Race Evolution Behavior:

Race, Evolution, and Behavior J. Philippe Rushton, 1995 This volume is sure to be controversial as Rushton attempts nothing less than a paradigmatic change in the way social scientists approach their work especially those concentrated in the study of racial differences Race Evolution and Behavior must be read by sociologists anthropologists genetic scientists psychologists and black studies specialists Race, Evolution, and Behavior J. Philippe Rushton, 2000 Race, Evolution, and Behavior J. Rushton, 2013-07-28 New edition A masterpiece of modern racial science grounded in irrefutable fact Testing for racial differences in behavior has been much neglected over the past sixty years And when not subject to neglect to strongly negative imputations among professionals and politicians alike According to J Philippe Rushton substantial racial differences do exist and their pattern can only be explained adequately from an evolutionary perspective In this book the author reviews international data and finds a distinct pattern People of East Asian ancestry and people of African ancestry are at opposite ends of a continuum with people of European ancestry intermediate albeit with much variability within each broad grouping Rushton s thesis is that when fully modern humans migrated out of Africa perhaps only 100 000 years ago the colder Eurasian climate selected for larger brains more forward planning greater family stability and increased longevity with concomitant reductions in sex hormone speed of maturation reproductive potency and aggressiveness Rushton s theory emphasizes a trade off between parenting and mating and brings into focus the concept of a coordinated life history of characteristics evolving together to replicate genes more effectively The selection for large brains and parenting skills was taken furthest in east Asia Rushton s theory explains differentiation in intelligence and predicts other seemingly unrelated race effects such as differences in frequency of twinning The capacity to unify disparate phenomena is usually considered a virtue in theories Rushton s gene based evolutionary models explain ethnocentrism and racial group differences and may provide a catalyst for understanding individual differences and human nature This volume is sure to be controversial as Rushton attempts nothing less than a paradigmatic change in the way social scientists approach their work especially those concentrated in the study of racial differences Race Evolution and Behavior must be read by sociologists anthropologists and black studies specialists Contents Preface to Third Edition List of Tables List of Figures Preface to First Edition Acknowledgments 1 Revamping Social Science 2 Character Traits 3 Behavioral Genetics 4 Genetic Similarity Theory 5 Race and Racism in History 6 Race Brain Size and Intelligence 7 Speed of Maturation Personality and Social Organization 8 Sexual Potency Hormones and AIDS 9 Genes Plus Environment 10 Life History Theory 11 Out of Africa 12 Challenges and Rejoinders 13 Conclusions and Discussion Afterword Glossary References Author Index Subject Index Evolutionary Behavioral Ecology and Psychopathy Janko Mededović, 2023-07-19 This book examines the study of psychopathy using behavioral ecological framework It consists of two parts The first describes the science of human behavioral ecology including Basic concepts of evolutionary biology Evolutionary behavioral sciences Evolutionary ecology of family Evolutionary

tradeoffs Life history theory Behavioral ecology of personality Psychopathy and its current evolution The second part of the book describes empirical research on psychopathy in evolutionary ecological context aiming to explore fertility longevity tradeoffs in psychopathy interacting phenotypes in psychopathy and parental effects associated with psychopathy This part contains the discussion of the study s findings which is based on several theoretical concepts described in part one This volume is ideal for psychopathy researchers hoping to bridge the natural and social sciences in a new and innovative way
