals. **Cultural Values in Strategy and Organization** T. K. Das, 2021-06-01

The field of strategy science has grown in both the diversity of issues it addresses and the increasingly interdisciplinary approaches it adopts in understanding the nature and significance of problems that are continuously emerging in the world of human endeavor. These newer kinds of challenges and opportunities arise in all forms of organizations encompassing private and public enterprises and with strategies that experiment with breaking the traditional molds and contours. The field of strategy science is also perhaps inevitably being impacted by the proliferation of hybrid organizations such as strategic alliances, the upsurge of approaches that go beyond the customary emphasis on competitiveness and profit making, and the intermixing of time-honored categories of activities such as business, industry, commerce, trade, government, the professions, and so on. The blurring of the boundaries between various areas and types of human activities points to a need for academic research to address the consequential developments in strategic issues. Hence, research and thinking about the nature of issues to be tackled by strategy science should also cultivate requisite variety in issues recognized for research inquiry, including the conceptual foundations of strategy and strategy making, and the examination of the critical roles of strategy makers, strategic thinking, time and temporalities, business and other goal choices, diversity in organizing modes for strategy implementation, and the complexities of managing strategy, to name a few. This book series on *Research in Strategy Science* aims to provide an outlet for ideas and issues that publications in the field do not provide either expressly or adequately, especially as regards the comprehensive coverage deserved by certain emerging areas of interest.
