Doppen, 2023-06-01 The significance of this book is its uniqueness First the book contains a collection of fourteen chapters that capture the personal professional and historical experiences of international global scholars and artists to which they were subjected in their native country and after they immigrated to the United States What makes this book project highly unusual in comparison to other publications is that these international global scholars and artists experienced historical events of trauma and joy in their native country and in their newly adopted country of the United States that lie deeply buried in their sub consciousness that these memories are unforgettable and still painful for them that these memories are a constant companion in their daily lives and that the

experienced historical events of trauma and joy have shaped their professional and personal lives to this very day There exists a paucity in the global education literature of this far reaching topic and thus it has the potential to enhance and diversify the global education literature Second the significance of this book lies in the pedagogical power of the oral history narrative tradition and its impact on students at the secondary and tertiary levels in education When one's lived experiences of trauma or joy occur during a critical time in history they rarely yield unforgotten memories and deeply held private knowledge that do not come to light without a storyteller When first hand accounts are shared publicly they can bring powerful insights into past historic events to the very present Thus the pedagogical strength of this book contributes to knowledge creation in the classroom as oral histories move students from abstract textbook descriptions to concrete and compelling lived stories associated with historical happenings This pedagogy leads students to become more critical of historical events of the past and develops in them a deeper understanding of the past Consequently oral history narratives enable teachers and teacher educators to enrich the abstract text of textbooks with the authentic voice of the individual A third significance of this book lies embedded in the rich historical perspective displayed by storytellers of non native international global scholars and artists from around the world who portray their lived through first hand experiences such as child labor communism hate hunger fascism fear intolerance discrimination prejudice poverty war protest and death Finally a major purpose of this book is to expose young learners from around the world to empowering non native international role models in global education and the arts from nations in Africa Asia the Caribbean Eurasia Europe the Middle East and South America who build bridges not walls between peoples and nations

Handbook of the Sociology of Education Maureen T. Hallinan, 2006-11-24 The aim of the Handbook of Sociology of Education is to present the most

theoretically grounded and empirically rigorous sociological analyses of schools to date. The authors are distinguished researchers in the field. Their contributions to the Handbook offer major theoretical perspectives on the schooling process and describe significant empirical studies of schools and their effects on individuals and society. The research presented in the Handbook is built on three fundamental tenets of sociology. First, the authors adopt the perspective that schools are a central institution in society. An understanding of the function of schooling in social life is enhanced by viewing schools as interrelated with other societal institutions. The study of how the context of schooling influences education processes is critical to an understanding of school outcomes. Rather than being determined solely by ascribed and achieved characteristics, an individual's cognitive and social development are influenced heavily by the structures and networks in which the individual is embedded. Communities, families, schools, and social groups are critical elements in the educative process. By viewing the school as a societal institution and highlighting the interaction between context and individual behavior, the Handbook chapters provide a broader and deeper understanding of the determinants of learning in contemporary society.

The second sociological insight that guides the research in the Handbook is that the school is a social system.

Achieving Equal Educational Opportunity for Students of Color Richard R. Valencia, Valencia presents the most comprehensive theory-based analysis to date on how society and schools are structurally organized and maintained to impede the optimal academic achievement of low SES marginalized K-12 Black and Latino/Latina students compared to their privileged White counterparts. The book interrogates how society contributes to educational inequality as seen in racialized patterns in income, wealth, housing, and health, and how public schools create significant obstacles for students of color as observed in reduced access to opportunities, e.g., little access to high status curricula, knowledge. Valencia offers suggestions for achieving equal education, e.g., implementing fairness of school funding, improving teacher quality, and providing students of color access to multicultural education by disrupting structural racism. Considering the rapid aging of the White population and the sharp decline of White youth, coupled with the explosive growth in people of color, this book argues that the American Imperative must be to assiduously mount an effort to provide an excellent education for students of color who the nation will depend on for a sizable proportion of its work force.

Book Features: Examines how society and schools are failing Black and Latino/Latina students, principally Mexican Americans who are by far the largest Latino/Latina group. Uses theoretical frameworks that draw from analysis of structural inequality, critical race theory, anti-deficit thinking, narratives, class-by-race covariation, and an asset-based perspective of students of color. Discusses the American Imperative and the personal and economic consequences of not investing in students of color.

Ethnic Peace in the American City Edward Taehan Chang, Jeannette Diaz-Veizades, 1999-08. The Los Angeles riot of 1992 marked America's first high-profile multiethnic civil unrest. Latinos, Asian Americans, whites, and African Americans were involved as both victims and assailants. Nearly half of the businesses destroyed were Korean American owned, and nearly half of the people arrested were Latino. In the aftermath of

the unrest Los Angeles with its extremely diverse population emerged as a particularly useful site in which to examine race relations. *Ethnic Peace in the American City* documents the nature of contemporary inter ethnic relations in the United States by describing the economic, political, and psychological dynamics of race relations in inner city Los Angeles. Drawing from local as well as international examples, the authors present strategies such as coalition building, dispute resolution, and community organizing. Moving beyond the stereotyped focus on negative interactions between minority groups such as Korean owned businesses and the African American community, and countering the white/black or bi racial paradigms of American race relations, the authors explore practical means by which ethnically fragmented neighborhoods nationwide can work together to begin to address their common concerns before tensions become explosive.
